## WEATHER DISCUSSION

Overall little change is expected in the overall weather pattern into early next week as high pressure will continue to dominate. However, there are signs that increased precipitation chances are possible Wednesday night and into Thursday. Until then, expect temperatures well above seasonal and a continuation of elevated humidity levels. Fog this morning will burn off by late morning but likely redevelop once again tonight. Southeast winds will largely persist for the next few days. Precipitation chances do increase slightly moving forward during peak heating.

## TODAY'S FORECAST Persistent Weather Pattern Sunrise: 6:58 EST

Otherwise, conditions will remain partly cloudy and warm with highs in the mid to upper 80s. Humidity will drop into the lower to mid 50s. Southeast winds are forecast to be 4 to 8 mph with a few higher gusts.

# HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

We are ALL accountable for SAFE behaviors

**INCIDENT:** Ocala IA/Bills Branch Wildfire      **DATE:** March 6, 2026      **TIME:** 0700 2000

**Major Hazards and Risks:**  
**Driving, Ticks/Insects, Heavy Equipment, Snags**

Fire Order of the Day – Post lookouts when there is possible danger

Narrative:

**Driving** – Adhere to posted speed limits and slow down as conditions dictate. Expect the unexpected around every blind curve. Slow down on washboard surfaces and increase following distance on dusty roads. It takes only a second of inattention or distraction to become involved in an accident. Bike week in Daytona is ongoing, leading to heavy traffic on major roads throughout the area.

**Ticks/Insects** – Check for ticks immediately after being in an area where ticks may be present. Report any ticks that are attached to your skin to an immediate supervisor. Ensure a CA-1 is submitted. Stinging insects such as Yellow Jackets, Puss Moths, Fire Ants can be encountered out in the woods. Epi pens provide relief. IRPG pg. 110

**Heavy Equipment** – Maintain clearance and ensure you have contacted the operator before approaching. Stay at least 100’ in front and 50’ behind the equipment. If following a plow line, be aware as a Yellow Jacket nest may have been disturbed. IRPG pg. 87

**Snags** – Always maintain a strong situation awareness. Identify potentially fire weakened trees, flag as hazardous. Be alert especially when the wind increases. Eliminate these hazards with qualified sawyers. Keep nonessential personnel 2 ½ tree lengths away during falling operations. IRPG pg. 20-21
