Spot Forecast for **Bear Creek**...USFS
National Weather Service Grand Junction CO

.DISCUSSION...Moisture will increase a bit on Wednesday and Thursday, with scattered showers and thunderstorms each afternoon. High pressure will shift eastward by the end of the week into the weekend, allowing a better plume of moisture to work its way across Utah and far western Colorado, increasing chances of showers and thunderstorms through the weekend. Main impacts Wednesday and Thursday with storms are gusty outflow winds, frequent lightning and brief heavy rain. Overall, winds are expected to be occasionally breezy and terrain driven.

```
. WEDNESDAY . . .
Sky/weather......Sunny (10-20 percent) then becoming partly sunny (50-60 percent).
                   Chance of showers and thunderstorms in the afternoon.
Max temperature.....73-78.
Min humidity......24-29 percent.
Wind (20 ft).......Downslope/downvalley 3 to 6 mph until 1000, then becoming upslope/
                   upvalley (south at ridgetops) 8 to 12 mph in the afternoon. Gusty
                   and erratic winds expected near thunderstorms in the afternoon.
Smoke dispersal.....Good.
Haines Index.....5 or moderate.
LAL.....1 until 1200, then 4.
Mixing height......4800 ft AGL increasing to 8600 ft AGL in the afternoon.
Transport winds.....West 10 mph.
.WEDNESDAY NIGHT...
Sky/weather......Mostly clear (15-25 percent).
Min temperature....49-54.
Max humidity......46-51 percent.
Wind (20 ft).......Northwest winds 8 to 12 mph in the early evening, then becoming
                   downslope/downvalley 3 to 6 mph after sunset and overnight.
Smoke dispersal....Poor (5000-37000 knot-ft).
Haines Index.....5 or moderate.
LAL.....1.
Mixing height......4600 ft AGL decreasing to 600 ft AGL overnight.
Transport winds.....West 10 mph.
.THURSDAY...
Sky/weather.....Sunny (20-30 percent). Slight chance of showers and thunderstorms
                   in the afternoon.
Max temperature.....73-78.
Min humidity......18-23 percent.
Wind (20 ft)......Downslope/downvalley 4 to 8 mph until 1000, then becoming upslope/
                   upvalley (southwest at ridgetops) 8 to 12 mph with gusts to 18 mph
                   in the afternoon. Gusty and erratic winds expected near
                   thunderstorms in the afternoon.
Smoke dispersal....Very good.
Haines Index..... or high.
LAL.....1 until 1200, then 3.
Mixing height......7400 ft AGL increasing to 10400 ft AGL in the afternoon.
Transport winds.....West 16 mph.
```

.FORECAST DAYS 3 THROUGH 5...

- .FRIDAY...Partly cloudy. Showers likely and chance of thunderstorms. Lows in the lower 50s. Highs in the lower 70s. West winds 10 mph.
- .SATURDAY...Mostly cloudy. Chance of showers and thunderstorms. Lows around 50. Highs around 70. West winds 10 mph.
- .SUNDAY...Mostly cloudy. Chance of showers and thunderstorms. Lows in the upper 40s. Highs in the upper 60s. West winds 10 mph.

Spot Forecast for **Quartz Ridge**...USFS National Weather Service Grand Junction CO

.DISCUSSION...

A subtle increase in moisture will lead to the risk of isolated to scattered showers and thunderstorms for Wednesday and Thursday. The main threats from any storm would be gusty outflow winds, lightning, and brief heavy rain. The fire location will be on the edge of a more substantial plume of monsoon moisture to end the week and start the weekend, which will keep the risk of showers and storms in the forecast.

.WEDNESDAY . . .

Sky/weather.....Becoming partly sunny (50-60 percent). Chance of showers and of showers and thunderstorms after 1200.

Max temperature.....75-80.

Min humidity......25-35 percent.

Wind (20 ft)......Downslope/downvalley winds 5 mph or less until 1000, then becoming upslope/upvalley (west at ridgetops) 5 to 10 mph with gusts to 15 mph in the afternoon. Gusty and erratic winds expected near showers and thunderstorms.

Haines Index.....5 or moderate.

LAL..... until 1200, then 3 until 1500, then 4.

Mixing height......Increasing to 7900 ft AGL by peak heating.

Transport winds.....West 10 mph.

.WEDNESDAY NIGHT...

Sky/weather...... A lingering shower or storm possible before 2000; otherwise, becoming mostly clear (15-25 percent) overnight.

Min temperature....42-47.

Max humidity......90-100 percent.

Wind (20 ft)......Winds become downslope/downvalley overnight and diminish to less than 5 mph.

Haines Index.....4 or low.

LAL.....4 until 1800, 2 until 2000, then 1.

Mixing height......Decreasing to 600 ft AGL overnight.

Transport winds.....West 10 mph.

. THURSDAY . . .

Sky/weather.....Becoming partly sunny (45-55 percent). Chance of showers and thunderstorms after 1200.

Max temperature.....75-80.

Min humidity......20-30 percent.

Wind (20 ft)......Downslope/downvalley winds 5 mph or less until 1000, then becoming upslope/upvalley (southwest at ridgetops) 5 to 10 mph with gusts to 15 mph in the afternoon. Gusty and erratic winds expected near showers and thunderstorms.

Haines Index......5 or moderate.

LAL..... 1 until 1200, then 3.

Mixing height......Increasing to 9400 ft AGL by peak heating.

Transport winds.....West 15 mph.

.FORECAST DAYS 3 THROUGH 5...

- .FRIDAY...Partly sunny. Chance of showers and thunderstorms. Lows in the mid to upper 40s. Highs in the mid 70s. Southwest winds 10 mph.
- .SATURDAY...Partly sunny. Chance of showers and thunderstorms. Lows in the upper 40s. Highs in the low 70s. Southwest winds 10 mph.
- .SUNDAY...Partly sunny. Chance of showers and thunderstorms. Lows in the upper 40s. Highs nearing 70. Southwest winds 10 mph.

FIRE BEHAVIOR FORECAST									
FORECAST NUMBER	19	TYPE OF FIRE	Wildfire						
FIRE NAME	Quartz Ridge, Bear Creek	OPERATIONAL PERIOD	08/30/2023						
DATE ISSUED	08/29/2023	TIME ISSUED	18:00						
UNIT	CO-SJF	SIGNED	Cary Newman THSP						

INPUTS

WEATHER SUMMARY:

Not much change to the forecast except a subtle increase in atmospheric moisture as the high pressure ridge begins to shift to the east ushering in moisture out of the southwest. There will be a better chance for isolated to scattered thunderstorms in the afternoon which could produce gusty outflow winds, lightning and brief isolated but intense rain showers. Temperatures will be up slightly possibly reaching into the lower 80s and relative humidities could still drop into the mid 20% range on the fires. Winds will be mostly terrain driven and west to southwest on the ridgetops less than 15 mph with gusty, erratic winds possible near any thunderstorms. Overnight humidity recoveries will still be good.

FUELS SUMMARY:

Fuels in the fire area are composed primarily of timber with understory (mixed conifers with heavy litter and aspen stands). Heavy fuel concentrations of standing snags and large down dead are common in timbered areas. It is likely for fire to spread in concentrations of surface dead and down fuels which is promoting torching and spotting into receptive surface fuel beds. Aspen stands are currently retarding fire spread. Live surface fuels of grasses, forbs and brush are still not promoting spread.

OUTPUTS

FIRE BEHAVIOR

General:

Again, not much change to the forecast except a slight increase in fire activity with sunshine and warmer temperatures before broken to complete cloud cover takes over in the afternoon. Fuels that have held heat in heavy concentrations of dead and down fuels have continued to smolder and spread minimally. With warmer temperatures and continued periods of sunshine expect that these remaining pockets of heat may flare up producing visible smoke columns and isolated single and group tree torching. Spot fires may become established in fuels that have dried due to sunshine. Gusty, erratic winds associated with localized thunderstorms my briefly increase fire activity and throw spot fires in any direction. Spread may become moderate in areas of closed timber but will continue to be retarded in aspen and areas of open timber with live surface fuels. Short crown runs are possible on steep slopes with heavy timber.

Specific:

Quartz Ridge

Infrared interpretation from NIROPS Aircraft 3 (AC3) at 0245 on 8/29 showed scattered heat on the south side of the fire on the east side of Quartz Creek near the trail. These pockets are in heavy timber and could flare up causing torching, spotting and possibly a short crown run up towards scabby fuels higher up the slope. AC3 also showed scattered heat on the west side of Quartz Creek north of where the fire crossed the creek on 8/21. This pocket could also flare up but it is unlikely that spread could continue to the east as there is a meadow on the east side of the creek. AC3 also showed areas of scattered heat near the northern most part of the fire but any spread to the east or northeast from these areas would be into large aspen stands which would effectively halt spread.

Bear Creek

AC3 also showed points of isolated heat along the ridge between Bear Creek and Shaw Creek which could flare up and produce spot fires downslope into Shaw Creek. Spread would be moderate at best from the fire edge and any spot fires produced due to scattered aspen stands. AC3 also indicated some pockets of isolated heat on the ridge above Weminuche Valley and slightly downslope but spread from these points would also be moderate at best.

SAFETY MESSAGE

MAJOR HAZARDS

Overhead Hazards — Snags and widow makers are a priority hazard. Review in the IRPG.

Increased Recreational Traffic- Utv traffic is heavy on dirt roads. Drive Defensively! Hunting season is opening soon, so be aware of people, pack animals, etc off the roads. Be alert of ongoing road construction.

Weather- Remain vigilant of changing weather conditions.

- Ensure your replacement resources get a thorough briefing. Take the time to set them up for success.
- Make sure your radios are cloned and the communications plan is reviewed.
- Ensure your vehicles and personal items are secured. Visible valuables are a magnet for theft.
- When felling trees please review Procedural Felling Operations in the IRPG.
- As this incident continues to evolve, make sure to manage fatigue. Hydrate, eat, and insure that you are getting enough rest. Pace yourself and take rest breaks as needed!
- Remember your physical and mental health is most important. Take care of each other as well as yourself.

Thank you personally for all of your efforts keeping this incident safe! Tom Lubas, Safety 307-299-6645

Incident Finance Information

OR Code for all Finance Forms/Information

The QR Code which is on the main IAP page has a link to helpful finance pages. These include:

- Electronic CTRs for Bear Creek, Mosca, and Quartz Ridge Fires
- USFS Only Excess Lodging Memo (to be included with your voucher when submitted if your lodging is over 150% per diem rate).

CTRs and Shift Tickets:

Scan and email SIGNED shift tickets and CTRs to:

2023.quartzridge.finance@firenet.gov

NOTE: If you only take a photo of your CTR or Shift Ticket, PLEASE make sure that it is legible. All phones do have a scanning app, I can show you how if you would like.

- 1) Does your shift ticket or CTR include:
 - a. Your name? The date? The fire you were working on? Your incident supervisor's signature (wet or electronic)?
 - b. Justification for excess hours and/or hazard/environmental pay?
 - c. Start and stop mileage and hours of work time (Shift Tickets)?

Incident Information:

Bear Creek Fire - CO-SJF-000570 - P2QJC4 (0213)

Quartz Ridge Fire - CO-SJF-000678 - P2QH39 (0213)

Mosca Fire - CO-SJF-000705 - P2EKU7 (0213)

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

•	CONTACT	COMMUN	ICATIONS	/ DISPATCH	(Verify correct	frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a R Meadow Medical, IC is TFLD Jones. E			Requesting air ambulance to	Forest Road 1 at (Lat./Long.) This will be the Trout		
Severity of Emergency / Transpo Priority	Ex: Unconscious YELLOW / PRICE Ex: Significant tra	, difficulty breathing, bleeding	severely, 2º – 3º burns more to illness. Evacuation ma burns not more than 1-3 palms			
Nature of Injury or Illness & Mechanism of Injury				Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)		
Evacuation Request				Air Ambulance / Short Haul/Hoist Ground Ambulance / Other		
Patient Location				Descriptive Location & Lat. / Long. (WGS84)		
Incident Name				Geographic Name + Medical (Ex: Trout Meadow Medical)		
On-Scene Incident Commande				Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)		
Patient Care				Name of Care Provider (Ex: EMT Smith)		
3. INITIAL PATIENT ASSESSME	NT: Complete this section	for each patient as applicable (s	tart with the most severe patient)		
Patient Assessment: See IRPG	PAGE 106					
Treatment:						
4. EVACUATION PLAN:						
Evacuation Location (if different):	(Descriptive Location (drop point, intersection, et	c.) or Lat. / Long.) Patien	t's ETA to Evacuation Location:		
Helispot / Extraction Site Size and	Hazards:					
5. ADDITIONAL RESOURCES / E	OUIDMENT NEEDS.					
Example: Paramedic/EMT, crews, imi		oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheel	led litter, HAZMAT, extrication		
6. COMMUNICATIONS: Identify	State Air/Ground EMS	S Frequencies and Hospi	tal Contacts as applical	ole		
Function Channel Name/I	Number Receive	e (RX) Tone/NAC	* Transmit (TX)	Tone/NAC *		
COMMAND						
AIR-TO-GRND						
TACTICAL						
7. CONTINGENCY: Consideration	<u>s:</u> If primary options fai	l, what actions can be imple	mented in conjunction with	primary evacuation method? Be thinking ahead		
B. ADDITIONAL INFORMATION: Updates/Changes, etc.						
REMEMBER: Confirm ETAs o	f resources ordered.	Act according to your le	vel of training. Be Alert.	Keep Calm. Think Clearly. Act Decisively.
