#### Fire Weather Forecast

FORECAST NO: 26

PREDICTION FOR: Friday SHIFT DATE: 9/29/2023

**FORECAST ISSUED:** 1700 9/28/2023

**INCIDENT:** Bear Creek

UNIT: San Juan National Forest

Incident Meteorologist: Jon Pelton/Brandon Wills (T)

Weather Discussion: An upper level ridge will continue to shift south and east today as an upper level trough moves into the western U.S. This will lead to an increase in winds and gusts today. The gustiness continues over the weekend, peaking on Sunday, as upper level disturbances and a cold front cross the area. Otherwise, expect another warm and dry day today, before temperatures gradually trend cooler and humidity gradually increases. Humidity recoveries should be below 50% again tonight for thermal belt and mid slope locations.

#### **TALKING POINTS**

All firefighters are public information officers when they are out in the community. Please share the following stats and talking points if you are asked questions by the public.

#### **Quartz Ridge Stats**

Start: Lightning started on August 5, 2023

Location: approximately 3 miles into the South San Juan Wilderness, 13 miles northeast of Pagosa Springs Acres: 2850

Rainfall since Sept. 10: 2.26"

#### **Bear Creek Stats**

Start: Lightning started on July 31, 2023

Location: approximately 2.5 miles west of the Weminuche Valley Acres: 1093

Rainfall since Sept. 10: 2.64"

- Firefighters are still actively engaged in monitoring both fires and will take action where/when needed and safe to do so.
- The fires are expected to produce smoke during dry and/or windy periods for the foreseeable future. Affected
  communities should remain aware of smoke advisories and conditions. For the latest air quality visit,
  <a href="https://www.airnow.gov/?city=Arboles&state=CO&country=USA">https://www.airnow.gov/?city=Arboles&state=CO&country=USA</a>
- The precipitation has been beneficial in slowing fire activity, but the fires are NOT out! Fire activity can and will quickly increase when the sun and/or wind dry out the fine fuels.
- Know before you go: check local fire restrictions before you leave and be aware of active fire closures. For the most up to date closure information visit the San Juan National Forest website and review "Alerts and Warnings"
- As conditions permit, prescribed fires are taking place around the forest. Units on the Pagosa and Columbine Districts have been burnt over the last couple days and will likely produce smoke though the week. Visit the San Juan National Forest Facebook or INCIWEB page for the latest prescribed fire activity.
