HEALTH AND SAFETY MESSAGE

SAFETY is YOU & ME

We are ALL accountable for SAFE behaviors

INCIDENT: Cowbell Fire & AI

DATE: May/ 2/ 2017

Major Hazards and Risks: Driving, Aviation, Heat Related Injuries and Snags

Driving – Obey all state and local traffic laws AT ALL TIMES. Remember to wear safety belts and run headlights when travelling on the incident. There is a **NIGHT TIME speed limit of 45 mph** on Highway 41 and Highway 29 for the protection of wildlife and your safety, **RESPECT IT!!**

Aviation – Everyone has a role in safe aircraft operations on this incident. Request aviation resources one if the mission requires it. If you are a ground resource, be ready to communicate with the pilot and be sure the area is clear for bucket drops.

Heat-Related Injuries – heat related injuries (heat cramps, heat exhaustion, and heat stroke) are most likely to occur when it's **hot and humid**, but can occur in any environmental conditions. Keep hydrated and drink one quart of water before and after heavy work periods.

Snags – Maintain situation awareness at all times. Be aware of forecasted winds. Dead, broken, or burning tops and limbs overhead. IRPG pp. 22-23.

10. ATTEMPTING FRONTAL ASSAULT ON FIRE

WATCH OUT

- **Lookouts** – Can you see over the tree tops? Where is the fire? If air attack is your lookout, what happens when they leave your space? Does your lookout know your *location*?
- **Communications** – Are you on *the right channel* with your lookout? Do you have extra batteries? Are you scanning? The right channels?
- **Escape Routes** – Is there just one path through the *jungle*? Identify the ones that count and flag them. Find more than one....if you can.
- **Safety Zones** – *water won't work while wildlife want wetlands!* Go for green areas near structures or black burned areas. You might need to create a black area as a last resort so carry some fire makers and identify some grassy areas with light fuels to Wag Dodge.
