Report all injuries to Division Supervisors. Division Supervisors will notify line Safety Officer of the type of injury/illness and exact location. Line Safety Officer will contact the Incident Safety Officer and Medical Unit Leader to provide information or advice of further care. **Do not use the injured person's name on the radio.** Communications network will be clear of all traffic until the medical emergency is finished. If an air medical helicopter is used, Division Supervisor will notify the Air Operations Director.

MEDL will work with Division Supervisors and Safety on area parameters for mobile unit(s).

MEDL Shanna Ellis Cell 318-229-6515 or Holiday Inn Room 203. (Day or night)

Air resources will be coordinated by MEDL/Safety/Air Ops. (S58T Type II Helicopter, Tail #129NH has been identified as medivac capable air transport if needed).

■ WEATHER FORECAST (Issued 5/22/08 1700)

Forecast #7 5/23/2008 DAY

Mustang Corner Everglades National Park

John Pendergrast/Joel Rothfuss (T)- Incident Meteorologist

<u>WEATHER DISCUSSION:</u> A weak ridge of high pressure will be over south central Florida. An east coast sea breeze will move across the area Friday.

The main concerns are:

- 1. Locally heavy rains.
- 2. Lightning strikes possible.

WEATHER FORECAST DAY (Night):

Southeast winds with a 50 % chance of thunderstorms

GENERAL: Partly cloudy. Chance of late morning and early afternoon showers and thunderstorms. (*Partly Cloudy. Slight chance of evening showers.*)

TEMPERATURES: 90 (68-70) **HUMIDITY**: Minimum humidity 50% (Maximum 97-100%)

24 HOUR TREND: 1 to3 lower 24 HOUR TREND: 5 to 8 higher

20 FT WINDS: South southeast 2 to 4 mph becoming southeast 10 to 15 mph. (Southeast 2 to 4 mph.) **STABILITY/INVERSION:** Inversion around 500 ft dissipating by 1000. Mixing heights around 5400 ft. Dispersion index 52. Haines Index 4. (Inversion around 700 ft developing after 2300. Dispersion index 3.)

OUTLOOK FOR FRIDAY

Partly cloudy. Chance of showers and thunderstorms. High temperatures around 90.. Minimum RH values around 50 percent. Light west to southwest winds 3 to 5 mph becoming east 10 to 15 mph. Chance of rain 40 percent.

EXTENDED FORECAST:

<u>SUNDAY</u> Partly cloudy. chance of showers and thunderstorms. Highs 85 to 88. Winds NE 10 to 15 mph.

MONDAY Partly cloudy. Highs in the mid 80's. Winds NE 10 to 15 mph.

TUESDAY Partly cloudy. Highs in the upper 80's. Winds East 10 to 15 mph.

WEDNESDAY Partly cloudy. Highs in the upper 80's. Winds East 10 to 15 mph.

□ FIRE BEHAVIOR (Issued 5/22/08 1900)

Jon Wallace (T)- FBAN

Mustang Corner Everglades National Park

Forecast #7 5/23/2008 DAY

General: Fire activity will be minimal on the Mustang Corner fire today.

Specific.

Division A, B and Z: Fire will continue to smolder in hammocks and could move out of these areas and into grass fuels. Flame lengths and rates of spread in hammocks will be minimal due to extensive mop-up which has already taken place.

Initial Attack: With an LAL (Lightning Activity Level) of 3, lightning strikes may start initial attack fires. When fire burns in Grass fuels expect rates of spread up to 120 chains per hour with fires moving to the north-northeast with the prevailing wind. If fire enters melaleuca areas expect spotting of up to 0.3 miles. Fire in dense melaleuca stands will move quickly into the crowns and produce prolific spots.

It is important to remember that in south Florida fire often burns across the top of water when sawgrass is present. Just because you see water under the grass, don't assume the fire is going to stop.

Heavy fuels (treated exotic species) will burn readily with 1000 hour dead fuel moistures of 14%.

Spread Rates/Spotting/Flame lengths: Grasses: Rates of spread: Heads (50-130 ch) Flanks (9-15) and Backing (4). Flame lengths: Heads (10-20') Flanks (4-6') and Backing (<4'). Hammocks: these will burn slowly with low flame lengths pre-treating upper branches, which can then torch out with flame lengths of 5-10' above the brush. Spotting up to 0.3 of a mile is possible. POI: 50%

Air operations: Inversion will be in place until around 0930-1000 hours.

Pocket Card Thresholds: Temperature: >85 degrees, RH < 40%, 20' winds >12 mph, KBDI > 650, Dispersion Index

> 70

TAILGATE BRIEFING SHEET 2 OF 2

☐ FIRE BEHAVIOR - CONTINUED (Issued 5/22/08 1900)

Mustang Corner Everglades National Park

Jon Wallace (T) - FBAN Forecast #6 5/23/2008 DAY

Safety:

Don't underestimate potential fire behavior where you are working. Fires in light flashy fuels, like sawgrass, are one of the common denominators of tragedy fires.

When performing initial attack re-assess escape routes and safety zones continuously throughout the day.

Fire has the potential to spot out of hammocks and into grass fuels again. With the high forecast winds any fire in sawgrass will move rapidly.

□SAFETY MESSAGE

Glen Stapleton, Dave Benavitch, Mickey Bunton - Safety Officers

Mustang Corner Everglades National Park

5/23/2008 DAY

Major Hazards and Risks:

- *Hazardous plants
- *Hot weather conditions
- *Driving

Narrative:

There are still firefighters not drinking enough water. You need to take in fluids before, during and after work. Your body is working extremely hard to keep up with the hot conditions out on the fire line. Give it all the help you can.

The occurrence of poison wood cases is increasing. The best prevention is to exchange nomex and/or turn your clothes in to supply for laundry service to remove the oils from clothing.

Drive defensively and plan for the unexpected. Don't use your cell phone while driving, your attention is divided and driving safely demands all your attention. If you must take the call, pull off the road and stop.

Three of the four common denominators of fire behavior on tragedy fires apply to the Mustang Corner fire...1. Working on relatively small fires or deceptively quiet areas of large fires. 2. Working in relatively light fuels, such as grass, herbs and light brush. 3. Fires respond quickly to shifts in wind direction or wind speed.

YOUR safety is our NUMBER ONE goal.

□DEMOBILIZATION

Lisa Miller - Demob

Mustang Corner Everglades National Park

5/23/2008 DAY

All demobing line resources will begin demobilization at Homestead Airport. The demobilization sheet may be picked up from SUPPLY. After SUPPLY and GROUND SUPPORT sign then report to the Holiday Inn Express for the remaining signatures prior to leaving the incident.
