WEATHER DISCUSSION: Low pressure moving northeast from the Mississippi Valley this morning will drag a weak cold front across the Carolinas later today. Ahead of the front an isolated morning shower is possible, although most areas will remain dry. Cloud cover will linger over the area this morning before skies start to clear in the afternoon. High pressure will build over the area Friday with a dry cold front passing Friday night. This cooler and drier air mass will be the dominant feature this weekend keeping temperatures near normal. Rainfall chances increase Monday night or Tuesday as another area of low pressure approaches the southeast from the west.
