Spot forecast for QUARTZ RIDGE...CO-SJF

.DISCUSSION...

The risk for afternoon showers and thunderstorms will continue on Sunday and Monday as residual moisture from prior storms remains in place. Lightning and heavy rain will be the main concerns. Winds should mostly be light and terrain driven, but can become gusty and erratic near showers and storms. Drier conditions start moving in by the middle of the week, but an isolated storm or two is still not ruled out. The next monsoon surge arrives Friday into the weekend with more widespread showers and storms a decent bet.

.SUNDAY . . .

Sky/weather.....Becoming mostly cloudy (75-85 percent). Showers and thunderstorms likely, mainly after 1200.

Max temperature....70-75.

Min humidity......35-45 percent.

Wind (20 ft).......Downslope/down valley winds < 5 mph until 1000, then becoming upslope/up valley 5 to 10 mph with a few gusts to 15 mph in the afternoon. Gusty and erratic winds expected near thunderstorms.

Haines Index.....4 or low.

LAL.....1 until 0900, then 3 until 1200, then 4 until

1500, then 5 until 1600, then 4.

Transport winds.....Northwest 10 mph.

.SUNDAY NIGHT...

Sky/weather.....Becoming partly cloudy (45-55 percent). Chance of showers and thunderstorms, mainly before 2400.

Min temperature....45-50.

Max humidity......75-85 percent.

Wind (20 ft)......Winds becoming downslope/downvalley < 5 mph overnight. Gusty and erratic winds expected near thunderstorms during the evening.

Haines Index.....4 or low.

LAL.....4 until 2400, then 3.

Transport winds.....Northeast 10 mph.

.MONDAY...

Sky/weather......Becoming mostly cloudy (75-85 percent). Showers and thunderstorms likely, mainly after 1200.

Max temperature....70-75.

Min humidity......35-45 percent.

Wind (20 ft)......Downslope/downvalley winds < 5 mph until 1000, then becoming upslope/upvalley 5 to 10 mph with a few gusts to 15 mph in the afternoon. Gusty and erratic winds expected near thunderstorms.

Haines Index.....5 or moderate.

LAL..... until 0900, then 3 until 1200, then 5.

Transport winds.....Northwest 5 mph.

.FORECAST DAYS 3 THROUGH 5...

. TUESDAY . . .

Mostly cloudy. Chance of showers and thunderstorms. Lows in the upper 40s. Highs in the lower 70s. Northeast winds 10 mph.

. WEDNESDAY . . .

Partly sunny. Chance of showers and thunderstorms. Lows in the upper 40s. Highs in the lower 70s. Southwest winds 10 mph.

. THURSDAY . . .

Partly sunny. Chance of showers and thunderstorms. Lows in the upper 40s. Highs in the lower 70s. Southeast winds 10 mph.

.DISCUSSION...Lingering showers in the vicinity of the fire near sunrise on Sunday will be possible. Storms will refire by late morning over the higher terrain and move near the fire through the day as moisture still lingers over the eastern San Juans. The cloud cover looks to keep winds on the lighter side and mostly tied to the terrain. Gusty winds near storms however will always be a threat. Drier conditions move in to start the week but one more day of storms near the fire will be probable on Monday. Dry conditions through mid to late week will change by Friday into the weekend as the next monsoon surge arrives.

.SUNDAY . . .

Sky/weather......Mostly cloudy (60 percent) through 1100 then becoming cloudy (85-95 percent). Chance of rain showers and slight chance of thunderstorms in the morning, then rain showers with thunderstorms likely in the afternoon.

Max temperature....65-70.

Min humidity......37-42 percent.

Wind (20 ft)......Northwest wind 3 to 8 mph increasing to 7 to 12 mph by 1200. Gusty and erratic winds expected near thunderstorms.

Haines Index.....4 or low.

LAL.....1 until 1100, then 4.

Transport winds.....Northwest 10 mph.

CWR......70 percent.

.SUNDAY NIGHT...

Sky/weather......Mostly cloudy (55-65 percent) then becoming partly cloudy (40-50 percent).

Chance of showers and thunderstorms in the evening.

Min temperature....49-54.

Max humidity......66-71 percent.

Wind (20 ft)......Downvalley winds 5 to 8 mph. Gusty and erratic winds expected near thunderstorms.

Haines Index.....3 or very low.

LAL.....4 until 2300, then 1.

Transport winds....North 10 mph. CWR......10 percent.

.MONDAY . . .

Sky/weather.....Sunny (15-25 percent). Becoming partly sunny (65-75 percent) by 1200 with a chance of showers and thunderstorms in the afternoon.

Max temperature....71-76.

Min humidity.....24-29 percent.

Wind (20 ft)......Northwest winds 5 to 10 mph. Gusty and erratic winds expected near thunderstorms.

Haines Index.....5 or moderate.

LAL..... until 1200, then 3.

Transport winds.....Northwest 10 mph.

CWR......10 percent.

.FORECAST DAYS 3 THROUGH 7...

.TUESDAY . . .

Partly cloudy. Chance of showers and thunderstorms. Lows around 50. Highs in the mid 70s. North winds 5 mph.

.WEDNESDAY . . .

Mostly clear. Slight chance of showers and thunderstorms. Lows in the upper 40s. Highs in the mid 70s. Northwest winds 5 mph.

.THURSDAY...

Partly cloudy. Chance of showers and thunderstorms. Lows in the lower 50s. Highs in the mid 70s. Northwest winds 10 mph.

.FRIDAY...

Mostly cloudy. Chance of showers and thunderstorms. Lows in the lower 50s. Highs in the lower 70s.

. SATURDAY . . .

Partly cloudy. Chance of showers and thunderstorms. Lows in the lower 50s. Highs in the lower 70s.

FIRE BEHAVIOR FORE	CAST		
FORECAST NUMBER	16	TYPE OF FIRE	Wildfire
FIRE NAME	Quartz Ridge, Bear Creek	OPERATIONAL PERIOD	08/25-8/28/2023
DATE ISSUED	08/24/2023	TIME ISSUED	18:00
UNIT	CO-SJF	SIGNED	Cary Newman THSP

INPUTS

WEATHER SUMMARY:

Critical fire weather conditions are not expected over the four-day period. Humidities will remain above 30% and overnight recoveries will be good to excellent. Sunshine will provide for good instability and cloud cover each day with chances for isolated to scattered thundershowers. Winds will be generally light and less than 10 with gusts to 15-18.

See Fire Weather Forecast

FUELS SUMMARY:

Fuels in the fire area are composed primarily of timber with understory (mixed conifers with heavy litter and aspen stands). Heavy fuel concentrations of standing snags and large down dead are common in timbered areas. It is likely for fire to spread in concentrations of surface dead and down fuels which is promoting torching and spotting into receptive surface fuel beds. Aspen stands are currently retarding fire spread. Live surface fuels of grasses and forbs and brush are not promoting spread.

OUTPUTS

FIRE BEHAVIOR

General:

Fire activity on the Bear Creek or Quartz Ridge fires will be dependent on how much sunshine either fire receives on any given day. Relative humidities will remain high enough and winds will be light enough that rapid spread is not expected except on steep slopes where fuels are continuous and only after an extended period of sunshine. Periods of cloud cover in the afternoon will help to moderate fire activity. There remain chances for thunder showers each day and the potential for brief periods of isolated heavy rainfall. Days with the highest chances for rainfall are Saturday and Monday. Relative humidity recovery will be good to excellent overnight each night. Fire in concentrations of heavy fuels will continue to burn and may spread at a moderate rate with occasional isolated single or group tree torching. Spot fires may become established and spread at a slow rate. Spread will be slow to non-existent in areas with a high proportion of aspen and in aspen stands.

Specific:

Quartz Ridge

The RAWS in Quartz Meadow has not received measurable precipitation since 8/17. High humidities and cloud cover have kept fire activity subdued since 8/23. In the absence of cloud cover or rain fire activity will continue in concentrations of heavy fuels on the south side of the fire in Quartz Creek on either side of the creek. Expect the fire to be most active on Friday and Sunday as the chances of precipitation will be lowest on those days.

Bear Creek

The Bear Creek fire has received precipitation within the last few days and remains quiet with a few smokes visible. Recently the rainfall pattern has been for the Bear Creek fire to receive rain when the Quartz Ridge fire has not. If this pattern continues little fire activity is expected on the Bear Creek fire.

SAFETY

Situational Awareness is a continuous process that is best accomplished with group input. Invariably others will recognize factors that you may overlook, and communication will be key. Use all your available tools to gather information to increase yours and your crews' awareness.

SAFETY MESSAGE

Firefighter safety comes first on every fire, every time.

MAJOR HAZARDS

- ✓ Snags Snags, widow makers, and green trees weakened by fire are significant hazards.
- ✓ **Driving** Stay vigilant with heavy weekend traffic. Turn on headlights. Reduce speeds and drive defensively at all times.
- ✓ **Complacency** Stay in the game! Even though the fire is not active, we still have an important job to do. Understand the "why" of your assignment and stay engaged.

DEMOB!

Here are a few items to think about before you go....

- Ensure your replacement resources get a thorough briefing. Take the time to set them up for success.
- Give your vehicles a solid inspection or stop at ground support and have them look it over to ensure they are ready for the road. Check the tires, clean the windows, make any needed repairs.
- Organize your gear and clean out the passenger compartment. Any
 unsecured items in the cab can become dangerous projectiles in the event of
 an accident.
- Change drivers often to ensure the operator is alert and focused. If you are by yourself, stop, stretch and take frequent breaks, adhere to your agency policy.
- The transition back to your normal "day to day" can be difficult. Make an effort to get your mind right to return to your home life!
- For non fireline and off shift medical emergencies place a 911 call immediately to expedite transport and treatment.

Tom Lubas, Safety Officer 307-299-6645

The QR Code which is on the main IAP page has a link to helpful finance pages. These include:

- Electronic CTRs for Bear Creek, Mosca, and Quartz Ridge Fires
- USFS Only Excess Lodging Memo (to be included with your voucher when submitted if your lodging is over 150% per diem rate).

CTRs and Shift Tickets:

Scan and email SIGNED shift tickets and CTRs to:

2023.quartzridge.finance@firenet.gov

NOTE: If you only take a photo of your CTR or Shift Ticket, PLEASE make sure that it is legible. All phones do have a scanning app, I can show you how if you would like.

- 1) Does your shift ticket or CTR include:
 - a. Your name? The date? The fire you were working on? Your incident supervisor's signature (wet or electronic)?
 - b. Justification for excess hours and/or hazard/environmental pay?
 - c. Start and stop mileage and hours of work time (Shift Tickets)?

Incident Information:

Bear Creek Fire – CO-SJF-000570 – P2QJC4 (0213)

Quartz Ridge Fire - CO-SJF-000678 - P2QH39 (0213)

Mosca Fire - CO-SJF-000705 - P2EKU7 (0213)
