Date and Time Products Delivered to Incident:		Digital files sent to: https://ftp.wildfire.gov/public/incident_specific_data/	
Comments /notes on tonight's mission and this interpretation: I began mapping from the most recent perimeter in NIFS. There was some heat perimeter expansion (34 acres) since the previous IR flight on November 4, 2023. There were a few small intense heat pockets in the expansion zones. There was interior scattered heat as well as some interior isolated heat.
