Safety Message

Avian Complex Wildfire
Big Cypress Preserve
May 22, 2018

WEATHER – Temperatures for today will range in the 80-90 degree range. For firefighters, this poses the possibility of **HEAT-RELATED INJURIES**. It is very important that you stay hydrated and take breaks as often as possible to cool down. Keep eyes on each other as heat stress symptoms are often not recognized by the individual. A ratio of 3:1 water to electrolyte replacement works well. **AVOID ENERGY DRINKS**. Staying healthy depends not only on your fluid intake but on what you are eating as well. Eat healthy meals. Fatigue is another factor. Follow the 2:1 work rest ratio. This wildfire is winding down but it will be a long summer.

Keep an eye on your fellow firefighters, drink lots of water and take frequent breaks!

HEAT-RELATED INJURIES SITUATIONAL AWARENESS

- **Heat Cramps**
Signs/Symptoms – sweating, dehydration, muscle cramps
Treatment – shade, cool off, loosen clothing, stretch tight muscles, slowly give fluids, monitor
- **Heat Exhaustion**
Signs/Symptoms - profuse sweating, cool/clammy skin, dizziness, headache, muscle cramps, dehydration
Treatment – shade, cool off, and loosen clothing, stretch muscles, slowly give fluids, monitor, EMS if no immediate improvement
- **Heat Stroke – LIFE THREATENING**
Signs/Symptoms – hot & dry skin, rapid & weak pulse, rapid pulse rate (100-120 beats at rest), hyperventilation (panting), vomiting, dizziness, confusion, irritability, seizures, loss of consciousness
Treatment – cool body as quickly as possible with water, use dump tank, engine water, canteen, etc, **MEDEVAC IMMEDIATELY**

DRIVING Observe the posted speed limits. Expect all types of local vehicle traffic.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.
