# INCIDENT WEATHER FORECAST

<b>FORECAST NO:</b> 19	<b>FIRE:</b> Ocala National Forest
<b>FORECAST ISSUED:</b> 03/08/25 @ 1700	<b>UNIT:</b> Ocala NF Type 3 Team
<b>PREDICTION FOR:</b> MONDAY - 3/09/25	<b>Signed:</b> <i>Joe Goudsward</i> IMET (501-772-3636)

Please submit any weather observations to the IMET - [joseph.goudsward@noaa.gov](mailto:joseph.goudsward@noaa.gov)

## WEATHER DISCUSSION

A weak cold front did move across the incident Sunday afternoon but only produced minimal amounts of rain. A weak disturbance caught up in the upper flow may kick off a few more showers this afternoon but again, amounts will be minimal and another very warm and humid day is expected. Upper level high pressure will build back over the region for Tuesday and Wednesday with little if any chance of precipitation. A stronger cold front will sweep across late Wednesday night into early Thursday with increased rain chances. Much cooler and drier air will follow the front.

## TODAY'S FORECAST A small chance of showers Sunrise: 7:45 EDT

**Weather:** Morning fog, then becoming partly cloudy. Scattered showers (20%) possible during the afternoon hours. Continued very warm and humid with well above average temperatures.

**High Temperatures:** 85 to 90 (little change versus yesterday)

**Minimum RH:** 47 to 53% (little change versus yesterday)

**20 foot winds:** Southwest 4 to 8 mph

**Inversion:** Breaking by noon

**Stability:** Moderate

**% of Wetting rain:** 0%

## TONIGHT'S FORECAST Clear and calm with more fog Sunset: 7:34 EDT

**Weather:** A slight chance (20%) of early evening showers. Partly cloudy early, becoming mostly clear by midnight. Patchy fog is expected to develop by morning and may be dense in lower lying spots.

**Low Temperatures:** 58 to 63

**Minimum RH:** 95 to 100%

**20 foot winds:** Southwest 4 to 8 in the evening, becoming calm

**Inversion:** Developing after 2300 hours

**LVORI:** 9

**% of Wetting rain:** 0%

## TUESDAY'S FORECAST Upper ridging will dominate

Upper ridging will reestablish itself for the next day or two. After any morning fog burns off, partly cloudy skies will prevail. Highs will reach 85 to 90 and humidity will drop between 38 and 43%. Southwest winds are forecast to be 4 to 8 mph with a few higher gusts. Some afternoon showers remain possible along the sea breeze front.

EXTENDED FORECAST	WEDNESDAY	THURSDAY
<b>TEMPERATURE</b>	Min: 58-63; Max: 85-90	Min: 55-60; Max: 78-83
<b>MINIMUM RH</b>	35 to 40 percent	45 to 50 percent
<b>20-FOOT WINDS</b>	SE 4 to 8mph	SW bcmg NW 7 to 15 mph
<b>SKY / WEATHER</b>	Isolated showers (10%)	Scattered showers (50%)
<b>WETTING RAIN</b>	10%	30%

## HEALTH AND SAFETY MESSAGE

*SAFETY* starts with *YOU*

We are ALL accountable for SAFE behaviors

INCIDENT: Ocala IA/Bills Branch Wildfire

DATE: March 9, 2026

TIME: 0700-2000

Major Hazards and Risks: Driving, Ticks/Insects, Heavy Equipment, Snags

### **Hazard Tree - Situational Awareness**

Snags are dead, standing trees without leaves or needles in the crowns and present a significant threat to forest worker safety. Snags may burn through more quickly than green trees and can fall without warning. Live, structurally compromised green trees weakened by insects, disease, weather, fire, and age can also fall without notice.

#### **Environmental conditions that increase risk from hazard trees:**

- Strong or gusty winds from storm cells.
- Air operations - water or retardant drops, rotor wash from helicopters.
- Steep slopes with rolling material.
- Diseased or bug-killed areas (Mountain Pine Beetle).
- Fire weakened timber.
- Reduced visibility from smoke, fog, or darkness.
- Hurricane impacted areas where trees have been killed or broken.

#### **Things to consider when assessing the potential danger of hazard trees in an area:**

- Timbered areas that have been burning for an extended period.
- High-risk tree species (those that are known for rot and shallow root systems) in the area.
- Numerous downed trees or tree parts in the area.
- Broken tops and dead limbs overhead or an accumulation of downed limbs around tree boles (stems).
- Signs of tree decay including cavities, splits, cracks, lack of needles, mechanical damage, missing bark, insect infestation, mushrooms, or fungus growing from tree.
- Root damage from equipment, fire, or erosion.
- Steep slopes for rolling debris, reduced personnel mobility, and more difficult size-up.
- Weather forecast with high winds or winds impacting the tree canopy.

#### **Identify mitigation measures to reduce risk from hazard trees:**

- Identify, communicate, establish, and monitor No-Work-Zones (NWZ) in all high-risk areas until the hazard has been mitigated.
- Assign qualified operator's and falling bosses based on the complexity of the hazard.
- Consider ordering in higher complexity fallers in advance.
- Use heavy equipment to avoid placing sawyers under hazards.
- Plan quick and safe escape routes.
- Minimize exposure time at the stump by employing efficient felling procedures.
- Minimize impacts to the hazard tree from wedge pounding or other felling operations in the area.
- Do not turn your back on a falling tree or known hazard.
- Use lookouts to maintain secure felling areas.
- Discuss/practice medical evacuation procedures and accept risk accordingly.

## Finance Section – Local Employee Hours & Crew Classification Guidance

### Purpose

To clarify the financial distinction between **resource-ordered crews** and **local crews**, and to ensure accurate timekeeping, payment, and cost attribution for this incident.

### Resource-Ordered Crews

#### Definition:

Crews mobilized through the **Interagency Resource Ordering Capability (IROC)** system, typically arriving from outside the local area. These include national contract crews, Interagency Hotshot Crews, and Initial Attack crews.

#### Payment & Shift Expectations:

- Operate under national/regional contracts or agreements.
- **Guaranteed compensation** for contract-specified hours, even when no work is available (e.g., weather delays, standby periods).
- Payment is maintained as long as the crew remains in **active incident status** and available for assignment.

#### Required Documentation:

- Crew manifest
- Crew Time Reports (CTR)
- All time is processed through the Finance Section for incident cost accounting.

### Local Crews (Home-Unit Employees)

#### Definition:

Employees or suppression modules belonging to the **local unit** (District) who are assigned to the incident.

#### Payment & Shift Expectations:

- Generally work **normal agency shifts** unless incident needs dictate otherwise.
- When no work is available:
  - Crews may be **released to home-unit duties**, and
  - Paid according to **standard agency pay rules**, not guaranteed hours.

#### Required Documentation:

- Time may be coded through home-unit systems using agency-specific codes.
- Not always processed as a distinct “ordered resource” within the incident cost structure.
- A 288 or overtime authorization is required for all overtime hours

### Key Differences at a Glance

#### Resource-Ordered Crews:

- Paid guaranteed hours when in active status, even without work.
- Must remain available to the incident.
- Finance Section tracks all time.

#### Local Crews:

- No guaranteed hours; paid under normal agency rules.
- May return to regular duties when not needed on the incident.
- Time often processed through home-unit systems.

# DEMOB/CREW SWAP

For Demob, please follow this link and check with Finance and Plans.

<https://forms.office.com/g/LFVFvqyZDA>.

For Air Request, go to the Linktree and look for the form for Air Request.

For Crew Swap, fill out an electronic 213 form and either send or bring it to Plans.

Controlled Unclassified Information//Basic

## Medical Incident Report

**FOR A NON-EMERGENCY INCIDENT, WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.**

**FOR A MEDICAL EMERGENCY: IDENTIFY ON-SCENE INCIDENT COMMANDER BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM IMT COMMUNICATIONS/DISPATCH.**

**Use the following items to communicate situation to communications/dispatch.**

**1. CONTACT COMMUNICATIONS / DISPATCH** (Verify correct frequency prior to starting report)

*Ex: "Communications, Div. Alpha, Stand-by for Emergency Traffic."*

**2. INCIDENT STATUS:** Provide incident summary (including number of patients) and command structure.

*Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree. Requesting air ambulance to Forest Road 1 at (Lat./Long.) This will be the Trout Meadow Medical, IC is TFLD Jones. EMT Smith is providing medical care."*

Severity of Emergency / Transport Priority	<input type="checkbox"/> <b>RED / PRIORITY 1</b> Life or limb threatening injury or illness. Evacuation need is <b>IMMEDIATE</b> <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> <b>YELLOW / PRIORITY 2</b> Serious Injury or illness. Evacuation may be <b>DELAYED</b> if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> <b>GREEN / PRIORITY 3</b> Minor Injury or illness. <b>Non-Emergency transport</b> <i>Ex: Sprains, strains, minor heat-related illness.</i>	
Nature of Injury or Illness & Mechanism of Injury		Brief Summary of Injury or Illness <i>(Ex: Unconscious, Struck by Falling Tree)</i>
Evacuation Request		Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location		Descriptive Location & Lat. / Long. (WGS84)
Incident Name		Geographic Name + Medical <i>(Ex: Trout Meadow Medical)</i>
On-Scene Incident Commander		Name of on-scene IC of Incident within an Incident <i>(Ex: TFLD Jones)</i>
Patient Care		Name of Care Provider <i>(Ex: EMT Smith)</i>

**3. INITIAL PATIENT ASSESSMENT:** Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: See IRPG PAGE 106

Treatment:

**4. EVACUATION PLAN:**

Evacuation Location (if different): (Descriptive Location (drop point, intersection, etc.) or Lat. / Long.) Patient's ETA to Evacuation Location:

Helispot / Extraction Site Size and Hazards:

**5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:**

*Example: Paramedic/EMT, crews, immobilization devices, AED, oxygen, trauma bag, IV/fluid(s), splints, rope rescue, wheeled litter, HAZMAT, extrication*

**6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable**

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

**7. CONTINGENCY: Considerations:** If primary options fail, what actions can be implemented in conjunction with primary evacuation method? Be thinking ahead..

**8. ADDITIONAL INFORMATION:** Updates/Changes, etc.

**REMEMBER:** Confirm ETAs of resources ordered. Act according to your level of training. Be Alert. Keep Calm. Think Clearly. Act Decisively.
