WEATHER DISCUSSION

High pressure, both aloft and on the surface, will continue to dominate into early next week but there are signs of at least a subtle pattern change towards the middle of next week. This will result in temperatures well above seasonal and a continuation of elevated humidity levels. Fog this morning should burn off by late morning but likely redevelop once again tonight. Southeast winds will largely persist for the next few days. Precipitation chances do increase slightly moving forward mainly but mainly confined to the hottest time of the day.

TODAY'S FORECAST Continued dry and warm Sunrise: 6:59 EST

Weather: Morning fog will give way to partly cloudy skies. Cumulus build ups are expected during the afternoon with a very slight chance of an isolated shower. Continued very warm with above average temperatures.

High Temperatures: 81 to 85 (a degree or two higher versus yesterday)
 Minimum RH: 50 to 55% (2 to 5% higher versus yesterday)
 20 foot winds: East to southeast 3 to 6 mph with gusts as high as 8 mph
 Inversion: Breaking by noon Stability: Moderate % of Wetting rain: 0%

TONIGHT'S FORECAST Fog likely to develop Sunset: 6:38 EST

Weather: Partly cloudy in the evening, becoming mostly clear by midnight. Patchy fog is expected to develop by morning and may be dense in lower lying spots.

Low Temperatures: 56 to 60
 Minimum RH: 95 to 100%
 20 foot winds: East 3 to 6 in the evening, becoming calm
 Inversion: Developing after midnight LVORI: 9 % of Wetting rain: 0%

FRIDAY'S FORECAST Moisture levels start to increase

High pressure will remain in control but moisture levels will be increasing with a 30% chance of afternoon showers. Otherwise, conditions will remain partly cloudy and warm with highs in the mid to upper 80s. Humidity will drop into the lower to mid 50s. Southeast winds are forecast to be 4 to 8 mph with a few higher gusts.

HEALTH AND SAFETY MESSAGE

SAFETY starts with YOU

We are ALL accountable for SAFE behaviors

INCIDENT: Ocala IA/Bills Branch Wildfire	DATE: March 5, 2026 TIME: 0700-2000
---	--

Major Hazards and Risks:
Driving, Ticks/Insects, Heavy Equipment, Snags

Fire Order of the Day – *Fight fire aggressively, having provided for safety first*

Narrative:

Driving – Adhere to posted speed limits and slow down as conditions dictate. Expect the unexpected around every blind curve. Slow down on washboard surfaces and increase following distance on dusty roads. It takes only a second of inattention or distraction to become involved in an accident. Bike week in Daytona is ongoing, leading to heavy traffic on major roads throughout the area.

Ticks/Insects – Check for ticks immediately after being in an area where ticks may be present. Report any ticks that are attached to your skin to an immediate supervisor. Ensure a CA-1 is submitted. Stinging insects such as Yellow Jackets, Puss Moths, Fire Ants can be encountered out in the woods. Epi pens provide relief. IRPG pg. 110

Heavy Equipment – Maintain clearance and ensure you have contacted the operator before approaching. Stay at least 100’ in front and 50’ behind the equipment. If following a plow line, be aware as a Yellow Jacket nest may have been disturbed. IRPG pg. 87

Snags – Always maintain a strong situation awareness. Identify potentially fire weakened trees, flag as hazardous. Be alert especially when the wind increases. Eliminate these hazards with qualified sawyers. Keep nonessential personnel 2 ½ tree lengths away during falling operations. IRPG pg. 20-21

Heat Related Injury

(HRI) is a potentially fatal condition caused by:

- Elevated body temperatures from internal heat produced by activity/external such as firefighting.
- Cool off quickly as possible, then treat other conditions.
- Systems may be difficult to recognize.
- Seek medical attention as soon as possible.
- IRPG pg. 112

*Remember to drink plenty of water throughout the day to ensure your body is hydrated.

Moderate Work = Patrolling, hiking on level/moderate terrain, mop-up, calisthenics, etc

Hard Work = Initial Attack, fireline construction, hiking on steep terrain, endurance exercising, carrying weight, etc.

Bi-Modal Work Shift = Move essential work tasks to coolest part of operational period, and/or adjust tactics (patrol/holding, etc) during hottest part of day.
