Fire Information:
(970) 329-2216
2021.west@firenet.gov

1. Incident Name: West	2. Operational Period: Date From: 06.27.2021 Date To: 06.27.2021 Time From: 0630 Time To: 2000		
3. Objective(s): <ul style="list-style-type: none"> • Protection of the lives of firefighters, air crews, and the public • Minimize impacts to human improvements (including but not limited to structures, oil & gas infrastructure, and electrical infrastructure) • Communicate with consideration for the needs of local residents and communities • Limit suppression damage to sensitive soils, cultural resources, fisheries habitat, and any other natural resource identified by the assigned resource advisor • Containment of costs, commensurate with values • Provide effective, timely, and fire information to the public • Limit fire growth in Greater Sage Grouse Habitat • Limit fire spread to the headwaters in Beaver Basin, Skeltcher Creek due to the Colorado River Cutthroat Trout habitat 			
4. Operational Command Period Emphasis <ul style="list-style-type: none"> • Utilize tactics that have a high probability of success and minimize cumulative risk to both ground and aerial resources • Steep and rugged terrain, critically dry, drought stressed, receptive fuel beds with an active fire history • Enhanced hygiene (especially hand-washing), PPE and monitoring practices help limit the infection rate of first responders 			
5. Site Safety Plan Required? Yes <input type="checkbox"/> No <input checked="" type="checkbox"/> Approved Site Safety Plans Located at: None Applicable			
6. West Fire Weather Forecast

Forecast Number: 4
Office Responsible: CO-MFX
Shift Date: Sunday, June 27, 2021

Incident Meteorologist: Joe Goudsward
/s/ Joseph Goudsward
Forecast Issued: 2000 hrs. June 26, 2021

WEATHER DISCUSSION:

An upper level trough of low pressure, sitting just to the east of the incident this morning, will continue to slowly move away from the fire through the day. Meanwhile, upper level high pressure continues to build over the Pacific Northwest and will be centered over extreme southern British Columbia by the end of the day. Even with the drier northerly flow between these systems, an afternoon shower or thunderstorm cannot be discounted over the higher terrain. With more sunshine expected versus the previous few days, temperatures will warm slightly and humidity will lower. This warming and drying trend will continue through the middle part of the week when the ridge will begin to break down somewhat, allowing moisture to return and a subsequent increase in mainly afternoon scattered and thunderstorms.

WEATHER:

Today: Partly cloudy with isolated showers and thunderstorms. The best chance of seeing precipitation will be during the afternoon and over the higher terrain areas. Any thunderstorm will be capable of producing gusty and erratic outflow winds

Tonight: Partly cloudy with isolated showers and thunderstorms in the evening, becoming mostly clear by morning.

TEMPERATURES:

Ridges/High Valleys:	Highs: 62-67	Lows: 40-46
Valleys/Mid-Slopes:	Highs: 71-76	Lows: 48-55

HUMIDITY:

Ridges/Slopes:	Min: 32-38 %	Max: 75-82 %
Valleys:	Min: 25-32 %	Max: 60-67 %

20 FT WINDS: **Ridges:** Light northeast winds early in the day, increasing to 10 to 20 mph with gusts as high as 30 mph in the afternoon. Winds will slowly subside during the evening and become terrain driven after midnight at 4 to 8 mph.

Valleys: Downslope/down-valley 2-4 mph until late morning, becoming north/northeast 6 to 10 mph with gusts as high as 15 mph. Winds becoming terrain driven after midnight at 3 to 6 mph.

CHANCE OF WETTING RAIN: 0%

LAL: 1 through noon, then 2 for the afternoon hours.

INVERSION/MIXING HEIGHTS/DISPERSION: Mixing heights 4000 to 5000 feet AGL. Poor dispersion early in the morning, good dispersion during the afternoon.

TRANSPORT WINDS: Northeast 10 to 15 mph.

OUTLOOK FOR MONDAY:

Mostly sunny with isolated afternoon showers over the higher terrain. Highs 65 to 71 ridges and high slopes, 73 to 78 valleys and mid-slopes. Afternoon humidity 15 to 30%. Northeast around 10 to 15 mph with gusts up to 25 mph in the afternoon.

EXTENDED OUTLOOK:

Tuesday through Thursday: An isolated late day shower or thunderstorm over the higher elevations Tuesday and Wednesday, scattered showers and thunderstorms over the higher elevations Thursday. High temperatures in the upper 60s Tuesday, warming to the mid-70s by Thursday. Minimum humidity in the upper teens to near 20. Breezy with northeast winds 10 to 18 mph with gusts as high as 25 mph.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 5	TYPE OF FIRE: Wildfire
FIRE NAME: West Fire	OPERATIONAL PERIOD: Day Shift 6-27-2021
DATE ISSUED: 06-26-2021	TIME ISSUED: 2000
UNIT: CO-MFX-000192	SIGNED: //s// Larry Long FBAN

INPUTS

****See the attached Incident Weather Forecast****

OUTPUTS FIRE BEHAVIOR

GENERAL: Fire behavior will be minimal again today with the higher humidity and lower temperature. However, the 1 and 10 hour fuels should have dried out yesterday and will be available for combustion, and could result in increased fire behavior later in the day. The fuels will still be receptive to spotting due to the persistent drought conditions.

Probability of ignition is 55% with spotting distances of 1500 feet possible. Haines Index 3

1-hour fuel moistures: 6%, 10 hours at 8%, 100 hours at 5%, 1000-hour fuels are ~5% and live fuel moistures are at around 100-125%. ERCs are above the 97th percentile.

Fuel model	Max. Flame Length	Day Shift ROS	Night Shift ROS	Spotting
Lodgepole Pine w/ heavy dead and down – SB2	4-8 ft.	13-30 ch/hr	N/A	.3 miles
Timber with Grass – FM2	3-6 ft.	20-40 ch/hr	N/A	.3 miles

SPECIFIC:

All Divisions: The fire may be active in the heavier concentrations of fuels as the winds surface. There is a potential for torching as winds and slope align. Expect the fire to continue to clean-up interior islands and heavy fuels. The steady northeast winds and high fuel loading could keep the interior of the fire active. Spotting is still a small possibility especially where wind and slope align.

AIR OPERATIONS:

Gusty and erratic winds will develop with the afternoon instability and may hamper air operations.

SAFETY

Local Thresholds – **WATCHOUT:** Combinations of any of these factors can greatly increase fire behavior:

Elevations	20' Winds +15 mph	RH <20%	Temp +80°	1000hr Fuel <7%
8200 – 9600'	NE 10-20 mph, G30	31-36%	63-68°	~6%

Demob Tips

West Fire CO-MFX-000192

For emergency or urgent demobs contact your supervisor first and then contact the Demob Unit directly at 2021.west.demob@firenet.gov or (970) 217-6479 or (605) 381-2521.

Note: If you have cell phone coverage you will not physically need to come to demob.

After being notified by your supervisor of your tentative release date:

Step 1. Return all supplies, radios, etc. that were checked out.

Step 2. Submit time for all personnel and equipment to Finance per the directions in the IAP.

Step 3. Once you receive confirmation from FINANCE with a copy of your OF-288 and other financial documentation you are free to complete Step 4 and travel home.

Step 4. Any vehicle that has been on road 72 into the fire must go through the weed wash station located at the east side of the park in Maybell.

Step 5. **After steps 1-4 are completed**, scan the QR code on the front of the IAP and select the Incident Check In/Demobilization tab, then select Demob Form. Once you submit the Demob Checkout Sheet you are released from the incident and may begin travel home.

Safe travels!

FINANCE DEMOB PROCEDURES

Please follow these steps for an electronic demobilization from finance:

1. Send in final CTRs and Shift Tickets to 2021.west.finance@firenet.gov. Please include an email address on your CTR for final timesheet / invoice submission.
Ensure they are complete and legible, to ensure accurate posting
2. Finance will email each resource a final of their timesheet (OF288) or Invoice (OF286) for review.
3. Please review and respond with a confirmation of accuracy. If there are errors or edits needed, inform finance in the reply email.
4. Finance will respond to the confirmation message with additional instructions based on specific resource type. (*Finance is available at 307-286-4748 or 307-286-3812; Comp/Claims 307-286 5320*)
5. Travel safely home without having to deal with finance in person!

Controlled Unclassified Information//Basic

Medical Incident Report					
FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT Med Unit/ Communications (Verify correct frequency prior to starting report) <i>Ex: Med Unit Lead Div. Alpha. Stand-by for Emergency Traffic.</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: Med Unit Lead I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care.</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>				
Nature of Injury or Illness & Mechanism of Injury			<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>		
Transport Request			<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>		
Patient Location	<i>Descriptive Location & Lat. / Long. (WGS84)</i>				
Incident Name	<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>				
On-Scene Incident Commander	<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>				
Patient Care	<i>Name of Care Provider (Ex: EMT Smith)</i>				
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)					
Patient Assessment: See IRPG page 106					
Treatment:					
4. TRANSPORT PLAN:					
Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:					
Helispot / Extraction Site Size and Hazards:					
5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:					
<i>Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication</i>					
6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable					
Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					
7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.					
8. ADDITIONAL INFORMATION: Updates/Changes, etc.					
REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
