

Florida Bugaboo Fire

May 16, 2007
Night Shift
1900-0700

Incident Objectives	1. Incident Name FLORIDA BUGABOO	2. Date Prepared 05/16/07	3. Time Prepared 1051															
4. Operational Period 05/16/07 Wednesday Night Shift 1900 - 0700																		
5. General Control Objectives for the incident (include alternatives) <ol style="list-style-type: none"> 1. Provide for the safety of fire suppression forces assigned to the Florida Bugaboo Wildfire and the general public by adhering to the "Standard Fire Orders", "Watch-Out Situations" and by following work/rest guidelines and through public awareness of risks to the community. 2. Maintain and improve relationships with Cooperators including the GOAL organization by providing current information and inviting participation. 3. Provide for a strong commitment to cost containment. 																		
6. Weather Forecast for Period Mostly clear with increasing clouds with a 20% chance of showers or thunderstorms near dawn; temperatures 59-62; humidity recovery to around 95%; winds 4 mph or less, becoming westerly towards dawn.																		
7. General Safety Message <p>Keep your guard up for changing conditions and react accordingly. Maintain situational awareness at all times. Think ahead and have a contingency plan. Know escape routes and safety zones.</p> <p style="text-align: center;"><u>ROAD CONSTRUCTION ALERT</u></p> <p>The Department of Transportation has advised us that road construction is scheduled for the section of Hwy 441 between Hwy 90 and the junction with Hwy 100A beginning on Tuesday May 15. Traffic delays can be expected in this area over the next several days. If you need to travel to Deep Creek, it is advisable to turn right off Hwy 90 onto Hwy 100A just past the airport (as you enter Lake city from the east) and travel Hwy 100A to Hwy 441 and then North on Hwy 441 to Deep Creek. This route will avoid the construction area. You can also access Hwy 441 from I-10 and then North to Deep Creek.</p>

WEATHER FORECAST

Tony Edwards – Incident Meteorologist

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #13 5/16/2007 Night

WEATHER DISCUSSION: A cold front will drop south toward the area later tonight bringing a slight chance for a shower or thunderstorm. Winds will continue to be light but become more westerly as the front approaches. The smoke will lie down and spread out this evening as transport winds remain light through the night.

WEATHER FORECAST:

GENERAL: Mostly clear in the evening, then increasing clouds with a 20% chance for a shower or thunderstorm towards dawn. Areas of dense smoke, especially after midnight.

TEMPERATURES: Lows 59 to 62.

24 HOUR TREND: 8 degrees warmer.

HUMIDITY: Recovering to around 95%.

24 HOUR TREND: Unchanged.

20 FT WINDS: East 5 to 10 mph with a few gusts to 15 mph through 2200, then becoming east to southeast 2 to 4 mph.

STABILITY/INVERSION: Mixing height lowering to around 500 feet. Transport winds south 5 mph early turning west after midnight. Dispersion index 3

OUTLOOK FOR THURSDAY SHIFT: Partly cloudy with a 30% chance for showers and thunderstorms. Highs 80-83. Afternoon minimum humidity 40-45%. 20 ft winds northwest 3 to 6 mph in the morning, then north 4 to 8 mph in the afternoon.

SUNSET TONIGHT: 2018 **SUNRISE SUNDAY:** 0636

 FIRE BEHAVIOR

Rick Reitz- FBAN

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #13 5/16/2007 Night

GENERAL FIRE BEHAVIOR:

Type of fire: *Wind-dominated surface*

FL – 7 ft (<2200), 4 ft (>2200)

ROS – 40 ch/hr (<2200), 14 ch/hr (>2200)

SPOTTING – 0.3 mi (<2200), 0.1 mi (>2200)

POI – 60% (<2200), 10% (>2200)

CROWN – *Passive when distance between surface and aerial fuel is less than 20 ft (<2200) diminishing to less than 6 ft (>2200), respectively*

SPECIFIC FIRE BEHAVIOR:

All Divisions: Cypress and bay laurels support surface fire intense enough to scorch overstory, but generally do not support passive crowning (torching) of overstory trees.

Divisions A/B/C/D/E: (Night) Pockets of heat near available fuel will respond to early low relative humidity and keep portions of fire active until 2200. Variable winds, stimulating fire activity close to control line, may blow embers across line. Spot fires may appear from interior torching and spread quickly early in operational period. Spot fire intensity and growth will be mitigated by lower probability of ignition and slower rate of spread when relative humidity increases after 2200.

Divisions AA/BB/CC Structure N and S: (Night) Portions of fire will be active before 2200, during amplified low relative humidity period, and then fire intensity will diminish as relative humidity increases. Variable winds, stimulating fire activity close to control line, may blow embers across line. Spot fires may appear from interior torching and spread quickly early in operational period.

AIR OPERATIONS: *Dense smoke from plume may interfere with evening aircraft use.*

SAFETY: *Identify escape routes and safety zones, and make them known.*

TAILGATE BRIEFING SHEET 2 OF 2

SAFETY MESSAGE

PAY ATTENTION TO THE SMALL DETAILS

Fire Order of the Day – *Cannot see main fire, not in contact with anyone who can*

***DOZER OPERATIONS** – maintain good communications with other ground units and aircraft in your area. Dozers need to stay out of the swamps. DO NOT plow lines in the swamps in these extreme fire conditions. Several incidents have occurred recently where dozers have gotten stuck on high stumps with heavy fire activity in very close proximity.

***AIR OPERATIONS** - maintain good communications with other ground units and aircraft in your area. Ground crews must maintain a safe distance (200' in brush or 400' in timber) during retardant drops for not only personal safety, but to allow the pilot an opportunity to do his job in a safe and effective manner. Be aware of non-incident personnel during air-ops, especially if using heavy air tankers. Use air resources as lookouts when appropriate.

***FATIGUE, DEHYDRATION** -Take care of yourself by getting adequate rest and eating regularly. Drink plenty of clean water and electrolyte drinks like Gatorade (3:1 water:electrolyte ratio). Drink enough to urinate at least every 3 hours. Never drink unfiltered water from springs, streams or from an unknown source.

***TRANSPORTATION – WHEN TRAVELING BETWEEN INCIDENT AND ICP**, lights on, use seatbelts, & obey all traffic laws. Don't allow fatigue to control your vehicle. Those of you that are driving home, please drive safely and watch out for the other vehicle. Share driving responsibilities between licensed operators. Watch out for livestock, wildlife and pedestrians. You may encounter smoke and areas being evacuated...Drive Defensively!

***STRUCTURAL PROTECTION/HAZARDOUS MATERIALS** – Please read the message below and pages 11-17 of the Incident Response Pocket Guide.

***POTENTIAL THUNDERSTORM ACTIVITY** – Watch out for development of thunderheads in the afternoon. Refer to page 75 of the Incident Response Pocket Guide.

Urban/Wildland Watch Outs

- ≈ Wooden construction and wood shake roofs;
- ≈ Poor access and narrow one-way roads;
- ≈ Inadequate water supply;
- ≈ Natural fuels 30 feet or closer to structures;
- ≈ Extreme fire behavior;
- ≈ Strong winds;
- ≈ Evacuation of public (panic);
- ≈ Bridge load limits.

12. CANNOT SEE MAIN FIRE, NOT IN CONTACT WITH ANYONE WHO CAN

Powerline Safety

- ≈ Downed wire on vehicle – don't leave vehicle until power company arrives. If vehicle is on fire, or fire is near, don't hang on to door. Keep feet together and bunny hop away;
- ≈ Don't operate heavy equipment under powerlines;
- ≈ Don't make water drops on live powerlines;
- ≈ Don't drive with long antennas under powerlines;
- ≈ Don't fuel vehicles/equipment under powerlines;
- ≈ Don't stand near powerlines during water drops or retardant drops;
- ≈ Don't park under powerlines;
- ≈ Don't apply straight streams to powerlines;
- ≈ Thick, heavy smoke can cause arcing.

Do use caution when working around powerlines and in interface situations

HUMAN RESOURCES

"Okay ... on the count of three everybody rattles."

The best assignment is one where you are able to accomplish your mission and have a good time in the process. We want this assignment to be a great one for you. It is okay to have some fun and good humor while you are here. Just remember, that sometimes what is funny to you may not be to those around you. Be sure you have the relationship with others to support your behavior. If you have any problems or concerns that you need help with, come see us.

Gary Samaha
Human Resource Specialist

Sharon Crittendon
