**WEATHER DISCUSSION:** High pressure has begun slowly sliding east of the fire area as low pressure and the next cold front move into the Lower Mississippi Valley. Relative humidity values will be 5 to 10 percent higher today as southwesterly winds continue to push moisture into the region. Clouds will thicken and lower through the day as the cold front moves closer to the area Wednesday afternoon. There is a chance of showers Wednesday night through Thursday morning as the cold front crosses the area, however only a few hundredths of rain are expected with the showers. High pressure and slightly drier air will return to the fire area for Friday through the weekend with the next cold front...and possibility of rain...moving in Monday night.

## SAFETY THOUGHT

Never go into a more dangerous area or situation because you are carrying a fire shelter.

.....REMEMBER.....  
**SAFETY IS EVERYBODY'S NUMBER ONE JOB**

### **MAJOR HAZARDS AND RISKS**

## **MAINTAIN GOOD SITUATIONAL AWARENESS**

Maintaining good SA is key to recognizing and effectively managing risk, always remember:

- **The hazards and dangerous conditions are relatively constant from the time you wake up till the time you go to sleep.** The variables are where are you **choose** to put yourself and your crew in relation to any dangerous situations or conditions?
- **When does your SA begin, and how large is it?** The greater situational awareness of the potential hazards you face, the better vision of the depth and breadth of the risk you will see and the more effectively you can adapt to and manage it.
- **What are you doing to effectively manage your risk?** Your safety and that of the people you are responsible for will be directly related to how effectively you **identify** and **manage** the many risks and dangerous conditions you work in every day.
- **USE YOUR TRAINING AND EXPERIENCE! APPLY MASSIVE AMOUNTS OF COMMON SENSE!**
