WEATHER FORECAST

Tony Edwards – Incident Meteorologist

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #25 5/22/2007 Night

WEATHER DISCUSSION: - High pressure will build down the east coast though the rest of the week resulting in gusty easterly winds this evening and again on Wednesday and Thursday. The stiff onshore flow will bring more moisture inland keeping relative humidity values higher for the rest of the week, however the chances for rain appear minimal through the upcoming weekend.

WEATHER FORECAST:

GENERAL: Partly cloudy early, then clearing. Pockets of smoke over Divisions BB&CC after midnight.

TEMPERATURES: Lows 57-60
24 HOUR TREND: 6 degree warmer.

HUMIDITY: Recovering to around 100%
24 HOUR TREND: Unchanged

20 FT WINDS: East 6 to 12 mph with gusts up to 18 mph through 2200, then becoming northeast 2-6 mph.

STABILITY/INVERSION: Inversion setting up around 500 feet after 2400. Transport winds from the east at 18 mph early, decreasing to around 8 mph after 2400. Dispersion index 6.

EXTENDED FORECAST:

Wednesday: Partly cloudy and breezy. Highs 84-87. Minimum RH 34-39%. 20 ft winds northeast 3 to 7 mph through 1100, then becoming east 9-15 mph with gusts to 22 mph.

Thursday: Partly cloudy and breezy. Lows 59-62. Highs 82-85. Minimum RH 35-40%. East winds 8-14 mph with higher gusts.

Friday thru Saturday: Partly cloudy Lows 59-62. Highs 83-87. Minimum RH 35-40% East winds 5 to 12 mph.

FIRE BEHAVIOR

John Kern- FBAN

Bugaboo Incident NF in Florida/Florida Div. of Forestry Forecast #25 5/22/2007 Night

GENERAL FIRE BEHAVIOR (outside fire perimeter):

Type of fire: <i>Wind-dominated surface</i>	FL – 15 ft (<2200) diminishing to 3 feet (>2200)
ROS – 55 ch/ hr (<2200) diminishing to 3 ch/hr (>2200)	SPOTTING – 0.2 (<2200) diminishing 0.1 miles (>2200)
POI – 80 (<2200) diminishing to 10% (>2200)	ERC - 40 – Extreme (Consult pocket card for local fire behavior thresholds)

CROWN–Passive when distance between surface and aerial fuel < 21 ft (<2200), then < 5 ft (>2200), respectively.

SPECIFIC FIRE BEHAVIOR:

Extreme fire behavior if fire gets outside perimeter before 2200. Fuels are extremely dry and RHs have been at red flag levels for the past five days, further drying the fuels. Three local thresholds: wind > 10 mph (12 this evening, gusts to 18 early), RH < 25 (<25% today, recovering tonight), and Keetch-Byram Drought Index > 500 (600-700 today) will be met this evening.

All Divisions: Extremely dry conditions have made all sources of ignition very dangerous. Should a fire start outside the containment area, it will build rapidly with high intensities. ERCs are at record levels. Fire behavior has best been modeled by using the most extreme model (Fuel model 4 - Chaparral). Rates of spread just after sunset until 10 PM will be around 50 ch/hr with flame lengths approaching 15 feet. Treat all new starts with great care. There will be a fair chance of torching in unburned fuels. Fire behavior should moderate down as evening humidities rise to nearly 100% by dawn.

Fuels with grass as the primary carrier will have very rapid rates of spread (approaching 80 ch/hr) until 10PM, and then drop off as humidity increases through the night.

Watch for REBURN in the black. Dried leaves have fallen off many of the trees and pose a threat of making runs in previously burned areas.

The likelihood of torching trees in the burn is greatly reduced but if embers are produce the probability of ignition will start around 80% early this evening and decrease as the humidity increases through the night.

AIR OPERATIONS: *Until dark, there should be no interference by fire or smoke if aircraft are needed.*

SAFETY MESSAGE

SAFETY starts with *YOU*
We are **ALL** accountable for **SAFE** behaviors

Fire Order – *Be alert. Keep calm. Think clearly. Act decisively.*
Watch Out Situation – *Safety zones and escape routes not identified.*

Major Hazards and Risks:

- **Driving** – SEAT BELTS are mandatory for all occupants of the vehicle. Do Not move a vehicle without the seat belt fastened – no exceptions – **BUCKLE UP FOR SAFETY!** Drive defensively, and watch for wildlife. Maintain safe distance between vehicles and anticipate oncoming traffic. Use spotters when backing up.
- **Animal Hazards** – snakes are being seen in greater numbers. Be alert when you step out of your vehicle and when working at night. Don't leave garbage and food scraps on the line so that animals will not be attracted and become a nuisance or a danger to personnel.
- **Fatigue/personal welfare** – Take care of yourself by getting adequate rest and eating properly. Remember to account for long term, cumulative fatigue when planning operations.
- **Complacency** – Stay vigilant and expect the unexpected. This fire is by no means dead – do not let your guard down. Maintain your situational awareness regardless of your assignment.

Remember that night time operations are a tactical watch out situation – maintain crew and personnel accountability!

Remember – attitude is everything in safety. Despite our best efforts to mandate safety, risky behaviors increasingly become acceptable each time they are performed without negative consequences. It is easier to avoid than get out of a bad situation.

SAFETY IS EVERYONE'S JOB, MAKE IT YOUR PRIORITY!

HUMAN RESOURCES

Which is BEST:
Flexibility or Rigidity??

Actually, **BOTH!** They are two sides of the same coin...

1. "Blessed are the flexible, for they will not get bent out of shape." (Unknown)

Particularly in your interactions with people, how flexible are *you* ?

HOWEVER,

2. Don't compromise on absolute standards (e.g., safety, legal or ethical standards).

"To keep yourself honest, imagine a camcorder recording all your actions." --Lawrence MacGregor Serven

PS: If anyone is interested in attending a "Friends of Bill W." meeting, please let me know and I'll see if we can accommodate the request.

Yogi Berra-isms: "They laughed at Joan of Arc, but she built it anyway."
"You can observe alot just by watching."
