26: Communities/Critical Infrastructure Threatened (in 12, 24, 48 and 72 hour time frames):														

- 24 hours:
- 48 hours:
- 72 hours:
- 27: Critical Resource Needs(kind & amount, in priority order in 12, 24, 48, and 72 hour time frames):
- 12 hours: none
- 24 hours:
- 48 hours:
- 72 hours:

28: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

The fire area is very inaccessible, with heavy highly volatile fuel loadings. Fire history shows that, the area the fire is entering, has not had fire on it for 18 years. Extreme drought is allowing the fire to burn through areas that are normally covered with water. Potential remains for rapid fire movement towards the western and northern Preserve boundaries.

29: Natural and Cultural Resources to be protected (kind(s) and value/significance):

Traffic safety on Highway 29; Interstate 75; Endangered Red-Cockaded Woodpecker habit and Florida Panther Dens.

30: Current Weather Conditions

Wind Speed: **15** mph Temperature: **70**

Wind Direction: E Relative Humidity: 92

31: Fuels/Materials Involved: 7 Southern Rough

3 and 7

32: Today's observed fire behavior (leave blank for non-fire events):

Rain and high humidity limited surface spread. Resinous stumps, logs, and sheltered fuels are retaining

33: Significant events today (closures, evacuations, significant progress made, etc.):

ICS-209 Form Page 2 of 3

Light rain fell over much of the fire area. Evacuation order for residents was lifted. A closure for recreation remains in effect.
