# LIGHTNING SAFETY FACTS

The Best Thing You Can Do To Avoid Lightning Danger Is Learn And Practice Good Lightning Safety!

No Place Outside Is Safe Near A Thunderstorm!

The '**30-30 Rule**' Offers The Best Lightning Safety Guidance For The General Public. When You See Lightning, Count The Time Until You Hear Thunder. If That Is **30 Seconds** Or Less, The Thunderstorm Is Close Enough To Be Dangerous – Seek Shelter (if you can't see the lightning, just hearing the thunder is a good back-up rule). Wait **30 Minutes** Or More After The Lightning Flash Before Leaving Shelter.

A House, Or Other Fully Enclosed Substantially Constructed Building, Offers Your Best Protection Against Lightning ("substantially constructed" means it has wiring and plumbing). But Stay Away From Telephones, Electrical Appliances, And Plumbing. Don't Watch Lightning From Windows Or Doorways. Inner Rooms Are Generally Safer.

A Car With A Metal Roof And Sides Is Your Second Best Protection Against Lightning. As In A House, Don't Touch Any Conducting Paths Leading Outside. It Is The Metal Shell That Protects You, **Not** The Rubber Tires.

Lightning Is The #2 Weather Killer In The U.S. -- Killing More Than Hurricanes And Tornadoes Combined! (only floods kill more)

Lightning Is The #1 Weather Killer In Florida -- Killing More Than All Other Weather Sources Combined!

Florida Leads The U.S. In Lightning Deaths, Injuries, And Casualties!

Lightning Inflicts Severe Life-Long Debilitating Injuries On Many More Than It Kills!

Lightning Kills About 100 People In The U.S. Each Year!

Lightning Injures About 1,000 People In The U.S. Each Year!

Long-term Lightning Symptoms Are Primarily Neurological And Are Difficult To Diagnose. Though Very Variable, Some Of The More Frequent Symptoms Include Memory Deficit, Sleep Disturbance, Chronic Pain, Dizziness, And Chronic Pain. Lightning Survivors Sometimes Have Trouble Processing Information, Are Easily Distracted, And Have Personality Changes. Symptoms May Not Appear Until Months After The Lightning Strike.

The 'Lightning Strike And Electric Shock Survivors, International' Is The Main Support Group For Lightning Survivors ([www.lightning-strike.org](http://www.lightning-strike.org)).

Lightning Causes About \$5 Billion Of Economic Impact In The U.S. Each Year!

Pennsylvania Leads The U.S. In Lightning Damage!

The Odds Of An Individual Being A Lightning Casualty In A Year In The U.S. Is About 280,000-To-One -- If You're An Average Person, In An Average Location, With Average Outside Activities, And Average Lightning Safety Behavior. That's About 3,000-To-One Over Your Lifetime, With About 300-To-One Odds Of Being Seriously Affected By A Family Member Or Friend Being A Lightning Survivor. In Florida, It's Closer To 80,000-To-One Per Year Of Being Struck, 1,000-To-One In A Lifetime, And 100-To-One Of Being Seriously Affected.

The Odds Of An Individual Being Killed By Lightning Each Year In The U.S. Is About 3 Million-To-One -- If You're An Average Person, In An Average Location, With Average Outside Activities, And Average Lightning Safety Behavior. That's About 35,000-To-One Over A Life Time, And About 3,000-To-One Of Being Seriously Affected By A Family Member Or Friend Being Killed By Lightning. In Florida, It's Closer To 900,000-To-One Per Year, Or 12,000-To-One Over A Lifetime, And 1,000-To-One Of Being Seriously Affected.

Keraunomedicine Is The Medical Study Of Lightning Casualties.

**TAILGATE BRIEFING SHEET 2 OF 2**

**SAFETY MESSAGE June 6, 2007 0700-0700**

*Major Hazard and Risks:*

➤ **Lightning Safety**

➤ **Communications**

➤ **Professionalism**

➤ Lightning can occur "out-of-the-blue" and strike many miles (7+) away from a Thunder storm cell. This awesome display of nature is lethal. Do not stay in exposed areas. Seek shelter in a vehicle with rubber tires. Practice the 30/30 rule. See Pgs 74 & 75 in the IRPG on Lightning and Thunderstorm Safety

➤ It is very important to ensure you have direct comms with your division. It makes no difference if you're a suppression resource, an archeologist or a ground support person. Contact the DIVS whenever entering a division. Listen to the radio and correct assigned frequencies. Be alert for severe weather warnings and other special advisories. Pass along the information.

➤ Everyone on this assignment has had an outstanding safety record. As we near the end of our assignment -- maintain your high level of professionalism and enthusiasm for safety.

**STANDARD FIREFIGHTING ORDERS**

1. Keep informed on fire weather conditions & forecasts
2. Know what your fire is doing at all times
3. Base all actions on current & expected behavior of the fire
4. Identify escape routes & safety zones, and make them known
5. Post lookouts when there is possible danger
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor and adjoining forces.
8. Give clear instructions and insure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

Gene Madden, Don Neal, Kirk Ausland, Dave Hildebrand, and Keith Long

As you transition and reunite with love ones, friends and co-workers consider those who have been gone for a while and your love ones, friends and co-workers have done a good job fulfilling your role during your absence. If possible, slowly assert yourself as you re-establish your position.

**SMOOTH TRANSITIONS AND REUNIONS INVOLVE:**

- ☺ Appreciating the efforts of others
- ☺ Communicating to understand the current state
- ☺ Trusting in one another
- ☺ Rebuilding relationships
