

Florida Bugaboo Fire Incident Action Plan

**May 19, 2007
Night Shift
1900-0700**

Incident Objectives	1. Incident Name FLORIDA BUGABOO	2. Date Prepared 05/19/07	3. Time Prepared 1513															
4. Operational Period 05/19/07 Saturday Night Shift 1900 - 0700																		
5. General Control Objectives for the incident (include alternatives) <ol style="list-style-type: none"> 1. Provide for the safety of fire suppression forces assigned to the Florida Bugaboo Wildfire and the general public by adhering to the "Standard Fire Orders", "Watch-Out Situations" and by following work/rest guidelines and through public awareness of risks to the community. 2. Maintain and improve relationships with Cooperators including the GOAL organization by providing current information and inviting participation. 3. Provide for a strong commitment to cost containment. 																		
6. Weather Forecast for Period A few evening clouds, then clear. Temperatures 48-52. Humidity recovering to around 100%. East winds 3-7 mph until 2200, then becoming calm.																		
7. General Safety Message <p>Keep your guard up for changing conditions and react accordingly. Maintain situational awareness at all times. Think ahead and have a contingency plan. Know escape routes and safety zones.</p> <p style="text-align: center;"><u>ROAD CONSTRUCTION ALERT</u></p> <p>The Department of Transportation has advised us that road construction is scheduled for the section of Hwy 441 between Hwy 90 and the junction with Hwy 100A beginning on Monday May 21. Traffic delays can be expected in this area beginning Monday. If you need to travel to Deep Creek, it is advisable to turn right off Hwy 90 onto Hwy 100A just past the airport (as you enter Lake city from the east) and travel Hwy 100A to Hwy 441 and then North on Hwy 441 to Deep Creek. This route will avoid the construction area. You can also access Hwy 441 from I-10 and then North to Deep Creek.</p>

DEMOBILIZATION PROCESS

THE DEMOBILIZATION PROCESS WILL BE ACCELERATED WITH THE FOLLOWING STEPS TAKING PLACE.

- 1. CHECK WITH DEMOB THREE (3) DAYS IN ADVANCE OF ANNOUNCED DATES TO MAKE CERTAIN OF ACCURACY ON DEMOB DATE.**
- 2. MAKE CERTAIN TO HAVE ALL YOUR CTR'S TURNED IN THE DAY BEFORE YOU DEMOB, THEN THE TIME UNIT WILL HAVE ONLY THE LAST SHIFT TO ENTER INTO THE SYSTEM MAKING CHECKING OUT MORE EFFICIENT AND FASTER.**
- 3. IF YOU REQUIRE A FLIGHT FOR TRAVEL TO YOUR HOME UNIT, TRAVEL ARRANGEMENTS WILL HAVE TO BE MADE AT LEAST 48 HOURS IN ADVANCE OF ACTUALLY BEING DEMOBED.**
- 4. AFTER YOUR LAST SHIFT OBTAIN AN EVALUATION FROM YOUR SUPERVISOR.**
- 5. NO PERSON SHALL BE RELEASED PRIOR TO OBTAINING ADEQUATE REST AS PROVIDED FOR BY AGENCY RULES AND POLICY. RESOURCES THAT ARE REASSIGNED WILL BE RELEASED THE MORNING AFTER THEIR LAST SHIFT. LOCAL RESOURCES RETURNING HOME WILL BE RELEASED AFTER SHIFT IF THEY CAN ARRIVE HOME BEFORE 2200.**
- 6. ON THE DAY FOR YOUR DESIGNATED DEMOB, PLEASE REPORT TO THE DEMOB UNIT IN THE ICP AND PICK UP DEMOB FORM.**
- 7. REPORT TO THE DESIGNATED UNITS AS LISTED ON THE DEMOB FORM.**
- 8. RETURN TO DEMOB WHEN YOU HAVE COMPLETED CHECKOUT AT ALL UNITS.**
- 9. IF YOU HAVE BEEN SUCCESSFUL IN BEING DEMOBED, THE INCIDENT COMMANDER AND STAFF WISH YOU A GOODBY AND TO HAVE A SAFE TRIP HOME.**

WEATHER FORECAST

Tony Edwards – Incident Meteorologist

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #19 5/19/2007 Night

WEATHER DISCUSSION: - High pressure to our north will bring a clear night to the fire area tonight. The clear skies and light winds will help temperatures fall to near record cool levels. Unseasonably dry weather will continue through Tuesday before humidity levels start to creep upward through the rest of the week.

WEATHER FORECAST:

GENERAL: A few evening clouds, then clear. Pockets of smoke, especially near Deep Creek and in Divisions AA and BB.

TEMPERATURES: Chilly with lows 48-52 **HUMIDITY:** Recovering to around 100%
 24 HOUR TREND: 3 degrees cooler. 24 HOUR TREND: Unchanged

20 FT WINDS: East winds 3 to 7 mph until 2200, then becoming calm

STABILITY/INVERSION: Inversion around 300 feet setting up after 2200. Transport winds from the northeast around 8 mph through 2200, then from the east less than 5 mph. Dispersion index 5.

EXTENDED FORECAST:

Sunday: Clear. Highs 84-87. Minimum RH 22-28%. East winds 4 to 8 mph.

Monday: Mostly clear. Lows 50-54. Highs 86-89. Minimum RH 25-30%. East winds 4 to 8 mph.

Tuesday: Partly cloudy. Lows 53-57. Highs 86-89. Minimum RH 30-35%. East winds 6 to 10 mph.

SUNSET TONIGHT: 2018 **SUNRISE TOMORROW:** 0634

FIRE BEHAVIOR

Rick Reitz- FBAN

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #19 5/19/2007 Night

GENERAL FIRE BEHAVIOR (outside fire perimeter):

Type of fire: <i>Wind-dominated surface</i>	FL – 8 ft (<2200) diminishing to 2 feet (>2200)
ROS – 49 ch/ hr (<2200) diminishing to 3 ch/hr (>2200)	SPOTTING – 0.4 (<2200) diminishing to surface fire only (>2200)
POI – 60 to 10%	ERC - 40 – Extreme (Consult pocket card for local fire behavior thresholds)

CROWN – *Passive when distance between surface and aerial fuel is less than 16 ft (<2200), then diminishing to a surface fire (>2200), respectively.*

SPECIFIC FIRE BEHAVIOR:

All Divisions: *Interior fine fuels (1-hr) within a chain of the fire’s perimeter are becoming scarce and this scarcity reduces the probability, but not the possibility, that embers may cross the control line and find available fuel that supports fire. This probability increases as desiccated pine needles fall to surface, accumulate, and increase reburn potential.*

Links between surface and latter fuels are almost severed. There is the possibility that pockets of heat near available fuel may still respond to wind and low relative humidity, become active, and throw embers into wind stream. However, the probability is low that some embers may cross control line, but a possibility exists.

Thick root mats, with duff, give ground fire an opportunity to retain heat over an extended time period unless dug out.

Berms containing burning vegetation will need to be spread out and mopped up accordingly.

After drying, bay laurels and cypress may again support surface fire intense enough to scorch overstory, but generally will not support passive crowning (torching) of overstory trees.

AIR OPERATIONS: *Until dark, there should be no interference by fire or smoke if aircraft are needed.*

SAFETY MESSAGE

SAFETY starts with *YOU*

We are **ALL** accountable for **SAFE** behaviors

SAFETY IS EVERYONE'S JOB, MAKE IT YOUR PRIORITY!

Fire Order of the Night – *Maintain communications with your forces, your supervisor, and adjoining forces.*

Watch Out Situation – *Instructions and assignments not clear.*

Major Hazards and Risks:

- **Driving** – Drive defensively, keep speed down, and watch for wildlife crossing roads at night. Maintain adequate, safe distance between vehicles and anticipate oncoming traffic. Use spotters when backing up.
- **Hazard trees** – Hazardous trees can be within the fire and green areas. Look Up and Look Around you at all times. Heads up for hazardous trees or snags – warn others around you and insure that any hazard trees are flagged.
- **Fatigue/personal welfare** – Take care of yourself by getting adequate rest and eating properly. It has been a long spring fire season so far and appears we will continue right on into the summer season. Remember to account for long term, cumulative fatigue when planning operations.
- **Complacency** – Stay vigilant and expect the unexpected. It is at this stage of the fire that people will become complacent and let their guard down. Maintain your situational awareness regardless of your assignment.

Remember that night time operations are a tactical watch out situation – maintain crew and personnel accountability!

Fatigue – fatigued people perform poorly, behave carelessly, tolerate greater errors, and become inattentive. They display decreased motivation, increased irritability, and low morale. They are a hazard in most operations. Watch for behavior changes that indicate employees are fatigued and stressed. Increase rest breaks, and make adjustments in assignment where possible to reduce impacts of physically demanding tasks.

HUMAN RESOURCES

“Communication”

George Bernard Shaw once said, “The problem with communication ... is the *illusion* that it has been accomplished.”

To master communication, understanding comes first. When communicating with each other, keep in mind communication is only effective when the listener understands the message. There is nothing wrong with asking questions and for more information if you are not sure of what was said.

When you practice trying to understand what others are trying to say, you will notice that they will feel a better connection with you. And, that is the first step in gaining a real appreciation for one another. So, take the time to seek understanding in your communications today. And have a great day!
