IAP BICY COMPLEX FL-BCP-000044 SATURDAY JUNE 2, 2007 DAY 0800-2000

SOUTHWEST AREA INCIDENT MANAGEMENT TEAM JEFF WHITNEY - IC

CHAINSAW SAFETY

Chainsaw safety is every saw operator's job.

Always wear proper P.P.E. when handling or working around chainsaws.

- Eye protection- approved goggles or safety glasses (no sunglasses)
- Chainsaw Chaps- proper size and length
- Gloves-proper size
- Long sleeve shirt-no loose sleeves
- Leather boots-no loose boot laces

Take the time to inspect the chainsaw before operating the saw.

- Check the chain and bar- Sharpness of chain, Bar seated correctly
- Check the bolts and screws all around the saw- no missing screws or bolts
- Check the casing of the saw- no cracked or missing plastic

Make sure you're aware of your surroundings while operating the chainsaw.

- Look for people working in your area- advise all personnel you're operating the saw.
- Look for any snags or hazards in your area- look up for power lines, widow makers, etc.
- Make sure you always have a spotter or swamper to use for communications.
- Always watch your footing while operating the saw- loose, rocky, steep terrain can cause you to slip while the chainsaw is running.

Always make sure you are comfortable doing the task at hand.

- Proper training for personnel running saws.
- While falling trees know your escape route.
- If you are not comfortable falling the tree walk away. Notify your supervisor and mitigate the safety issues or turn down the assignment.

FIRE WEATHER FORECAST

 FORECAST NO. 18
 NAME OF FIRE: BICY Complex

 UNIT: All Units
 PREDICTION FOR: SATURDAY 6-02-07_

 TIME AND DATE
 SIGNED: /s/ Joseph Goudsward

 FORECAST ISSUED: 2000 HRS 6-01-07
 Incident Meteorologist

WEATHER DISCUSSION:

WEATHER FORECAST:

The storm system responsible for the wet weather over the past 24 hours will continue to move away from the area. Scattered showers will still be possible this morning until drier air works its way back in later this afternoon. A more typical weather pattern for southern Florida is then in the forecast for the next several days, characterized by warm and humid conditions and scattered afternoon thunderstorms forming on the sea breeze. Extended models are indicating upper level high pressure beginning to rebuild over the area around the middle part of the week.

TODAY: Decreasing clouds. Scattered showers this morning, decreasing to isolated in the afternoon. Chance of rain 50% this morning, decreasing to 20% in the afternoon. CHANCE OF WETTING RAIN: 40% this morning, 10% this afternoon. MAX TEMPS: 81 to 85 MIN RH: 50 to 55% 20 FOOT WINDS: Southeast becoming south 12 to 18 gusting to 22 mph **DISPERSION INDEX: 66** STABILITY/INVERSION: No inversion expected. Afternoon mixing height: 5000 feet Transport winds: South to Southeast 22 to 26 mph TONIGHT: Partly cloudy with isolated evening showers and thunderstorms. Chance of rain is 10% CHANCE OF WETTING RAIN: 10% MIN TEMPS: 68 to 70 MAX RH: 97 to 100% 20 FOOT WINDS: South becoming southwest late 3 to 6 mph DISPERSION INDEX: 8 MAX LVORI: 6 SUNDAY: Partly cloudy with isolated afternoon showers and thunderstorms. Chance of rain is 20% CHANCE OF WETTING RAIN: 10% MAX TEMP: 85 to 88 MIN RH: 48 to 52% 20 FOOT WINDS: South becoming Southwest 10 to 15 mph **DISPERSION INDEX: 68** OUTLOOK FOR MONDAY: Partly cloudy with isolated afternoon showers and thunderstorms. Weather Summary: SEE FIRE WEATHER FORECAST- note changing wind direction.

FIRE BEHAVIOR

GENERAL: With the high minimum humidity today, and the rain received yesterday and predicted this morning, surface fire behavior will be minimal. The rainfall amounts on site are sufficient to keep things cool today.

The 1 1/3 inches predicted through this morning will keep things down, but by Wednesday, fire behavior will increase back to previous conditions. It will take 10 inches to get things back in order.

Predicted Dispersion Index will be 66.

Heat exists in resinous stumps, heavy fuels, sheltered fuels, and deep duff.

Good opportunity to take advantage of the rain. Smokes should start picking up as the day dries in the afternoon. Previous locations that appeared quiet will show activity in the afternoon. Communicate any changes in fire behavior.

Things will pick up quickly with drying after this rain. It's really hard to imagine fire behavior picking that rapidly, but it will happen. Stay alert. Safety:

Watch for weakened snags and live trees that have lost root mass and support.

HEALTH AND SAFETY MESSAGE

| INCIDENT: BI | CY Complex | DATE: | DATE: 6-2-07 DAY OPERATIONAL PERIOD | | | | | |
|--------------------------|------------|--------|-------------------------------------|-------|--|--|--|--|
| Heavy Equipment/Rehab | Critters | Mop-up | Driving | Snags | | | | |

Major Concerns:

- Heavy Equipment: With rehab starting in the next couple of days have briefing with your crews on heavy equipment safety. Stay clear of equipment, maintain good communications with operators, make sure operators know that you are in the area and watch for critters in debris piles.
- Mop-up: Take the time to get some fresh are when you are mopping. Decomposing material in the Everglades emits toxic smoke. Take the time to step away from smoke and clear your lungs. Discuss firing sequences, firing patterns and crew spacing. Maintain good communications with ignition personnel at all times.
- Snags: Be sure to keep stay aware of fire environment that you are working in. Snags don't make much noise prior to hitting the ground. Post lookouts and survey the area prior to putting your head down to work.
- Driving: Driving is still a concern...roads are narrow and road embankments are steep. The possibility of slick roads is still a concern. Watch out for other drivers and pay attention to your driving.
- > Critters: Stay aware of snakes and other critters that may be hiding in dozer berms next to control lines.
