.DISCUSSION...

A few showers and embedded thunderstorms will be around until around 10 pm before mostly ending for the west of the night. The gusty west wind should end by around 10 pm as showers and storms come to an end after 10 pm with largely light and terrain driven wind following that for the rest of the night. The weather tomorrow looks somewhat similar to Saturday, although wind may be lighter by 2 to 4 mph. There will be around a 1 in 4 chance of a shower or thunderstorm after 1200, with the best chance between 1400 and 1900. The main threat will be wind gusts over 40 mph, with little to no chance of wetting rain. ICS 220 WF Air Operations Summary Instructions

Purpose: The Air Operations Summary (ICS 220 WF) provides the Air Operations Branch with the number, type, location, and specific assignments of helicopters and air resources.

Preparation: The ICS 220 WF is completed by the Operations Section Chief or the Air Operations Branch Director during each planning meeting. General air resources assignment information is obtained from the Operational Planning Worksheet (ICS 215), which also is completed during each planning meeting. Specific designators of the air resources assigned to the incident are provided by the Air and Fixed Wing Support Groups. If aviation assets would be used for extraction or medevac operations, ensure alignment and consistency with the Medical Unit Leader between the ICS 220 WF and the Medical Plan (ICS 206 WF).

Distribution: After the ICS 220 WF is completed by Air Operations personnel, the form is given to the Air Support Group Supervisor and Fixed-Wing Coordinator personnel. These personnel complete the form by indicating the designators of the helicopters and fixed-wing aircraft assigned missions during the specified operational period. This information is provided to Air Operations personnel who, in turn, give the information to the Resources Unit.

Note: If additional pages are needed for any form page, use a blank ICS 220 WF and add the required information.
