Fire Behavior Forecast

INCIDENT	Big Turnaround Complex	OPERATIONAL PERIOD	06/02/07 Day/Night
ADMINISTRATION UNIT	Okefenokee NWR	FORECAST #	44
WEATHER SUMMARY:			
Periods of heavy rain with strong, gusty winds by afternoon.			
DAY SHIFT:		NIGHT SHIFT:	
Sky Condition: Cloudy. Max Temperature: 76°F Minimum RH's: 63-68% Wind Speeds: Dependent on storm track, see Fire Weather Forecast.		Sky Condition: Cloudy. Min Temperature: 65°F Max RH's: 90% near fire, 100% elsewhere. Wind Speeds: See Fire Weather Forecast.	
GENERAL FIRE BEHAVIOR:			
DAY Shift:		NIGHT Shift:	
On the hill: Head fire (predicted at): FL – (4 feet) ROS – (10 ch/hr) expect 0 SPOTTING – < 0.3 mile POI – 0%	In the Swamp: Head fire will have: FL – <1 foot ROS – creeping SPOTTING – <0.3 mile POI – 0%	Head fire potential (near midnite): FL – <1 foot – swamp ROS – creeping – swamp	
SPECIFIC FIRE BEHAVIOR:			
<p><i>All Divisions: Expected rainfall will reduce fire behavior to smoldering and creeping... primarily in heavier, more sheltered swamp fuels and peat. Continued movement modeled for upland pine fuels reflects the dependence of that fuel type on wind speed, but existing fire in those lighter fuels cannot survive the predicted rainfall amounts. Stump holes and large logs may continue to smolder. Significant drying will be required to expose the extent of surviving fire.</i></p> <p>Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period....</p> <p>IA: Expect minimal fire behavior.</p>			
AIR OPERATIONS:			
Low ceilings and strong winds aloft may limit operations throughout the day.			
SAFETY:			
Strong winds increase the danger presented by fire-weakened snags and green trees. Predicted ERC for today is 0.

HEALTH AND SAFETY MESSAGE

Major Hazards and Risks:

***Weather**

***Tornado Safety**

***Downed Power Lines**

***Trees On Roads**

Narrative:

*** Weather:** The weather forecast for the day has Tropical Storm Barry entering the picture. The storm is predicted to pass close to us with gusty winds and rain. Everyone should be heads up to the weather today and monitor the radio for warnings.

*** Tornado Safety:** Depending on the track of the storm, tornados could be a real issue. If you are in a building, get to an interior room (If in a hotel room, you may want to get in the tub in your bathroom and close the door – especially if your room opens to the outside. If your hotel has an interior hallway, get in it or your bathroom.) If the tornado is a spinoff of the tropical storm, there could be little or no warning. Be heads up to the weather and conditions around you.

REMEMBER AND FOLLOW:

***The 10 Standard Fire Orders**

***The 18 Situations That Shout Watch Out**

***LCES**

Fire Order of the Day: Keep informed on fire weather conditions and forecasts.

YOUR Safety is our NUMBER ONE goal.

IMT Safety Officers: John Walker and Tom Krueger

HUMAN RESOURCE MESSAGE

PATIENCE AND TOLERANCE IS OUR GUIDE

There is nothing like ambiguity to test our patience and tolerance!! NOTHING!!

What we do know is that June Second is going to be different for all of us....

Depending on what the storm does, we may be fighting the fire as we have been, battening down for a hurricane.. Or..... anything in between.

REMEMBER OUR #1 Priority... FIREFIGHTER SAFETY!!!!

Situational Awareness!!

....If you have questions get them answered.

....Know where your coworkers are.

....If we end up in our hotels for the day, REMBER, we are assigned to the incident and responsible for proper professional conduct.

....This includes no alcohol.
