

Big Turnaround Complex

Incident Action Plan SATURDAY June 23, 2007 California FUMT— Perkins

Note: Collecting cultural resource artifacts on federal land is illegal and only allowed with permission on private land. Please report all activity and findings to appropriate authorities.

<p style="text-align: center;">INCIDENT OBJECTIVES</p>	<p style="text-align: center;">1 INCIDENT NAME Big Turnaround Complex</p>	<p style="text-align: center;">2. DATE PREPARED 06/22/2007</p>	<p style="text-align: center;">3. TIME PREPARED 1800</p>									
<p>4. OPERATIONAL PERIOD (DATE/TIME) June 23, 2007 0700 – 1900 DAY SHIFT</p>												
<p>5. CORE VALUES – ALL INCIDENTS, ALL THE TIME</p> <ul style="list-style-type: none"> A. Firefighter Safety – Everyone goes home. B. Public Safety – We will be proactive in facilitating safety of affected citizens. C. 100% Effort – We will mindfully engage all missions with our collective expertise. D. Land Stewardship – We will cause no unnecessary resource damage. E. Open Communication – Direct, respectful, and 2 way communications is the key to our success. 												
<p>6. INCIDENT OBJECTIVES / MANAGEMENT EXPECTATIONS</p> <p style="text-align: center;"><u>Management Priorities</u></p> <ul style="list-style-type: none"> 1. Provide for fire fighter and public safety. 2. Minimize the loss or damage to structures, private property, recreations sites, watershed, wildlife habitat, timber lands, and other assets. <p style="text-align: center;"><u>Operational Objectives</u></p> <ul style="list-style-type: none"> 1. Keep fire contained within established containment lines. 2. Continue to implement suppression repair. 3. Manage new ignitions within Refuge according to WFSA and FMP. 4. Continue monitoring potential fire movement. 												
<p>7. PLAN OF ACTION, STRATEGY AND PRIORITIES</p> <ul style="list-style-type: none"> 1. First priority is to protect the public assets at risk. All available air and ground resources will support the operation when necessary. 2. Second priority will be to effectively assist with initial attack of new fire starts. 3. Third priority will be to continue implementing fire suppression repair.

FORECAST: Big Turnaround June 23, 2007

IF CONDITIONS BECOME UNREPRESENTATIVE,
CONTACT THE NATIONAL WEATHER SERVICE.

SPOT FORECAST FOR BIG TURNAROUND...US FISH & WILDLIFE
NATIONAL WEATHER SERVICE JACKSONVILLE FL
412 PM EDT FRI JUN 22 2007

FORECAST IS BASED ON REQUEST TIME OF 1546 EDT ON JUNE 22.
IF CONDITIONS BECOME UNREPRESENTATIVE...CONTACT THE NATIONAL WEATHER
SERVICE.

.DISCUSSION...WEAK HIGH PRESSURE RIDGE WILL BE OVER FLORIDA THROUGH
SUNDAY WITH A LOW PRESSURE SYSTEM OFF THE FLORIDA EAST COAST
WEAKENING.

THE COMBINATION OF WARMER AFTERNOON TEMPERATURES AND SLIGHTLY DRIER
CONDITIONS WILL LEAD TO LOWER RELATIVE HUMIDITY VALUES DURING THE
WEEKEND. RELATIVE HUMIDITY VALUES WILL BOTTOM OUT BETWEEN 30 AND 40
PERCENT ACROSS INTERIOR SOUTHEAST GEORGIA SATURDAY AFTERNOON.

HIGH PRESSURE WILL BUILD OVER THE WESTERN ATLANTIC SUNDAY AND MONDAY.
A
MORE SOUTHERLY FLOW AROUND THE HIGH WILL LEAD TO A GRADUAL INCREASE
IN
LOW-LEVEL MOISTURE...WITH FLOW BECOMING MORE EASTERLY TUESDAY ONWARD.

.SATURDAY...

SKY/WEATHER.....MOSTLY SUNNY (35-45 PERCENT). PATCHY FOG EARLY
IN THE MORNING.

MAX TEMPERATURE.....AROUND 96.

MIN HUMIDITY.....35 PERCENT.

WIND (20 FT).....WINDS SOUTHWEST 3 MPH BECOMING SOUTH 5 MPH
BY NOON...THEN SOUTHEAST 6 TO 8 MPH IN THE
AFTERNOON.

LAL.....1.

MIXING HEIGHT.....800 FT AGL INCREASING TO 3700 FT AGL
LATE IN THE MORNING...THEN INCREASING TO
INCREASING TO 6600 FT AGL IN THE
AFTERNOON.

MIXING WINDS.....WEST 5 TO 8 MPH.

DISPERSION INDEX....33.

CHANCE OF PCPN.....0 PERCENT.

Fire Behavior Forecast

INCIDENT	<i>Big Turnaround Complex</i>	OPERATIONAL PERIOD	06/23/07 Day Shift
ADMINISTRATION UNIT	<i>Okefenokee NWR</i>	FORECAST #	63
WEATHER SUMMARY:			
<p><u>Saturday</u> The combination of warmer afternoon temperatures and slightly drier conditions will lead to lower relative humidity values during the weekend. High temperature will be 96 degrees and relative humidity will reach a low of 35%. Afternoon winds southeast 6 to 8 miles per hour.</p> <p>See attached Spot Weather Forecast.</p>			
GENERAL FIRE BEHAVIOR: Saturday Day Shift			
	Saturday	Saturday	
	Swamp Fuels	Upland Pine	
Flame Length (feet)	4	5	
Rate of Spread (ch/hr)	15	19	
Spotting Distance (miles)	0.4	0.3	
Probability of Ignition (%)	44	44	
SPECIFIC FIRE BEHAVIOR:			
<p>All Divisions: The predicted rates of spread and flame lengths above are based on an established fire on higher ground with max wind speeds in the warmest and driest period of the day outside the current fire perimeter. The most active remaining portion of the fire will be in bay fuels, which will continue smoldering in stump holes, duff and roots. Smoldering and creeping fire behavior will continue in Divisions WE and WF, as fuels dry from the recent precipitation. Reburn risk on Saturday is moderate with lower humidity and higher temperatures.</p> <p>Structure: Okefenokee administrative site should not be impacted by fire spread during this operational period.</p> <p>IA: Expect moderate fire behavior today on any new starts outside of the main fire perimeter, especially when in the presence wind. Also, watch for reburn in recently dropped pine litter, particularly on the drier north end of the fire.</p>			
AIR OPERATIONS:			
No restrictions after 0900.			
SAFETY:			
<p>Maintain situational awareness around snags, especially when wind speeds increase. Practice the 30/30 rule around thunderstorms to prevent exposure to lightning (see pg. 75 of the IRPG)</p> <p style="text-align: center;">Predicted ERC for Saturday is 32 and 33 ... 90th percentile is 35.</p>

Safety Message

Big Turnaround Complex

June 23, 2007

Driving - drive with headlights on at all times, obey speed limits. Log hauling is occurring in various locations within the Complex area.

Hydration - warmer weather, increase your fluid intake. Rule of thumb, two bottles of water for every bottle of Sports drink. Continue to keep eating.

Hazard Trees- don't look just for the snags. Green trees can kill you also. Lots of "hang-ups" out there.

Situational Awareness

- I identify trigger points for disengagement and re-engagement
- Re-evaluate, change your plan as needed
- Evaluate risk vs. gain
- LCES is in place before engaging in any assignment
- Be alert to wind shifts

GA-OKR-007021
Okefenokee Wildlife Refuge
California Interagency Fire Use Management Team

Today's discussion is from the
Fireline Safety Category.

Scenarios:
[Scenario 1](#)

[Six Minutes Home Page](#)

INITIAL ATTACK FIRE SIZEUP/SAFETY

Having a good sizeup is important in order to give both the Incident Commander (IC) and fire management a good idea of what problems exist and what resources may be needed for effective firefighting.

- Use the following reporting factors for sizeup. Discuss others that may be used.
 - Fire name and location
 - Terrain (slope, aspect, elevation) and position of fire on the slope
 - Size of fire
 - Fuel type, anticipated control problems, and spread potential
 - Values threatened
 - Weather conditions (wind speed and direction)
 - Fire behavior
 - Resources on the fire and those needed
 - Estimated containment and control times
 - Cause (known, suspected, under investigation)

- After your initial sizeup of the fire and/or transition from an initial attack IC, answer the following questions. Repeat this analysis whenever there is a change, or predicted change, in conditions on the fire.
 - Have you sized up the fire and relayed the information to dispatch?
 - Is the observed fire weather consistent with the forecast?
 - Can you control the fire with the resources available (on the incident or soon to be on the incident) and under the expected conditions?
 - Have you developed a plan to attack the fire (direct or indirect, anchor points, escape routes, head or flank attack, priority areas); and have you communicated this information to all personnel assigned to the incident, including new arrivals?
 - Are lookouts in place or can you see all of the fire area?
 - Can you communicate with everyone on the fire and with dispatch?
 - Are escape routes and safety zones established? If you are using the black, is it completely burned and without a reburn potential?
 - Are safety and the standard fire orders being followed?
 - Do you have a complete list of what resources have been ordered for the fire?
 - Will you control the fire before the next operational period; and if you won't, or the size of the organization exceeds the IC's capability to manage, have you informed the agency Fire Management Officer?

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the closest line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-2111), The report should include type of illness/injury and exact location of the incident. Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After 2100 hours emergencies in Kingsland and/or Folkston, Waycross and Valdosta: after hour contact is night security Kevin Wyrick 864-490-4193. Before 2100 call communications @ 912-496-4175. DO NOT DELAY TREATMENT CALL 911 WHEN LIFE THREATENING. Communications will call and designated paramedics will be routed to the scene to facilitate transportation or other logistical needs.</p>
