37. Strategic Objectives (define planned end-state for incident):

Provide for firefighter and public safety through the development of tactical operations that are commensurate with the values at risk, have a high probability of success and use the appropriate number and types of resources necessary to successfully accomplish the mission.

Implement fire suppression strategies that steer fire activity toward natural or constructed barriers, or into areas with more favorable fuel conditions, to reduce threats to private land, communities, critical infrastructure, watershed, and other essential values.

Utilize cost containment principles by managing costs commensurate with values at risk.

Foster strong relationships among agencies, governmental bodies, and firefighting organizations by promoting transparency, consistent communication, and collaborative decision-making.

Restore fire lines, dozer lines, handlines, and drop points to reduce erosion and visual impacts.

Ensure the safe, efficient, and timely release of personnel, equipment and other incident resources.
