RED FLAG WARNING

FOR THE ROCK MOUNTAIN FIRE

A Red Flag Warning is in effect from 1000 to 2200 EST.

A cold front will cross the incident area this morning resulting in a wind shift from southwest to northwest between 0800 and 1000. Strong winds will develop with the passage of this front, and then continue into Sunday. Sustained winds of 20 mph, with frequent gusts of 30 mph can be expected, especially along the upper slopes and ridge crests. Humidity as low as 25 percent can be expected this afternoon coupled with the exceptionally dry fuels.

Impact... High Potential for Extreme Fire Behavior with high rates of spread and fire growth for uncontrolled fireline.

WEATHER DISCUSSION:

... Red Flag Warning 10AM – 10PM...
...For Wind...Low Humidity...Extremely Dry Fuels...
...Noticeably Colder Tonight and Sunday...

Today will be a day of change. A dry cold front will sweep through the area this morning. Strong northwest winds will develop and persist through Sunday. The airmass behind this front is very dry and cold; no moisture recovery. The combination of wind, low humidity, and extremely dry fuels will be favorable for extreme fire behavior. Temperatures will fall throughout the day with wind chills in the 20s tonight, and into the teens by Sunday night.

WEATHER FORECAST FOR: (SATURDAY) ...RED FLAG WARNING...

INPUTS

WEATHER SUMMARY: *** See Fire Weather Forecast for Details ***
RED FLAG WARNING for winds, low humidity and extremely dry fuels. **DRY COLD FRONT PASSAGE** this morning. **WINDS WILL SHIFT** from out of the SW to NW and increase in speed and gustiness. A very dry airmass will result in lower humidity after the front passes. Much cooler temperatures are expected.
Day Shift: High temps: mid 50's, Low RH: 24% Ridge winds becoming NW 15-20 gusts 30.
Night Shift: Low temps: 30, RH recovery 50%. Ridge winds NW 10-15 gusts 20.
FIRE DANGER: Exceptional to extreme drought with record ERCs (above 99th percentile). The Ketch-Byram Drought Index (KBDI) values are in the 725-750 range (on a scale of 0-800) indicating much rainfall is needed to return the soil moisture (and fuels) to more seasonal conditions.
FUELS: The primary carrier of fire is hardwood leaf litter on the surface (FM9/TU3) with some brush components (rhododendron/mountain laurel). Brush at higher elevations may become available to burn on steep slopes or with exposure to higher winds. Leaf off is 40% to 90% complete, increasing with elevation. New leaf off will add surface fuel load over burned areas and firelines and increase re-burn or slop-over potential. 1000-hour fuels are at 13%, well below average. Log bridges over creeks will burn and allow potential for fire to cross. Winds will redistribute leaf litter reducing in some areas and increasing in others; think transient fuels.
TOPOGRAPHY: Steep/rugged, 40+% slope.

OUTPUTS

FIRE BEHAVIOR

GENERAL: Fire spread is typically a long line of fuels and slope driven surface fire in the leaf litter with 2-5 foot flame lengths. Leaf litter and/or brush may generate short runs with 8-10 foot flame lengths with ROS 20-50 ch/hr where slope and winds align. Fire is consuming well into the duff layer and the 1000-hour fuels completely. Single tree torching, should it occur, will be in conifer species and may spot up to 8 chains (0.1 mile) but, usually much less. The burn period is expected to be 20-24 hours long. Conditions are marginal for burnout operations due to winds and transient fuels. Winds will increase tree fall. Expect any new ignitions to spread rapidly.

| Fuel Model | ROS (ch/hr) | | Flame Length (feet) | | PIG | Spotting Dist. |
|--|-------------|---------|---------------------|---------|-----|----------------|
| | Head | Backing | Head | Backing | | |
| FM09-Timber Litter Hardwood Leaf Litter | 15-30 | 1-2 | 4-8 | 1-2 | 50% | < 0.1 miles |

Fire behavior predictions are for the hottest and driest period of the day.

SPECIFIC: Branch I:

ALL DIVISIONS – Fire has held on these divisions for several days. Large interior fuels continue to burn out. As winds increase, leaf fall, leaf litter movement, and tree fall could compromise firelines where heat still exists. **EXPECT** these divisions to be test by the winds!

Branch II:

Div M,N,P - Spread continuing north toward Fairfield ridge and the AT. Expect increases in rates of spread and flame lengths as winds increase and shift from SW to NW. Leaf off at this elevation is further advanced which means deeper fuels on the ground and less sheltering from wind. Leaf litter and/or brush may produce short, intense runs where slope and winds align. Burn out conditions will be marginal due to winds and transient fuels. **EXPECT** burned out lines to be tested by the winds!

Div R/W - Fire spread continues north and east toward Coleman Gap and the fireline up to the gap. Expect similar conditions as described in Div M,N, and P (above).

Burrell Fire - Firelines will be tested by the winds.

AIR OPERATIONS: Turbulence may be an issue as winds increase.

SAFETY

WATCH OUT #15 – Wind increases and changes direction. Maintain keen situational awareness as today and tonight have the potential for rapidly changing conditions.

HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Rock Mountain Fire

DATE: 11/19/2016

Operational: Period: Day/Night

Major Hazards and Risks: Cold Front Passage, Wind Shift and Strong Winds, Hazard trees, and Blow down. Increase Fire Behavior. Go over the disengagement plan with your resources in case it is needed. Maintain comms with everyone on your crew and Division. Look out for each other. Ensure everyone is accounted for. Give yourselves plenty of time to move out of the area. Travel is very slow and difficult, start out early..... When you re-engage, send a saw team to check the roads. Bucking blow down is dangerous, take time to check the bind. Take Care

Fire Order of the Day – Determine safety zones and escape routes – make them known

Narrative: Pay attention to the weather ops. Take your own weather and announced to everyone on Division. Use Lookouts. Ensure you have good comms and listen for weather updates.

Watch Out Situation of the Day

- **The 10 Standard FIRE ORDERS.**
- **The 18 SITUATIONS that SHOUT WATCHOUT.**
- **The Common DENOMINATORS of Fire Behavior on TRAGEDY FIRES.**
- **The Downhill Line Construction Guidelines.**

Human Resource Message

Let's Keep Community Relations Great!

Our Hosts in the town of Clayton and the surrounding areas have been very generous and thankful for all of your efforts and hard work. Not a trip to town goes by without folks offering their thanks to the fire fighters!

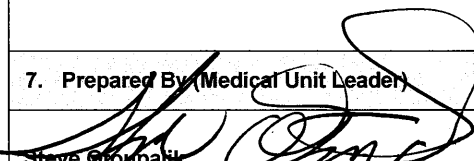

Let's keep it that way! Continue to be respectful when traveling through and to town and interacting with folks. Remember that while most of us leave and go on to other fires, this is their home and they remain. Let's leave them with a great impression!

Have a safe and enjoyable shift, and thanks for all you do!
