Fire Weather Forecast

FORECAST NO: 7 NAME OF FIRE:

PREDICTION FOR: Thursday Day Shift UNIT:

SHIFT DATE: May 10, 2018 Incident Meteorologist: John Pendergrast | Robert Rickey (7)

FORECAST ISSUED: 1900 May 9, 2018

E: Avian Complex Fires

Big Cypress National Preserve

youn Penaergrasi | Roveri Rickey (

240-499-6649 623-703-7323

... Near Critical Fire Weather Conditions Again Today...

<u>DISCUSSION:</u> Today, high pressure will continue to bring very dry conditions, along with above normal temperatures and afternoon breezes. On Friday, the forecast calls for another round of hot temperatures, but increasing moisture will bring significantly higher humidity. In addition, expect scattered rain showers and isolated afternoon thunderstorms.

THURSDAY DAY SHIFT:

WEATHER: Partly cloudy with increasing high clouds and a slight chance of afternoon showers. WIND (20 FT): East-northeast 6 to 11 mph with gusts to 20 mph developing by mid-morning

MAX TEMPERATURES: 89 to 93F

MIN RH: 29%

LAL: 1 Chance measurable rain: 10%

DISPERSION: 68 MAX MIXING HEIGHT: 6800 TRANSPORT WINDS: Northeast 12 to 18 mph

TONIGHT (THURSDAY NIGHT):

WEATHER: Partly cloudy with patchy smoke and fog near fire areas.

WIND (20 FT): East-northeast 6 to 11 mph in the evening, diminishing to 2 to 4 mph late

MIN TEMPERATURES: 64 to 68F MAX RH: 93 to 98% LVORI 6 (max)

LAL: 1 Chance measurable rain: 10% in the evening, becoming 20% overnight

FRIDAY:

WEATHER: Mostly Cloudy with scattered showers and isolated thunderstorms. WIND (20 FT): East 6 to 11 mph with gust to 20 mph developing by mid-morning

MAX TEMPERATURES: 87 to 91F

MIN RH: 39%

LAL: 2 Chance measurable rain: 50%

DISPERSION: 55 MAX MIXING HEIGHT: 5500 TRANSPORT WINDS: East 12 to 18 mph

GENERAL OUTLOOK SATURDAY THROUGH MONDAY: Tropical moisture will move into the area on Saturday bringing good chances for showers and thunderstorms each day through at least early next week. Humidity will likely remain above 50 percent with daytime high temperatures in the mid-80s. Expect sustained wind speeds at or below 8 mph with directions switching from the east on Saturday to the south by Monday.

Sunrise Thursday: 6:42 am EDT Sunset Thursday: 20:03 pm EDT

a		
	FIRE BEHAVIOR FORECAST	
FORECAST NUMBER: #7	TYPE OF FIRE: Wildland	
FIRE NAME: Avian Complex	OPERATIONAL PERIOD: Thurs 05-10-18	
DATE ISSUED: Tues 05-09-18	TIME ISSUED: 1930	
UNIT: Big Cypress Preserve	WRITTEN: Kelly Cagle, Fire Behavior Analyst	Signed: Kelly Cook

FUEL ASSUMPTIONS:

3 Fuel Models Involved: Fuel Model 7 (Southern Rough), GR6 (grass model) TU3 (pine w/grass and shrub) TU3 has been the most volatile. GR6 can be extremely active coupled with wind. All 3 Fuel Types are burning readily. Consider all Fuels (even green ones) to be available fuel! Cypress Stringers and recent burn scars are also not retarding fire spread as well as they typically do. Overall – all fuels are critically dry.

Critical Thresholds in South Florida: RH < 40 Dispersion > 60 1 hr FM < 6%. All 3 of these parameters are met or exceeded today!

THURSDAY DAY SHIFT:

WEATHER: Partly cloudy with increasing high clouds and a slight chance of afternoon showers. WIND (20 FT): East-northeast 6 to 11 mph with gusts to 20 mph developing by mid-morning

MAX TEMPERATURES: 89 to 93F

MIN RH: 29%

LAL: 1 Chance measurable rain: 10%

DISPERSION: 68 MAX MIXING HEIGHT: 6800 TRANSPORT WINDS: Northeast 12 to 18 mph

General Fire Behavior Forecast: Critical burning conditions today! All factors are in place to support challenging fire behavior today. With the exception of heavy cypress fuels, expect high rates of spread in any pine, shrub or grass fuels. Spread direction will be towards the southwest and could be especially aggressive in timber stringers. Spotting will likely occur today. Surprisingly active backing and flanking fire should be expected as well.

Specific:

Buzzard: Division November/Juliet/Echo will once again be active divisions. Expect continued movement towards the west/ southwest. Runs in timber stringers possible by early afternoon. Favorable fuels exist downwind of known heat that will allow for fire activity similar to what we saw yesterday. IR data indicates heat in Alpha and Zulu, so expect these Divisions to be active with fire movement towards the south and west. Recent burns could be of some help in limiting fire spread in Zulu.

Flamingo: Expect interior burning on the southern side to continue. Where fuels allow, runs towards the southwest could occur as the interior portions of this fire fill in. Expect continued backing towards the east from the flank on the east side.

Curlew: There will likely be at least some active fire movement towards the west and south from the recent activity on the northern side of this fire. There are available fuels to support fire activity and growth, however – the further to the west that fire moves, the higher the likelihood of fire running out of favorable fuels and into less favorable fuel.

Initial Attack: Fuels remain very dry and conducive to rapid buildup. No lightning expected, but if start did occur, expect fire behavior to challenge control efforts, especially in timber or shrub palmetto fuels.

PREDICTIONS FOR MOST ACTIVE TIME OF PEAK BURNING PERIOD

Fuel Model	Fire Behavior
Grass	ROS 35 to 45 ch/hr and 8 to 11' Flame lengths
Shrub (palmettto/southern rough)	ROS 35 to 45 ch/hr and 9 to 12' Flame lengths
Timber Litter w/grass	ROS 40 to 49 ch/hr and 9 to 12' Flame lengths
Spotting Distance	¹ / ₄ mile possible
Probability of Ignition	66 % all models

AIR OPERATIONS: Little to no inversion expected. Good dispersion index today, so other than smoke, impacts to aviation activities are unlikely today.

FIRE BEHAVIOR SAFETY: Watch Out Situation # 12 – Cannot see main fire, not in contact with someone who can. Vegetation at Big Cypress makes it hard to see the main fire. Ensure that you have communication with someone (air attack) that can.

6. Control Operations/Work Assignments:

Task:

- Coordinate suppression operations with local jurisdictions trying to prevent fire spread to state/private jurisdictions.
- Use minimal impact suppression tactics when possible and appropriate.

Purpose:

• Minimize negative impacts to private property and natural resources.

End State:

• Fire contained on federal lands with minimal impacts to natural systems.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Document work done to protect cabins by taking before and after pictures of the camp structures. Document lat/long and brief description of the actions taken on a ICS-213. Send all information to: avianfinancecomplex@gmail.com.
- Document damages to cabins or infrastructure by with photos and details on a ICS 213. Send all information to: avianfinancecomplex@gmail.com.
- If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel

6. Control Operations/Work Assignments:

Task:

- Patrol and monitor fire with aviation and ground assets.
- Masticate Bundschu Grade in coordination with Resource Advisor.
- Use minimal impact suppression tactics when possible and appropriate.

Purpose:

- Limit fire spread east of Bundschu Grade and north of Interstate 75.
- Minimize negative impacts to private property and natural resources.

End State:

• Fire contained west of Bunschu Grade and south of HWY 75 with minimal impacts to natural systems.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Document work done to protect cabins by taking before and after pictures of the camp structures. Document lat/long and brief description of the actions taken on a ICS-213. Send all information to: avianfinancecomplex@gmail.com.
- Document damages to cabins or infrastructure by with photos and details on a ICS 213. Send all information to: avianfinancecomplex@gmail.com.
- If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel

6. Control Operations/Work Assignments:

Control Operations/Work Assignments:

Task:

• Assess and prep critical infrastructure. Use strategic firing operations to secure values at risk and prevent fire spread east of preserve boundary. Coordinate activities with Branch and adjacent recourses.

Purpose:

• Minimize negative impacts to infrastructure and private property and identify containment opportunities that are efficient, have a high probability of success and keep fire on the preserve.

End State:

• Fire contained the preserve with defensible lines and minimal to no impact on local communities.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Document work done to protect cabins by taking before and after pictures of the camp structures. Document lat/long and brief description of the actions taken on a ICS-213. Send all information to: avianfinancecomplex@gmail.com.
- Document damages to cabins or infrastructure by with photos and details on a ICS 213. Send all information to: avianfinancecomplex@gmail.com.
- If medical hoist ship is needed, request through "784" (law dispatch) on BICY CMD channel

6. Control Operations/Work Assignments:

Control Operations:

Task:

- Take suppression actions to keep fire south of Loop Rd, west of Redbird Lane, west Buckhalt Camp and Kirby Sorter Roadside Park
- Assess and prep critical infrastructure. Use strategic firing operations to secure values at risk in coordination with Branch and adjacent recourses.
- Coordinate suppression operation with Everglades NP to ensure protection of cultural and natural resources.

Purpose:

- Protect human life and minimize damage to private and public property
- Manage undesirable impacts to federal lands through the appropriate strategy and minimal impact suppression tactics.

End State:

- Protect private property and critical infrastructure within the fire perimeter.
- Minimize undesirable impacts to natural/cultural resources.

7. Special Instructions:

• If medical hoist ship is needed, request through "784" (law dispatch) on BICY CMD channel

6. Control Operations/Work Assignments:

Task:

• Provide resources for initial attack within the Big Cypress National Preserve, and the Florida Panther National Wildlife Refuge, and predesignated 1 mile mutual aide initial attack response area.

Purpose:

1 Incident Name

- Contain all new fires to the smallest extent possible while emphasizing for fire fighter safety.
- Use appropriate strategies and tactics that have the highest probability of success.

End State:

• Contain new fires within constraints directed by the BICY duty officer.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Normal shift 0800 2000 unless initial attack or extended staffing is required. Mitigate 2:1 as soon as possible.
- If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel

6. Control	Operations/Wor	k Assignments:							

Task:

• Use strategic firing operations around inholdings, carefully considering the tradeoffs with letting the fire burn in a natural mosaic.

Purpose:

• Protect all private in –holding camps, commercial infrastructure and keep disruption of landowner access to a minimum

End State:

• The fire will be managed under strategy commensurate with risk and suppression action taken with as little environmental impact as possible.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel

0900-2000

1. INCIDENT NAME: Avian Complex

2. PREPARED BY: Peter Kubiak

PREPARED DATE/TIME: 05/09/2018 1730

3. Sunrise: 0644 Sunset: 2003

4. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment,, etc.): Medivac Aircraft: 40MA

If hoist helicopter is needed for life threatening situation announce 784 on BICY command frequency. Give lat/long and ground contact.

MTR- Located along state road 29. Fire Dispatch gets MTR activity every morning

Do not over fly structures with external load missions. All aircraft should use strobes and running lights in smoky conditions. Hazards: Snags, non-incident aircraft, and winds.

Contract helicopters working in seismic project area located south of I-75 in north central portion of Preserve.

5. Squawk 1255

Flamingo Fire TFR 8/0703 up to 3000' MSL, Frequency 119.5750, expires 06/01/18

Buzzard Fire TFR-8/0704 up to 3000' MSL Frequency 119.5750, expires 06/01/18

HEALTH AND SAFETY MESSAGE SAFETY is YOU& ME

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: Avian Complex DATE: May 10, 2018

Major Hazards and Risks: Aviation, Driving, Inaccessible Country and Visitors

Aviation - Everyone has a role in safe aircraft operations on this incident. Request one if the mission requires it. If you are on the ground, be ready to communicate with the pilot and be sure the area is clear for bucket drops. Everyone keep eyes open for **outlaw aircraft**.

Driving - There have been several crews on the road at night, returning to motels after long shifts. Consider driving slower to prevent a wildlife wreck. There is a **NIGHT TIME speed limit of 45 mph** on Highway 41.

Inaccessible Country - Fires are moving into new areas where access may be less than what you have been using. Make an **intentional plan** of access and how you will handle an **emergency**.

Visitors - Visitors are still here so don't be surprised by visitors in the National Preserve enjoying their lands and homes. Expect **heavy traffic** on the roads late today as they return home.

10.ATTEMPTING FRONTAL ASSAULT ON FIRE

WATCH OUT

- **Lookouts** Can you see over the tree tops? Where is the fire? If air attack is your lookout, what happens when they leave your space? Does your lookout know your *location*?
- **Communications** Are you on *the right channel* with your lookout? Do you have extra batteries? Are you scanning? The right channels?
- **Escape Routes** Is there just one path through the *jungle*? Identify the ones that count and flag them. Find more than one....if you can.
- Safety Zones water won't work while wildlife want wetlands! Go for green areas near structures or black burned areas. You might need to create a black area as a last resort so carry some fire makers and identify some grassy areas with light fuels to Wag Dodge.

Incident Safety Officers: Buddy Kelley, Randy Miller Chris Wilson, Michael Heard, Galen Young, Matt Castellon, Damon Nelson, Andy Murrin, and Opie Blackwell

INCIDENT SAFETY ANALYSIS 215a

Avian Complex - Thursday, May 10, 2018

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All DIVS	Air Operations	 Follow " Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
All DIVS	Hazard Trees	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Cut within your skill/ability level
All DIVS	Extreme Fire Behavior	∼ Share weather observations with all personnel assigned to division. ∼ Establish "Trigger Points" to withdraw. ∼ Use "Risk Management" process prior to engaging in suppression actions, refer to page 1, IRPG.
IA	Roadside Response	 Do not engage in supression activities along I-75 unless Law Enforcement establishes traffic control. Conduct all operations as far as possible from traffic lanes. Park all vehicles on the same side of road. Use only vehicles equipped emergency lights along highways. Operate pumps from the non-traffic or from the cab. Anytime traffic is affected by the incident, contact the local law enforcement agency that has juridiction for assistance.
All DIVS	Injury & Medical Emergency	 Assist injured employee appropriate medical care. Use EMT's on Division for initial care. Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
All DIVS	Swamp Buggy	~ Ensure equipment is inspected and safe to use. Restrict swamp buggy use to approved trails. Ensure operator is trained and certified to operate. Passengers maintain 3 points of contact when loading and unloading. Ensure operator and passengers has proper PPE according to the BICY Operations Policy.
All DIVS	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. Be aware of lower speed limits at night. ~ Use the 3 second rule for following distance when driving. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs.
All DIVS	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Use "Structure Assessment" checklist, IRPG pages 12-16. Follow "HAZMAT Incident Operations" on pages 34-36 in IRPG.
All DIVS	Unburned Area/Reburn Potential	 Monitor weather. Base actions upon observed and predicted fire behavior. LCES Checklist (IRPG pg. 6). Look Up, Down and Around (IRPG pg. 2-3).

INCIDENT SAFETY ANALYSIS 215a

All DIVS	ATV/UTV use	~ Ensure equipment is inspected and safe to use. ~ Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. ~ Ensure operator is trained and certified to operate. ~ Ensure operator has proper PPE according to BICY policy, hardhats are acceptable only when speeds are less than 15 mph. ~ Question if it is mission critical.
All DIVS	Heat Related Illness (HRI)& Dehydration	 Drink Fluids throughout operational period (6-8 qts/shift). Maintain water/electrolyte ratio of 3 to 1. Carry extra water on line and cache water at drop points. Take Frequent breaks, minimum of 10 minutes every hour. Allow out of area resources time to acclimatize before expecting peak performance. Recognize symptoms of HEAT RELATED ILLNESS which include. Lack of energy Headaches, dizziness Lack of rest No hunger, poor eating habits Hot skin, and lack of sweating
All DIVS	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All DIVS	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
All DIVS	Wildlife & Livestock	 Watch out for wildlife & livestock inside fire area and along roadways. Clean up all debris and trash during each operational period. Be aware of your surrounding, watch footing and dont harass the wildlife.
All DIVS	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 79 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
All DIVS	Firefighter & Public Smoke Exposure	 Identify homes and structures with private parties remaining behind the evacuation. Identify personnel responsible for contacting private parties. Use warning lights and provide traffic control on roadways during smoky and night operations. Rotate crews out of smoky areas during firing and mop-up operations. Contact Communications when firing operations are initiated.
All DIVS	Poisonous Plants	~ Identify and Avoid hazard areas. ~ Launder clothing. ~ Shower frequently.
All DIVS	Unplanned Public Interaction	 Be alert to non-fire personnel in areas with suppression personnel. All non-fire personnel will be escorted while on fireline. Post lookouts to in areas with public to avoid conflicts with mission tasks. Ensure sufficient security to restrict access to exclusion area.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

ICS 205 Excel - Draft 031207

Logistic Information

Fueling

Monument Staging Area 0700 – 0800 ICP (Dona Drive) 0830 – 0930

Meals

Lunch:

Sack lunches available for line personnel at ICP every morning. Pick up with ice, water and Gatorade

*Order sack lunches daily through divisions by 0830 for the next day

Dinner Information:

If any evening meals are needed they must be ordered by Division before 12:00 in order to have them available for delivery for that evening.

Training Information

Are you a Trainee assigned to this incident? Do you have an initiated Position Task Book?

If so, please come see the Incident Training Specialist (TNSP). Remember to bring your initiated Task Book and Incident Qualification Card (Red Card).

The QR Code will bring you to an on-line version of the Incident Trainee/Training Data Fore (TNSP-1) to be completed before seeing the TNSP.

^{*}Fueling for resources without agency or self-sufficient fueling capabilities*

Human Resource Message

The mission of the Gold Team is to safely, effectively and efficiently manage the Avian Complex by maintaining a team of skilled and productive personnel.

During this incident we will strive to successfully complete our mission and achieve our objectives while creating a positive, drug and alcohol free work environment for all assigned incident personnel.

The Gold Team fully supports EEO and will not tolerate sexual harassment or any form of discrimination!

All inappropriate behavior will be dealt with promptly. Disciplinary action and reporting back to an individual's home unit will be initiated as necessary.

Please report any incidents of inappropriate behavior to your supervisor, or myself immediately.

Steve Parrish, Incident Commander

Finance Message

- Only 1 CTR per single resource.
- > CTRs with over 16 hours will need to have justification and mitigation plans provided in the remarks section. These CTRs must be signed by Section Chief.
- Meals breaks (per 8hrs) need to be shown on CTRs. Provide Justification in the remark section if no break was taken.
- Notify Finance 2 days prior to Demob day.
- ➤ Please indicate your Division and fire name in the remarks section.
- Questions can be emailed to: <u>avianfinancecomplex@gmail.com</u>
