Operational Period:

SAFETY MESSAGE

SAFETY IS OUR FIRST PRIORITY

Fire fighter safety comes first on every fire, every time

LCES FIRE FIGHTERS CODE OF CONDUCT IRPE WORK-REST GUIDELINES

SAFETY THOUGHT

As you walk through the forest, it is not the large trees that trip you up. It's the roots and the underbrush. Don't get complacent about hazards just because you are not facing a 100-foot flame-length.

"WATCH OUT" FOR COMPLACENCY

- Fire activity has slowed considerably. Ward off boredom and complacency.
- Take care of personal health conditions. See the medics for blisters, allergies, and colds.
- Clearly understand assignment and be accountable for meeting determined objectives.
- Review the 10 standard fire fighting orders and 18 "watch out" situations.
- Communicate identified hazards to others.
- Enjoy your work, but avoid horseplay. Display an appropriate sense of humor.

DRIVE CAREFULLY

Showers with possible gusty winds and lightning are predicted for today. Here are some things to remember:

- Winds associated with the cold front have the potential to create hazardous snag conditions.
- When winds hit, get into a safe area and suspend work activities until hazardous conditions pass or come off the line.
- Watch for slippery walking conditions. The steep slopes in the fire area become slippery. Go slow and use extra caution.
- Pace yourselves when working and/or walking in steep terrain. Watch out for each other.
- Keep dry. Be alert for hypothermia.
- Wet conditions will also make roads slick. Go slow. Keep headlights on. Clean windshields.
