HEALTH AND SAFETY MESSAGE

SAFETY starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Ocala IA/Bills Branch Wildfire

DATE: March 8, 2026

TIME: 0700 2000

Major Hazards and Risks: Driving, Ticks/Insects, Heavy Equipment, Snags

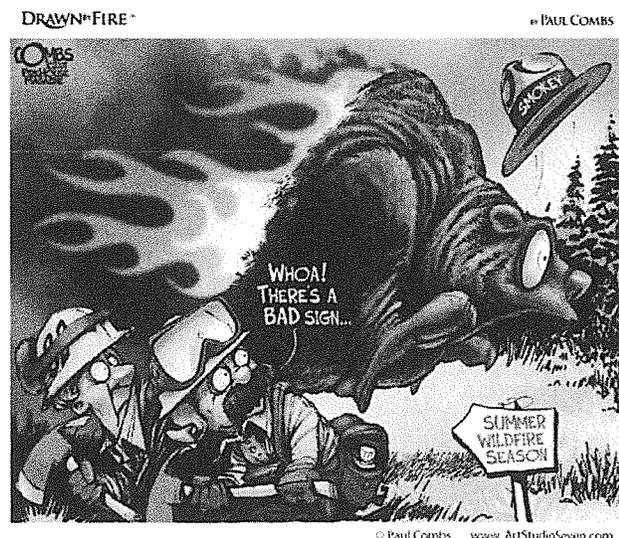

Proper Use of Trigger Points

Accurate situation awareness requires a constant reassessment of conditions that may impact the safety and effectiveness of tactics. Monitor for the 18 Watch Out Situations and establish trigger points ahead of time. Remember, trigger points are not decision-makers but serve as predetermined cues to prompt you to re-evaluate the current and potential situation and its associated risks. They help you to determine and implement the proper course of action.

Use trigger points for preplanning. Do not wait until you are in the wrong place at the wrong time – with no time.

Trigger points should be based on measurable factors such as:

- Relative Humidity.
- Winds.
- Fire behavior.
- Topographical boundaries.
- Time constraints/time of day.
- Time/distance to safety zones.
- Loss of suppression resources.
- Other operational considerations

Finance Section – Local Employee Hours & Crew Classification Guidance

Purpose

To clarify the financial distinction between **resource-ordered crews** and **local crews**, and to ensure accurate timekeeping, payment, and cost attribution for this incident.

Resource-Ordered Crews

Definition:

Crews mobilized through the **Interagency Resource Ordering Capability (IROC)** system, typically arriving from outside the local area. These include national contract crews, Interagency Hotshot Crews, and Initial Attack crews.

Payment & Shift Expectations:

- Operate under national/regional contracts or agreements.
- **Guaranteed compensation** for contract-specified hours, even when no work is available (e.g., weather delays, standby periods).
- Payment is maintained as long as the crew remains in **active incident status** and available for assignment.

Required Documentation:

- Crew manifest
- Crew Time Reports (CTR)
- All time is processed through the Finance Section for incident cost accounting.

Local Crews (Home-Unit Employees)

Definition:

Employees or suppression modules belonging to the **local unit** (District) who are assigned to the incident.

Payment & Shift Expectations:

- Generally work **normal agency shifts** unless incident needs dictate otherwise.
- When no work is available:
 - Crews may be **released to home-unit duties**, and
 - Paid according to **standard agency pay rules**, not guaranteed hours.

Required Documentation:

- Time may be coded through home-unit systems using agency-specific codes.
- Not always processed as a distinct “ordered resource” within the incident cost structure.
- A 288 or overtime authorization is required for all overtime hours

Key Differences at a Glance

Resource-Ordered Crews:

- Paid guaranteed hours when in active status, even without work.
- Must remain available to the incident.
- Finance Section tracks all time.

Local Crews:

- No guaranteed hours; paid under normal agency rules.
- May return to regular duties when not needed on the incident.
- Time often processed through home-unit systems.
