INCIDENT OBJECTIVES (ICS 202)

1. Incident Name: <p style="text-align: center;">Ocala IA</p>	2. Operational Period:	Date From: 2/24/2026 Time From: 0700	Date To: 2/25/2026 Time To: 2000
---	-------------------------------	---	-------------------------------------

3. Objective(s):

Provide for firefighter and public safety.

Respond to initial attack fires within the Ocala National Forest.

Respond to initial attack fires within the the 10-mile Cooperative Mutual Aid Zone once requested.

Conduct all response operations in a safe, effective, and efficient manner.

In addition to life and property, prioritize protection of cultural, natural, and heritage resources.

Continue consistent and effective messaging with cooperators and the public.

4. Operational Period Command Emphasis

Firefighter and public safety is the #1 priority. Continue operations in a safe, effective, and efficient manner.

General Situational Awareness

Be aware of heavy traffic and distracted drivers on all roads; be attentive, and drive defensively.

Extended duration drought conditions continue, leading to accelerated burning of supporting roots in fire-damaged trees.

A warming and drying trend is forecasted to continue; fuels will continue to cure.

Recent rainfall was insufficient to have any significant effect on fuels. Expect fuels to become increasingly receptive over the coming days, especially with forecasted freezing temps, lowering humidities, and gusty winds.

INCIDENT: Ocala IA/Bills Branch Wildfire

DATE: 02/24/2026 Operational Period: 0700-2000

OPERATIONAL TEMPO

Maintaining operational tempo is not solely about speeding up to match or exceed the pace of the environment. It is also about knowing when operations should slow down and why.

We are most vulnerable to accidents and errors when operational tempo changes, especially when it changes quickly. Maintaining good situation awareness despite changes in operational tempo represents

considerable challenge. The key to managing operational tempo successfully is monitoring the changing environment and capabilities of the team and then applying good judgment to determine whether to push forward or pull back while making necessary adjustments.

Working with Heavy Equipment

- Don't approach until you have eye contact with the operator and all implements have been lowered.
- Avoid working downhill from equipment.
- Communicate all hazards to the operator.
- During night shift or low visibility, use a headlamp or glow sticks so the operator can see you.
- Equipment operators can have difficulty seeing ground personnel; take responsibility for your safety and those around you.

Driving

- When driving, keep the speed at or below the posted speed limit and turn your headlights on. Is the posted speed limit safe under current conditions and traffic?
- Use caution on unimproved roads, as some have soft shoulders and only one lane with pullouts.
- Road surfaces are variable with washboard conditions and thick dust that can compromise turning and braking.
- Watch for and anticipate stock and wildlife, especially at dusk and dawn.
- Always fasten your seatbelt before the vehicle is set into motion. Use backrests.
- Don't tailgate, especially in dusty conditions.

Hazard Tree Indicators

- Tree burning for any period of time.
- High-risk tree species (rotten and shallow roots).
- Numerous downed trees in the area.
- Dead, broken, or burning tops and limbs overhead
- Accumulation of needles, bark, or limbs.
- Leaning or hung-up trees.

Eliminate the hazards with qualified sawyers and modify suppression tactics or fireline locations to avoid high-risk areas. Always provide timely feedback to others regarding any hazard trees.

FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency / Transport Priority	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
