36. Projected Incident Activity, Potential, Movement, Escalation, or Spread and influencing factors during the next operational period and in 12-, 24-, 48-, and 72-hour timeframes:

Fire will continue to burn actively in the pine and shrub fuels throughout the interior of the fire. Fire spread continues to be predominantly fuels driven, following fingers and pockets of pine/shrub fuels. When winds and fuels line up very active fire spread and increased rates of spread occur. Some short range spotting can be expected.

24 hours: 48 hours: 72 hours:

Anticipated after 72 hours:

37. Strategic Objectives (define planned end-state for incident):

Keep current fire to the east of Nobles Grade to prevent large fire growth to the west. Keep fire west of the Sanctuary subdivision located 6 miles east of the fire to prevent significant structure protection and need for additional resources. Keep fire spread north of I-75, and south of the Big Cypress Reservation/Big Cypress National Preserve boundaries.

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond.
Summarize primary incident threats to life, property, communities and community stability, residences, health care
facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural

38. Current Incident Threat Summary and Risk Information in 12-, 24-, 48-, and 72-hour timeframes and beyond. Summarize primary incident threats to life, property, communities and community stability, residences, health care facilities, other critical infrastructure and key resources, commercial facilities, natural and environmental resources, cultural

Incident: Orange Blossom

resources, and continuity of operations and/or business. Identify corresponding incident-related potential economic or cascading impacts:

The Sanctuary subdivision is approximately 6 miles east of the fire perimeter. Fire is not expected to reach this 12 hours: area within this timeframe. I-75 is approximately 3 miles to the south. Fire encroachment and smoke impacts to I-75 could pose major transportation disruptions and create significant travel safety concerns.

24 hours: 48 hours: 72 hours:

Anticipated after 72 hours:

- 39. Critical Resource Needs in 12-, 24-, 48-, and 72-hour timeframes and beyond to meet critical incident objectives. List resource category, kind, and/or type, and amount needed, in priority order:
- 12 hours:
- 24 hours:
- 48 hours:
- 72 hours:

Anticipated after 72 hours:

- 40. Strategic Discussion: Explain the relation of overall strategy, constraints, and current available information to:
- 1) critical resource needs identified above,
- 2) the Incident Action Plan and management objectives and targets,
- 3) anticipated results.
- 41. Planned Actions for Next Operational Period:

Continued line improvement along the western and northern perimeters. Mop-up and patrol will occur on the other perimeters as conditions warrant.

- 42. Projected Final Incident Size/Area: 6,000
- 43. Anticipated Incident Containment or Completion Date:
- 44. Projected Significant Resource Demobilization Start Date:
- 45. Estimated Incident Costs to Date: \$833,000
- 46. Projected Final Incident Cost Estimate:
- 47. Remarks (or continuation of any blocks above list block number in notation):
- SA IMT1 Blue Team (Wilkins) assumed command of the fire today.
