INCIDENT: Bear Creek
 UNIT: San Juan National Forest
Brandon Wills
 Incident Meteorologist: *Brandon Wills*

Weather Discussion: An upper level trough will move into and across the western U.S. through the middle of next week. This will lead to an increase in humidity, winds and gusts today. The gustiness will continue over the weekend and into Monday, as upper level disturbances and a cold front cross the area that also will lead to scattered showers and storms at times. There will also be a good chance of wetting rain over the weekend.

TALKING POINTS

All firefighters are public information officers when they are out in the community. Please share the following stats and talking points if you are asked questions by the public.

Quartz Ridge Stats

Start: Lightning started on August 5, 2023

Location: approximately 3 miles into the South San Juan Wilderness, 13 miles northeast of Pagosa Springs Acres: 2850

Rainfall since Sept. 10: 2.26"

Bear Creek Stats

Start: Lightning started on July 31, 2023

Location: approximately 2.5 miles west of the Weminuche Valley Acres: 1093

Rainfall since Sept. 10: 2.64"

- Firefighters are still actively engaged in monitoring both fires and will take action where/when needed and safe to do so.
- The fires are expected to produce smoke during dry and/or windy periods for the foreseeable future. Affected communities should remain aware of smoke advisories and conditions. For the latest air quality visit, <https://www.airnow.gov/?city=Arboles&state=CO&country=USA>
- The precipitation has been beneficial in slowing fire activity, but the fires are NOT out! Fire activity can and will quickly increase when the sun and/or wind dry out the fine fuels.
- Know before you go: check local fire restrictions before you leave and be aware of active fire closures. For the most up to date closure information visit the San Juan National Forest website and review "Alerts and Warnings"
- As conditions permit, prescribed fires are taking place around the forest. Units on the Pagosa and Columbine Districts have been burnt over the last couple days and will likely produce smoke though the week. Visit the San Juan National Forest Facebook or INCIWEB page for the latest prescribed fire activity.

If you have photos or videos you'd like to share to help us tell the story of the fire and help the public understand what you're doing on the line, please email them with the date the photo was taken, where and by whom... 2023.QuartzRidge@firenet.gov or 2023.BearCreek@firenet.gov
