WEATHER FORECAST

Tony Edwards – Incident Meteorologist

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #24 5/22/2007 DAY

WEATHER DISCUSSION: - High pressure will push off into the western Atlantic and then slowly work south over the next few days. This will bring about a strengthening easterly onshore flow beginning today. One more dry day is expected, prompting a Red Flag Warning for the afternoon hours, before moisture levels increase. Breezy easterly winds will continue through the rest of the week as well. Rain chances will remain slight at best through the weekend.

WEATHER FORECAST: *Red Flag Warning in Effect from Noon to 6 pm Today for Low Relative*

GENERAL: Pockets of smoke early, especially in Divisions BB and CC. Otherwise, mostly sunny in the morning, then partly cloudy.

TEMPERATURES: Highs 86-90.
24 HOUR TREND: no change

HUMIDITY: Minimum humidity 24-29%.
24 HOUR TREND: 4% wetter

20 FT WINDS: East 2 to 4 mph through 1000, then increasing to 6 to 12 mph with gusts up to 18 mph..

STABILITY/INVERSION: Morning inversion around 500 ft mixing out by 0900, then mixing height rising to around 6000 ft. Transport winds east 10 mph in the morning, increasing to 20 mph in the afternoon. Dispersion index 65, or very good.

OUTLOOK FOR TUESDAY NIGHT SHIFT: Mostly clear. Lows 58 to 61. Humidity recovering to around 95%. 20 ft winds from the east 5 to 9 mph in the evening, becoming northeast 2 to 5 mph after midnight.

FIRE BEHAVIOR

Rick Reitz- FBAN

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #24 5/22/2007 DAY

GENERAL FIRE BEHAVIOR (outside fire perimeter):

Type of fire: <i>Wind-dominated surface</i>	FL – 12-15 fwwr
ROS – 105-179 ch/hr	SPOTTING – 0.7 to 1.0 miles
POI – 90%	ERC - 40 – <i>Extreme (Consult pocket card for local fire behavior thresholds)</i>

CROWN– *Active when distance between surface and aerial fuel < 27 ft through 12 mph, then < 39 ft through 18 mph.*

SPECIFIC FIRE BEHAVIOR:

Extreme fire behavior if fire gets outside perimeter. All four local thresholds: temperature > 90°F (86-to-90°F today), wind > 10 mph (12 today), RH < 25 (<24-29% today), and Keetch-Byram Drought Index > 500 (600-700 today) will be met again today.

All Divisions: While interior fine fuels (1-hr), within a chain of the fire’s perimeter, are becoming scarce and this scarcity reduces the probability of embers crossing the perimeter, a possibility still exists that embers may cross the perimeter and find available fuel that supports fire. This probability increases as desiccated pine needles fall to surface, accumulate, and increase reburn potential (presently east side of fire).

Links between surface and latter fuels are almost severed. But, there is a possibility that pockets of heat near available fuel may still respond to wind and low relative humidity, become active, and throw embers into wind stream. Although, the probability is low that torching will produce embers that cross perimeter, the possibility still exists.

Thick root mats, with duff, give ground fire an opportunity to retain heat over an extended time period, or interact with recently deposited pine needles, unless dug out.

continued

Bay laurels and cypress may support surface fire intense enough to scorch overstory, but generally will not support passive crowning (torching) of overstory trees.

Divisions A/B/C/D/E/ AA/BB/CC: See comments under "All Divisions."

AIR OPERATIONS: *Dense smoke from smoke and fog may interfere with early morning aircraft use.*

TAILGATE BRIEFING SHEET 2 OF 2

SAFETY MESSAGE

SAFETY starts with **YOU**

We are **ALL** accountable for **SAFE** behaviors

Fire Order – *Identify escape routes and safety zones and make them known.*

Watch Out Situation – *Uninformed on strategy, tactics, and hazards.*

Major Hazards and Risks:

- **Driving** – **SEAT BELTS** are mandatory for all occupants of the vehicle. Do Not move a vehicle without the seat belt fastened – no exceptions – **BUCKLE UP FOR SAFETY!** Drive defensively, and watch for wildlife. Obey all traffic regulations and speed limits. Maintain safe distance between vehicles and anticipate oncoming traffic. Use spotters when backing up.
- **Animal Hazards** – snakes are being seen in greater numbers and are especially active at night. With the cool nighttime temperatures beware of snakes coming out onto the roadways – be alert when you step out of your vehicle and when working at night. Don't leave garbage and food scraps on the line so that animals will not be attracted and become a nuisance or a danger to personnel.
- **Fatigue/personal welfare** – Take care of yourself by getting adequate rest and eating properly. Remember to account for long term, cumulative fatigue when planning operations.
- **Complacency** – Stay vigilant and expect the unexpected. This fire is by no means dead – do not let your guard down. Maintain your situational awareness regardless of your assignment.

Remember that night time operations are a tactical watch out situation – maintain crew and personnel accountability!

Fatigue – monitor personnel for signs of cumulative fatigue. Research has shown that after 2300 hrs the probability that people will lapse into sleep increases dramatically. Otherwise normally-functioning employees may suffer from short, intermittent episodes of fatigue, especially when sleep deprived. These episodes are characterized by very brief lapses in the performance of tasks during which details are missed, accuracy is impaired, and/or performance is slowed.

SAFETY IS EVERYONE'S JOB, MAKE IT YOUR PRIORITY!

HUMAN RESOURCES

"Life does have a slow lane, you know!"

You Make a Positive Difference at Bugaboo if You..."

Begin each day with a good attitude and a smile.

Use good judgment while on **and** off shift.

Give your best to the team.

Always practice good interpersonal habits.

Be professional and respectful at all times.

Observe the condition of others around you.

Obey all the rules—they exist for a reason.

Have a great day!
