Avian Complex Fires

Fire Weather Forecast

NAME OF FIRE:

FORECAST NO: 8

PREDICTION FOR: Friday Day Shift UNIT: Big Cypress National Preserve

SHIFT DATE: May 11, 2018 Incident Meteorologist: John Pendergrast | Robert Rickey (7)

FORECAST ISSUED: 1900 May 10, 2018 240-499-6649 623-703-7323

<u>DISCUSSION:</u> Hot and dry conditions continue on Friday. On Saturday, increasing moisture will lead to higher humidity and increasing chances for showers beginning late Saturday afternoon.

FRIDAY DAY SHIFT:

WEATHER: Partly cloudy.

WIND (20 FT): East-northeast 6 to 11 mph with gusts to 22 mph developing by mid-morning

MAX TEMPERATURES: 89 to 93F

MIN RH: 31%

LAL: 1 Chance measurable rain: 10%

DISPERSION: 68 MAX MIXING HEIGHT: 5500 TRANSPORT WINDS: East 12 to 18 mph

TONIGHT (FRIDAY NIGHT):

WEATHER: Partly cloudy with increasing high clouds. Patchy smoke near fire areas. WIND (20 FT): East-northeast 6 to 11 mph in the evening, diminishing to 2 to 4 mph late

MIN TEMPERATURES: 59 to 64F
MAX RH: 93 to 98% LVORI 6 (max)
LAL: 1 Chance measurable rain: 10%

SATURDAY:

WEATHER: Mostly cloudy with a slight chance of showers during the day. Cloudy with scattered showers in the late

afternoon and overnight.

WIND (20 FT): East 6 to 11 mph with gust to 20 mph developing by mid-morning

MAX TEMPERATURES: 84 to 88F

MIN RH: 44%

LAL: 2 Chance measurable rain: 20%, becoming 50% in the late afternoon.

DISPERSION: 38 MAX MIXING HEIGHT: 3500 TRANSPORT WINDS: East 12 to 18 mph

GENERAL OUTLOOK SUNDAY THROUGH TUESDAY: Tropical moisture in place across the area on Sunday will bring scattered to numerous showers, along with isolated thunderstorms. Good chances for showers continue each day through at least mid-week. Humidity will likely remain above 50 percent with daytime high temperatures in the mid to low 80s. Expect sustained wind speeds below 10 mph with directions varying from the south to southeast.

Sunrise Thursday: 6:41 am EDT Sunset Thursday: 20:03 pm EDT

Source: US Naval Observatory

Current Incident area RAWS conditions

FIRE BEHAVIOR FORECAST										
FORECAST NUMBER: #8	TYPE OF FIRE: Wildfire									
FIRE NAME: Avian Complex	OPERATIONAL PERIOD: Friday 11 May 2018									
DATE ISSUED: Thursday 10 May 2018	TIME ISSUED: 1930									
UNIT: FL-BCP	SIGNED: Michael W. Housh									
	Typed/printed: Michael W. Housh FBAN (T)									

INPUTS

WEATHER SUMMARY:

TODAY (Wednesday): See Fire Weather Forecast.

WEATHER: Partly cloudy with a slight chance of showers.

<u>MAX Temp</u>: 93 degrees <u>MIN Rh</u>: 31% <u>WIND</u>: East\Northeast 6 to 11 mph <u>LAL</u>: 1 <u>CWR</u>: 10% <u>DISPERSION</u>: 68 MAX <u>MIXING HEIGHT</u> 5500 <u>TRANSPORT WINDS</u> East 12 to 18 mph.

GENERAL FUEL ASSUMPTIONS There are three vegetative types to consider within the fire area, grass, shrub, and timber\grass All three are very dry and burning readily (even the green ones) Cypress Stringers and recent burn scars may not be dependable barriers to fire spread (rates of spread and intensity may be reduced).

ERC, KBDI, and Burning Index indices are all well above the 90th percentile

The fuel moisture for today is:

1 hr 5% 10 hr 10% 100 hr 15 % Current KBDI – 744 (200 points above avg)

OUTPUTS

FIRE BEHAVIOR

GENERAL

No precipitation received over the fire area again yesterday combined with extremely low humidity's (30-39%) over the fire area led to some increased fire activity earlier in the burning period (1100-1200) than previous days. Expect increasing fire behavior and spread potential today as fuels remain critically dry and will continue to dry throughout the day with forecasted low relative humidity and only a slight chance of showers. Winds will be out of the E\NE spreading any active fire fronts to the W\SW. Last measurable precipitation over the fire area was 05 May.

			Fire B	ehavior	
Vegetation Type	Fuel Model	ROS (ch\hr)	FL (ft)	PIG (%)	Spot Dist (mi)
Grass	GR6	10-51	5-10	67	0.3
Shrub (palmetto\southern rough)	7	13-54	4-8	67	0.3
Timber Litter w\grass	TU3	14-57	5-11	67	0.3

SPECIFIC:**Very Low Rh Forecasted for Today**

>Flamingo: DIV BB, Lower fire intensities and limited spread potential to the W\SW as the fire continues to move into less "active" fuels. Div OO the interior pocket will continue to clean itself up. The eastern flank will continue to back and flank into the wind.

>Buzzard: DIV J Fire will continue to spread to the west in receptive fuels with active spread rates particularly in the timbered stringers. DIV N fire will continue to spread by flanking to the north. DIV A&Z fire will continue to spread by flanking to the south. If the winds shifts more out of the NE expect fire to move more to the SW at higher ROS. Little to no fire spread potential to the East (DIV T) due to the presence of a large Cypress strand and unfavorable winds

>Curlew: Fire spread to the W\SW in the grass prairie. Fire may reach the timber stands to the W/NW today >Initial Attack: Forecasted relative humidity combined with extremely dry fuels and high dispersion rates means that any new starts have a high potential for significant growth especially in the timbered stringers.

AIR OPERATIONS:

Any inversion should begin to burn off around 0930.. Increased smoke may impact the ability to support ground operations especially early in the operational period.

SAFETY

Dispersion Rates will be high today. This combined with critically dry fuels equals a high potential for active fire spread and behavior. Ensure lookouts are in place and keep informed of weather. Possibility of sea-breeze exists for today so be mindful of any major shifts in wind direction.

6. Control Operations/Work Assignments:

Task:

- Coordinate suppression operations with local jurisdictions trying to prevent fire spread to state/private jurisdictions.
- Use minimal impact suppression tactics when possible and appropriate.

Purpose:

• Minimize negative impacts to private property and natural resources.

End State:

• Fire contained on federal lands with minimal impacts to natural systems.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Document work done to protect cabins by taking before and after pictures of the camp structures. Document lat/long and brief description of the actions taken on a ICS-213. Send all information to: avianfinancecomplex@gmail.com.
- Document damages to cabins or infrastructure by with photos and details on a ICS 213. Send all information to: avianfinancecomplex@gmail.com.
- If medical hoist ship is needed, request through "784" (law dispatch) on BICY CMD channel

ii iiiedidai iioi	in medical holds still be needed, request through 101 (land dispatch) on Biol Chilb chaine.

6. Control Operations/Work Assignments:

Task:

- Patrol and monitor fire with aviation and ground assets.
- Continue fuels reduction project on Bundschu Grade in coordination with Resource Advisor.
- Use minimal impact suppression tactics when possible and appropriate.

Purpose:

- Limit fire spread east of Bundschu Grade and north of Interstate 75.
- Minimize negative impacts to private property and natural resources.

End State:

• Fire contained west of Bunschu Grade and south of HWY 75 with minimal impacts to natural systems.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Document work done to protect cabins by taking before and after pictures of the camp structures. Document lat/long and brief description of the actions taken on a ICS-213. Send all information to: avianfinancecomplex@gmail.com.
- Document damages to cabins or infrastructure by with photos and details on a ICS 213. Send all information to: avianfinancecomplex@gmail.com.

6. Control Operations/Work Assignments:

Task:

- Assess and prep critical infrastructure and private structures along Turner River Rd. Use strategic firing operations to secure in coordination with Branch and adjacent recourses.
- Scout and communicate potential containment opportunities east of HWY 29.

Purpose:

• Minimize negative impacts to infrastructure and private property and identify containment opportunities that are both efficient and have a high probability of success and keep the fire east of HWY 29.

End State:

• Fire contained east of Turner River Rd on defensible lines with minimal to no impact on local communities.

- Follow tracked vehicle requirement restrictions.
- · Establish and maintain LCES during operational period.
- Document work done to protect cabins by taking before and after pictures of the camp structures. Document lat/long and brief description of the actions taken on a ICS-213. Send all information to: avianfinancecomplex@gmail.com.
- Document damages to cabins or infrastructure by with photos and details on a ICS 213. Send all information to: avianfinancecomplex@gmail.com.
- In conjunction with Liaison, work with Tribal representatives to prioritize workload under their jurisdiction.
- If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel

6. Control Operations/Work Assignments:

Control Operations:

Task:

- Take suppression actions to keep fire south of Loop Rd, west of Redbird Lane, west Buckhalt Camp and Kirby Sorter Roadside Park
- Assess and prep critical infrastructure. Use strategic firing operations to secure values at risk in coordination with Branch and adjacent recourses.
- Coordinate suppression operation with Everglades NP to ensure protection of cultural and natural resources.

Purpose:

- Protect human life and minimize damage to private and public property
- Manage undesirable impacts to federal lands through the appropriate strategy and minimal impact suppression tactics.

End State:

- Protect private property and critical infrastructure within the fire perimeter.
- Minimize undesirable impacts to natural/cultural resources.

7. Special Instructions:

• If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel

Task:

Provide resources for initial attack within the Big Cypress National Preserve, and the Florida Panther National Wildlife Refuge, and predesignated 1 mile mutual aid initial attack response area.

Purpose:

1. Incident Name:

- Contain all new fires to the smallest extent possible while emphasizing for fire fighter safety.
- Use appropriate strategies and tactics that have the highest probability of success.

End State:

Contain new fires within constraints directed by the BICY duty officer.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- Normal shift 0800 2000 unless initial attack or extended staffing is required. Mitigate 2:1 as soon as possible.
- If medical hoist ship is needed, request through "784" (law dispatch) on BICY CMD channel

6. Contro	I Operations/Wor	k Ass	ianments:										

Task:

• Use strategic firing operations around inholdings, carefully considering the tradeoffs with letting the fire burn in a natural mosaic.

Purpose:

• Protect all private in –holding camps, commercial infrastructure and keep disruption of landowner access to a minimum

End State:

• The fire will be managed under strategy commensurate with risk and suppression action taken with as little environmental impact as possible.

- Follow tracked vehicle requirement restrictions.
- Establish and maintain LCES during operational period.
- If medical hoist ship is needed , request through "784" (law dispatch) on BICY CMD channel
- Satellite phone: 808-851-6121

AIR OPERATIONS SUMMARY

OPERATIONAL PERIOD DATE: 05-11-2018

0900-2000

1. INCIDENT NAME: Avian Complex

2. PREPARED BY: Peter Kubiak

PREPARED DATE/TIME: 05/10/2018 1730

3. Sunrise: 0642 Sunset: 2003

4. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment,, etc.): Medivac Aircraft: 7HE

If hoist helicopter is needed for life threatening situation announce 784 on BICY command frequency. Give lat/long and ground contact.

MTR- Located along state road 29. Fire Dispatch gets MTR activity every morning

Do not over fly structures with external load missions. All aircraft should use strobes and running lights in smoky conditions. Hazards: Snags, non-incident aircraft, and winds.

Contract helicopters working in seismic project area located south of I-75 in north central portion of Preserve.

SAFETY MESSAGE

Fire fighter safety comes first on every fire, every time

Night Operations:

- Foot and road travel in poor visibility.
- Delayed medical response due to slower travel.
- Complacency at night.
- Snags

- No Air Support.
- Snakes and insects
- Spotty Commo in some areas
- Heavy Fuel Loading

Deliberate Risk Assessment:

A PROCEDURAL APPROACH TO SAFETY

In a fire situation there are subjective hazards that we as firefighters create, and there are objective hazards such as fire entrapment, snags, rolling debris, and terrain that are inherent to firefighting. The subjective hazards we have control over just by using our attitudes and abilities. The objective hazards we cannot completely eliminate. The possibility of injury or entrapment is always there, the probability may be large or small. We must take steps to reduce the risks associated with our actions. By using a set procedure each operational period, we can minimize exposure to hazards and better ensure our safety by the following steps.

- Determine what the assignment is
- Assess the situation
- Identify the hazards
- Analyze the risks
- Implement steps to ensure safety
- Re-analyze the situation as it changes

The Incident Risk Assessment is the tool that has been developed to analyze and display this procedural approach. A large wall version of the Incident Risk Assessment is displayed at each briefing and the 215a is displayed in the IAP. It is worthwhile to look at the hazards that have been identified and the mitigation measures necessary to make the risk acceptable. Please let your Safety Officer know if there are other hazards out there we have not identified.

Ensure LCES is in place and consistently evolving for your situation.

Safety Officers: Buddy Kelley, Randy Miller, Kris Wilson (T) Mike Heard (t)

INCIDENT SAFETY ANALYSIS 215a

Avian Complex - Friday, May 11, 2018

8. Location	9. Hazard	6. Control or Abatement Action (Engineering, Administrative, PPE, Avoidance, Education, etc)
All DIVS	Air Operations	 Follow " Aviation Watch-Out Situations" on page 44, IRPG. Don't plan on air resources for medical transport or resupply. Refer to page 57, IRPG for directing bucket drops. Ensure positive communication with all air resources.
All DIVS	Hazard Trees	 Follow "Hazard Tree Safety" guidelines, IRPG page 22. Post lookouts, or use a spotter in mop-up areas with personnel. Don't park vehicles or take breaks in high concentrations of hazard trees. Establish trigger points for disengagement during high wind events. Remember that the hazard zone extends a minimum of 2 1/2 tree heights. Cut within your skill/ability level
All DIVS	Extreme Fire Behavior	 Share weather observations with all personnel assigned to division. Establish "Trigger Points" to withdraw. Use "Risk Management" process prior to engaging in suppression actions, refer to page 1, IRPG.
IA	Roadside Response	 Do not engage in supression activities along I-75 unless Law Enforcement establishes traffic control. Conduct all operations as far as possible from traffic lanes. Park all vehicles on the same side of road. Use only vehicles equipped emergency lights along highways. Operate pumps from the non-traffic or from the cab. Anytime traffic is affected by the incident, contact the local law enforcement agency that has juridiction for assistance.
All DIVS	Injury & Medical Emergency	 Assist injured employee appropriate medical care. Use EMT's on Division for initial care. Follow medical protocol as outlined in ICS-206 & IRPG Pgs 99-108
All DIVS	Swamp Buggy	 Ensure equipment is inspected and safe to use. Restrict swamp buggy use to approved trails. Ensure operator is trained and certified to operate. Passengers maintain 3 points of contact when loading and unloading. Ensure operator and passengers has proper PPE according to the BICY Operations Policy.
All DIVS	Driving & Traffic	~ Practice "Defensive Driving" techniques traveling on all roads and city streets. ~ Use spotters when backing. ~ Honk horn to alert personnel when backing. ~ Always use headlights. ~ Yield to pedestrians and bicycles. ~ Observe posted speed limits. Be aware of lower speed limits at night. ~ Use the 3 second rule for following distance when driving. ~ Avoid distractions (eating, cell phones, radio). ~ Ensure that windshields are kept clean of dust and bugs.
All DIVS	Structure Protection & HAZMAT	 Review "Wildland Urban Interface" Watch outs, IRPG page 12. Use "Structure Assessment" checklist, IRPG pages 12-16. Follow "HAZMAT Incident Operations" on pages 34-36 in IRPG.
All DIVS	Unburned Area/Reburn Potential	 Monitor weather. Base actions upon observed and predicted fire behavior. LCES Checklist (IRPG pg. 6). Look Up, Down and Around (IRPG pg. 2-3).

INCIDENT SAFETY ANALYSIS 215a

All DIVS	ATV/UTV use	 Ensure equipment is inspected and safe to use. Restrict UTV's to max width of 50" on ATV trails due to width and severe out sloped conditions. Ensure operator is trained and certified to operate. Ensure operator has proper PPE according to BICY policy, hardhats are acceptable only when speeds are less than 15 mph. Question if it is mission critical.
All DIVS	Heat Related Illness (HRI)& Dehydration	~ Drink Fluids throughout operational period (6-8 qts/shift). ~ Maintain water/electrolyte ratio of 3 to 1. ~ Carry extra water on line and cache water at drop points. ~ Take Frequent breaks, minimum of 10 minutes every hour. ~ Allow out of area resources time to acclimatize before expecting peak performance. ~ Recognize symptoms of HEAT RELATED ILLNESS which include. o Lack of energy o Headaches, dizziness o Lack of rest o No hunger, poor eating habits o Hot skin, and lack of sweating
All DIVS	Heavy Equipment Operations	 Ensure communications are established with operators. Use hand signals if other communications are unavailable. Maintain a 50'-100' exclusion area around equipment and increase it to 1 1/2 times tree height when in timber. Use a spotter when backing. Avoid working below heavy equipment.
All DIVS	Communications	 Maintain communication with aviation resources, and suppression organization. Ensure all know frequency and protocol for contacting resources. Utilize the ICS 205. Utilize human repeaters when working in dead spots.
All DIVS	Wildlife & Livestock	 Watch out for wildlife & livestock inside fire area and along roadways. Clean up all debris and trash during each operational period. Be aware of your surrounding, watch footing and dont harass the wildlife. Be on the lookout for poisonous snakes. Watch were you step and place your hands.
All DIVS	Chain Saw Operations	~ Follow "Hazard Tree Safety" guidelines, IRPG page 22 ~ Look up, Look down, Look around for hazard tree indicators. ~ Only fell and buck trees within your expertise, and training. ~ Follow "Procedural Felling Operations" on page 79 in IRPG. ~ Do not fall trees during high wind events. ~ Ensure proper use of all required PPE.
All DIVS	Firefighter & Public Smoke Exposure	 Identify homes and structures with private parties remaining behind the evacuation. Identify personnel responsible for contacting private parties. Use warning lights and provide traffic control on roadways during smoky and night operations. Rotate crews out of smoky areas during firing and mop-up operations. Contact Communications when firing operations are initiated.
All DIVS	Poisonous Plants	Identify and Avoid hazard areas.Launder clothing.Shower frequently.
All DIVS	Unplanned Public Interaction	 Be alert to non-fire personnel in areas with suppression personnel. All non-fire personnel will be escorted while on fireline. Post lookouts to in areas with public to avoid conflicts with mission tasks. Ensure sufficient security to restrict access to exclusion area.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

ICS 205 Excel - Draft 031207

Logistic Information

Fueling - Location and Hours

ICP (Dona Drive) 0700 – 0930, 1130-2030

Monument Staging Area 0930 – 1130

Meals

Lunch:

Sack lunches available for line personnel at ICP every morning. Pick up with ice, water and Gatorade

*Order sack lunches daily through divisions by 0830 for the next day

Dinner Information:

If any evening meals are needed they must be ordered by Division before 12:00 in order to have them available for delivery for that evening.

Training Information

Are you a Trainee assigned to this incident? Do you have an initiated Position Task Book?

If so, please come see the Incident Training Specialist (TNSP). Remember to bring your initiated Task Book and Incident Qualification Card (Red Card).

The QR Code will bring you to an on-line version of the Incident Trainee/Training Data Fore (TNSP-1) to be completed before seeing the TNSP.

^{*}Fueling for resources without agency or self-sufficient fueling capabilities*

Incident Trainee/Trainer Data Form

PLEASE PRINT	of
A. Trainee Data

Human Resource Message

The mission of the Gold Team is to safely, effectively and efficiently manage the Avian Complex by maintaining a team of skilled and productive personnel.

During this incident we will strive to successfully complete our mission and achieve our objectives while creating a positive, drug and alcohol free work environment for all assigned incident personnel.

The Gold Team fully supports EEO and will not tolerate sexual harassment or any form of discrimination!

All inappropriate behavior will be dealt with promptly. Disciplinary action and reporting back to an individual's home unit will be initiated as necessary.

Please report any incidents of inappropriate behavior to your supervisor, or myself immediately.

Steve Parrish, Incident Commander

Finance Message

- Only 1 CTR per single resource.
- > CTRs with over 16 hours will need to have justification and mitigation plans provided in the remarks section. These CTRs must be signed by Section Chief.
- Meals breaks (per 8hrs) need to be shown on CTRs. Provide Justification in the remark section if no break was taken.
- Notify Finance 2 days prior to Demob day.
- ➤ Please indicate your Division and fire name in the remarks section.

AFTER HOUR MEDICAL EMERGENCY CALL TIM EXLINE (MEDL) 239-227-0290 MEDICAL PLAN (ICS 206 WF)

Controlled Unclassified Information//Basic

Medical Incident Report

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH

MEDICAL	EMEROENCE TO INITIATE RESPONSE I ROM INTEREST	VIONICATIONS/DISFATCH.						
Use the following items to communicate situation to communications/dispatch.								
 CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report) Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic." INCIDENT STATUS: Provide incident summary (including number of patients) and command structure. Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care." 								
Severity of Emergency / Transport Priority	Y Y Y I I I VELLOW / PRIORILY / Serious injury or liness Evacuation may be DELAVED it becessary							
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)						
Transport Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other						
Patient Location		Descriptive Location & Lat. / Long. (WGS84)						
Incident Name		Geographic Name + "Medical" (Ex: Trout Meadow Medical)						
On-Scene Incident Commander	On-Scene Incident Commander Name of on-scene IC of Incident within an Incident (Ex: TFLD Jones)							
Patient Care Name of Care Provider (Ex: EMT Smith)								
3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)								
Patient Assessment: See IRPG page 106								
Treatment:								

4. TRANSPORT PLAN:

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Example: Paramedic/EMT, Crews, Immobilization Devices, AED, Oxygen, Trauma Bag, IV/Fluid(s), Splints, Rope rescue, Wheeled litter, HAZMAT, Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable Channel Name/Number Receive (RX) Tone/NAC Tone/NAC Function Transmit (TX) COMMAND AIR-TO-GRND **TACTICAL**

- 7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead.
- 8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
