INCIDENT OBJECTIVES (ICS 202)

1. Incident Name:	2. Operational Period:	
LOWLINE	Date/Time From: 08/01/2023 0700 TUE	Date/Time To: 08/01/2023 2100 TUE
3. Objective(s):		
<p>OBJECTIVES FOR FIREFIGHTER AND PUBLIC SAFETY Safety of Firefighters and the public will be the highest priority throughout all phases of the incident. Manage the risk to fire fighters and the public by utilizing a risk-based approach to decision making. Ensure quality tradeoff conversations occur with Agency Administrators, partners, and stakeholders.</p> <p>OBJECTIVES FOR PROTECTION OF VALUES AT RISK Utilize appropriate fire strategies to minimize fire impacts on residences, commercial properties, critical community infrastructure to reduce the potential for adverse health, social, financial, and economic hardships. These include:</p> <ul style="list-style-type: none"> • Structures within the planning area including but not limited to Wilderness Streams, isolated ranches and private properties along CR730, Mill Creek, and Eagle Ridge Ranch. • Critical Gunnison Sage Grouse Habitat • Critical water infrastructure resources (reservoirs, dams, ditches) • Cultural and historical resources including but not limited to Castle Creek Cow Camp • Agricultural and Ranching Operations • Antelope Timber Sale <p>OBJECTIVES FOR INFORMATION AND RELATIONSHIPS Maintain and enhance relationships with cooperators, stakeholders, the local community and adjoining agencies through effective and timely communication, engagement and information sharing. Consider operational strategies that minimize the impact of smoke to sensitive areas and receptors by adjusting tactics, monitoring smoke impacts, and following guidance in state smoke management plans and coordinating with state and local Air Quality Control Commission.</p>		
4. Operational Period Command Emphasis:		
<ol style="list-style-type: none"> 1. Manage risk to firefighters by ensuring hazards are identified, assessed, and where possible mitigated. Be prepared to accept residual risk when values threatened warrant it and the probability of achieving objectives is high. 2. Utilize strategies and tactics that commit responders only to operations where and when they can be successful, and under conditions where important values at risk are protected with the least exposure necessary. 3. Contain and control portions of the fire that are a threat to identified values to be protected. 4. Mop-up to the extent necessary to prevent escape of the fire and additional spread or damage to other values within the perimeter. 5. Implement practices that reduce the potential for spread of infectious disease, such as distributed operations, adhering to CDC guidelines and other actions that improve the health environment for firefighters and support personnel. 		
General Situational Awareness:		
<ol style="list-style-type: none"> 1. Complete a good size up of your work area to mitigate hazards. 2. Be prepared for changing weather conditions. 3. Minimize firefighter exposure to falling tree hazards. 4. Know who you are working for.

INCIDENT Weather Forecast

Forecast No: 5
 Prediction For: Tuesday
 Shift Date: August 01, 2023
 Forecast Issued: July 31, 2023 at 1800

Name of Incident: Lowline

Discussion: Persistent moisture will lead to higher RHs and better chances for moderate precipitation (including thunderstorms) over the area again today. High temperatures continue their downward trend. Given the moist surface conditions, outflow winds are not expected to weaker than previous days. Too, expect mainly light, terrain-driven winds outside of any showers / storms. Best chances for thunderstorm activity will occur between 1200-1600.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 005

TYPE OF FIRE: Wildland

FIRE NAME: Lowline Fire

OPERATIONAL PERIOD: August 01,2023

DATE ISSUED: 07/31/2023

TIME ISSUED:

Fire Name: Lowline Fire

UNIT: CO-GMF

INPUTS

WEATHER SUMMARY:

Slightly cooler temperatures are forecasted. Afternoon thunderstorm activity is expected. Storms will bring greater chance for wetting rain and outflow winds similar in strength as the last couple of days. Good humidity recovery will occur after overnight near 100% and daytime RH expected to be over 50%.

Warmer and drier conditions are expected to return in 3 to 4 days.

FUELS SUMMARY:

Fuels in the fire area are composed of timber with understory (mixed conifers with litter and reprod), as well as grass with shrubs (perennial grasses mixed with brush). Heavy fuel concentrations are common in timbered areas and will likely contribute to fire spread by allowing surface fire climb into crowns, be receptive to fire brands, increase spotting potential, and become rolling material on steep slopes.

Live surface fuels of grass and sage are in green up conditions, have high fuel moisture content, are not available to burn with intensity, and will prohibit fire spread.

OUTPUTS

FIRE BEHAVIOR

GENERAL:

With more moisture in the atmosphere fine fuels are expected to increase in fuel moisture content. Fire behavior is expected to decrease. Fire rates of spread, spread potential, and spotting distance will be limited. Bigger heavier fuels will continue to hold heat.

Fire behavior will be limited from timing of drying of fuels, inversion lifting, ventilation of smoke, and shade from cloud cover. Expect fuels, ventilation, and weather favorable to support fire activity late morning and early noon.

Local fire danger indices are trending above average, but values are expected to trend downward with forecasted weather the next couple of days.

SPECIFIC:

Perimeter of fire, expect smoldering and creeping fire, possibility for a torching tree. Areas sheltered from precipitation or with consistent terrain driven winds that keep fine fuels dry, expect flanking, backing and moderate surface fire. Where available fuels, topography, and wind align short runs with short range spotting.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Lowline

DATE: 8/1/23

Shift: Day and Night

Normalization of deviance: What have you normalized on the Lowline Fire

Often when operating in conditions of stress and consequence with limited time. There is an urgency and a feeling of pressure to perform quickly, and we can shortcut our best practices. In some cases, we rationalize that we **SHOULD** shortcut our safety best practices. I know that throughout my career, under certain conditions, I have taken shortcuts and rationalized doing so by saying to myself: *"There's no time to waste and if I waste time the incident will get worse."* So, I took shortcuts.

After shortcuts have been taken and we were "successful" we have been rewarded. The brain remembers the shortcuts taken to achieve the "successful outcome" and the brain is compelled to take these shortcuts again. After we have several successes from while taking shortcuts, we can let our guard down to the established best practices. Every "successful outcome" derived from shortcuts is now becoming part of our long-term memory, but the successes were based on luck, not skill.

Now that we have rationalized our need to take shortcuts, reinforced with "successful outcomes", the shortcut has now become the new behavior, or deviation from the existing standard. Over time, deviant behavior can become the new normal. This drift into failure can be slow, sometimes taking years or even decades for the new normal to become entrenched.

Too often deviations that are drifting toward failure often cannot be seen. Often people and organizations that have established a new normal due to shortcuts and deviation are deep in denial that anything is wrong. They defend their actions, close calls, near misses and casualty events by rationalizing that this as a dangerous profession and responders are just going to get hurt and killed sometimes.

What are normalizing on the Lowline Fire, how far have you deviated from the first day you were on shift, are you now accepting unnecessary risk? When a failure occurs due to normalization what will be the impact of that failure?

- Increased driving speed due to same travel route
- Not observing existing and new hazards due to the same piece of line
- Not having a lookout due to lack of fire behavior
- Shortened or vague briefings due to Groundhog Day (same ol' S#!T, different day)
- Operating with known equipment failures (dirty windshield, dull chainsaw, etc.), due not wanting down time
- Not taking weather on regular intervals due to constant rain
- Moving further into the timber that contains snags

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.					
FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.					
Use the following items to communicate situation to communications/dispatch.					
1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) <i>Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."</i>					
2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. <i>Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."</i>					
Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2^o - 3^o burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2^o - 3^o burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
