INCIDENT OBJECTIVES	1. Incident Name Avian Complex	2. Date Prepared 5/22/2018	3. Time Prepared 1700
4. Operational Period 5/23/2018 0800 - 2000			
5. General Control Objectives For The Incident <u>Objectives for the Incident:</u> <ul style="list-style-type: none"> • Ensure protection of human life as a top priority, followed by protecting communities and specifically identified facilities within the preserve. • Manage the fire under a strategy commensurate with risk and suppression action utilizing MIST, paying particular attention to Red-Cockaded Woodpecker habitat and Florida Panther den sites. • Provide protection to all private in-holding camps, commercial infrastructure, and limit disruption of landowner access. • Provide initial attack response for all new starts within the Big Cypress National Preserve and Florida Panther National Wildlife Refuge through coordination with the Preserve's Duty Officer. • Provide training opportunities for Preserve, state and federal personnel to strengthen organizational capabilities and complete training assignments. 			
<u>Control Objectives:</u> <ul style="list-style-type: none"> • Provide for point source protection of private land and critical infrastructure in areas that are or will be threatened by the predicted movement of the fires within the Avian Complex. • Limit the Flamingo fire from spreading north of the preserve boundary. • Limit impacts to I-75, US41, Seminole Tribe of Florida and Miccosukee tribal lands. • When possible, use fire management practices that replicate natural fire to the greatest extent. • Coordinate with Everglades National Park on all actions needed with monitoring Curlew Fire. 			
6. <u>Weather forecast for Period:</u> See weather insert.			
7. <u>General Safety Message:</u> Look up, look down, look all around for hazards, recognize them and mitigate them.

AIR OPERATIONS SUMMARY

OPERATIONAL PERIOD DATE: 05-23-2018

0900-2000

1. INCIDENT NAME: Avian Complex	2. PREPARED BY: Peter Kubiak	PREPARED DATE/TIME: 05/22/2018 1730	3. Sunrise: 0636 Sunset: 2008
---------------------------------	------------------------------	-------------------------------------	-------------------------------

4. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment,, etc.): Medivac Aircraft: 40MA
If hoist helicopter is needed for life threatening situation announce 784 on BICY command frequency. Give lat/long and ground contact.
IA air / ground will be on 85 north of I-75 and 59 south of I-75
 MTR- Located along state road 29. Fire Dispatch gets MTR activity every morning
 Do not over fly structures with external load missions. All aircraft should use strobes and running lights in smoky conditions.
 Hazards: Snags, non-incident aircraft, and winds.
 Contract helicopters working in seismic project area located south of I-75 in north central portion of Preserve.
AVIAN COMPLEX FLIGHT FOLLOWING WITH BICY DISPATCH

SAFETY MESSAGE

Martens Type III Team

INCIDENT: Avian Complex	OPERATIONAL PERIOD: Day
--------------------------------	--------------------------------

TOPICS:

Animal Bites and Aircraft Operations

Animal Bite Avoidance & Treatment

- Be aware you are in alligators, snakes, lions and bear country.
- Watch where you step and reach.
- Be informed on animal bite care.
- Assess the need and support Airway, Breathing & Circulation.
- Immobilize the affected extremity.
- Keep affected extremity at the level of the heart & assess distal pulse.
- Remove all constrictive jewelry.
- Clean the wound site and Identify the animal if possible (digital picture via cell?)
- Document the time of the bite
- Use a marker to outline initial swelling or ecchymosis and note time.
- Define and mark an area above the bite & measure circumference every 15 minutes.
- Consider transport to an emergency medical facility.
- Record vital signs every 15 minutes
- DO NOT – Ice or immerse in cold water, DO NOT incise the bite. DO NOT apply suction

Aircraft Operations in Poor Visibility

It is critical that all aviation resources have adequate horizontal and vertical visibility to operate safely. Requests for aviation resources are run up the chain of command to the division. When poor visibility is suspected, include this information when requesting aircraft. If visibility deteriorates, give an update to your overhead or to the pilot if you are in contact the incoming aircraft. In all cases, the pilot in command shall retain the final authority regarding when conditions are safe or not safe to perform any assigned operation. The availability of aircraft (i.e. extraction helicopters) may be delayed or not available due to limited visibility. Plan accordingly

**This team is dedicated to Firefighter Safety
Please notify us of any safety issues or concerns so Every Firefighter Goes Home!**

SAFETY OFFICERS	Eric Bader SOF2 and Opie Blackwell SOF2

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		<i>Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)</i>
Transport Request		<i>Air Ambulance / Short Haul/Hoist Ground Ambulance / Other</i>
Patient Location		<i>Descriptive Location & Lat. / Long. (WGS84)</i>
Incident Name		<i>Geographic Name + "Medical" (Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		<i>Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)</i>
Patient Care		<i>Name of Care Provider (Ex: EMT Smith)</i>

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG page 106

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
