HEALTH AND SAFETY MESSAGE

INCIDENT: Hidden Pines Fire

DATE: October 17, 2015

TIME: Day/Night Shift

Major Hazards and Risks:

Driving
Snags
Down Powerlines
Hydration
Working with Air Resources

Driving – This is the number one activity that exposes us to risk on a daily basis. Even if we are only driving from our lodging and daily worksite. Minimize distractions, drive defensively, slow down, use spotters, use lights and seatbelts when the vehicle is moving, and expect the unexpected to happen.

Snags – Previous burns and drought conditions have created a large number of snags within the burn area. When working with hazard trees refer to the IRGP page 23 for control measures.

Down Powerlines – Assume all powerlines are live and report up the chain of command.

Hydration – The temperatures will be climbing and humidity is decreasing as well. The recommended amount of fluids to drink is one quart per hour. Water is the best choice and you should begin to hydrate before you feel thirsty. If you are not familiar with the signs of heat related injuries review page 103 in your IRPG.

Working with Air Resources – Always have good communications between you and the aircraft. Maintain good situational awareness when aircraft are working in your division.

Practice the ABCs of Safety

Always
Be
Careful

Response checklist

Who takes charge?

- DIVS or designated Overhead manages the overall scene and evacuation process.
- Line Safety and any line medical personnel is contacted.
- DIVS or designee will contact DPS Command Post Communication.
- Medical personnel and emergency responders manage patients and conduct rescues.
- OPS and IC make command decisions so the emergency can be given full attention and management. They continue to manage ongoing incident operations.

Response sequence:

- First, secure the scene and protect responders and patients from further injury.
- Clear the Command channel for "Emergency Traffic only" if this is a critical emergency. If not, inform Communications of non-critical-emergency status and use normal communications.
- Contact closest Medical personnel and DIVS or designated Overhead for response.
- Notify Communications to initiate Accident Action Plan response.
- Communications will contact MEDL and SOF1.
- **Medical Unit Leader and SOF1 to determine if this is a critical emergency and what type of transport to recommend.**

Information for Communications: (See Medical Incident Report, page 108, IRPG)

- Type and extent of injuries?
- Airway or breathing problems? Serious bleeding?
- Is an EMT present or needed? Are Paramedics (Advanced Life Support) needed?
- Specific location of patients (Lat/Long, access route, DP#, helicopter Landing Zone)?
- What type of transport is needed? Helicopter medevac, hoist, ambulance or ground transport?
- Name of contact person in charge of the scene.
- Do not use names of patients at any time.
