

Big Turnaround Complex

Incident Action Plan Thursday-Friday July 05-06, 2007

Note: Collecting cultural resource artifacts on federal land is illegal and only allowed with permission on private land. Please report all activity and findings to appropriate authorities.

<p style="text-align: center;">INCIDENT OBJECTIVES</p>	<p style="text-align: center;">1 INCIDENT NAME Big Turnaround Complex</p>	<p style="text-align: center;">2. DATE PREPARED 07/04/2007</p>	<p style="text-align: center;">3. TIME PREPARED 1800</p>									
<p>4. OPERATIONAL PERIOD (DATE/TIME) July 05-06, 2007 0800 – 2000 DAY SHIFT</p>												
<p>5. CORE VALUES – ALL INCIDENTS, ALL THE TIME</p> <ul style="list-style-type: none"> A. Firefighter Safety – Everyone goes home. B. Public Safety – We will be proactive in facilitating safety of affected citizens. C. 100% Effort – We will mindfully engage all missions with our collective expertise. D. Land Stewardship – We will cause no unnecessary resource damage. E. Open Communication – Direct, respectful, and 2 way communications is the key to our success. 												
<p>6. INCIDENT OBJECTIVES / MANAGEMENT EXPECTATIONS</p> <p style="text-align: center;"><u>Management Priorities</u></p> <ul style="list-style-type: none"> 1. Provide for fire fighter and public safety. 2. Minimize the loss or damage to structures, private property, recreations sites, watershed, wildlife habitat, timber lands, and other assets. <p style="text-align: center;"><u>Operational Objectives</u></p> <ul style="list-style-type: none"> 1. Keep fire contained within established containment lines. 2. Continue to implement suppression repair. 3. Manage new ignitions within Refuge according to WFSA and FMP. 4. Continue monitoring potential fire movement. 												
<p>7. PLAN OF ACTION, STRATEGY AND PRIORITIES</p> <ul style="list-style-type: none"> 1. First priority is to protect the public assets at risk. All available air and ground resources will support the operation when necessary. 2. Second priority will be to effectively assist with initial attack of new fire starts. 3. Third priority will be to continue implementing fire suppression repair.

FIRE WEATHER PLANNING FORECAST FOR NORTHEAST FLORIDA/SOUTHEAST GEORGIA
 NATIONAL WEATHER SERVICE JACKSONVILLE FL
 205 PM EDT WED JUL 4 2007

.DISCUSSION...THE COMBINATION OF LOW PRESSURE TO THE SOUTH AND HIGH PRESSURE TO THE NORTH WILL CONTINUE THE MOIST EASTERLY FLOW OVER THE REGION...ESPECIALLY THE FLORIDA PORTION. OVER SOUTHEAST GEORGIA...DRIER AIR WILL FILTER INTO THE NORTHERN PORTIONS OF THE FORECAST AREA...ALLOWING RH VALUES TO DIP INTO THE LOWER 40S THURSDAY AND FRIDAY. RH VALUES WILL REMAIN ABOVE CRITICAL THRESHOLDS THROUGH THE PERIOD. THE BREEZY CONDITIONS WILL CONTINUE FOR THE EASTERN THIRD OF THE FORECAST AREA WITH LOCALLY WINDY CONDITIONS PRESENT ALONG THE COAST THROUGH LATE THIS EVENING.

Safety Message
Big Turnaround Complex
July 5-6, 2007

Driving - drive with headlights on at all times, obey speed limits. Log hauling is occurring in various locations within the Complex area.

Risk Management Process- pg. 1 in IRPG. Before committing to any operational actions ensure that you have mentally gone over the checklist. The bottom line is Risk vs. Gain.

Look Up, Down, and Around - review the seven Fire Environment Factors in your I.R.P.G., pages 2 and 3.

Hazard trees are still a concern. I identify and mitigate hazard trees. If mitigation is not possible, DO NOT work in the area.

Hydration - warmer weather, increase your fluid intake. Rule of thumb, two bottles of water for every bottle of sports drink. Continue to keep eating.

Keep safety as the primary focus. Don't become complacent.
Remember, yesterday is not today, every operational shift is
different.

Southern Area

Fuels and Fire Behavior Advisory

Subject: Extremely dry conditions in many portions of the Southern Region have created the potential for problematic Fire Behavior.

Discussion: La Nina events and persistent high pressure systems throughout the course of the spring and early summer have combined to bring exceedingly dry conditions to the Southeast. Due to these patterns, rainfall deficit records are being set in many areas. New record levels for dryness indices such as ERC and KBDI are occurring throughout the Southeastern portion of the Geographic Area and these trends are moving northward through the Appalachians .

All classes of dead fuels and most live herbaceous, shrub, and foliar fuels are available for rapid fire spread due to this intense drying. All new ignitions and unburned islands of current fires in this area should be considered potentially explosive situations from a fire behavior perspective.

Deep drying at the surface and subsequent drops in water table moisture have allowed for the entire surface layer to become available for deep burning. This deep burning has affected the potential for hold over fires and re-burns, and the ability of suppression forces to control the edges of going fires.

Concerns to Firefighters and the Public:

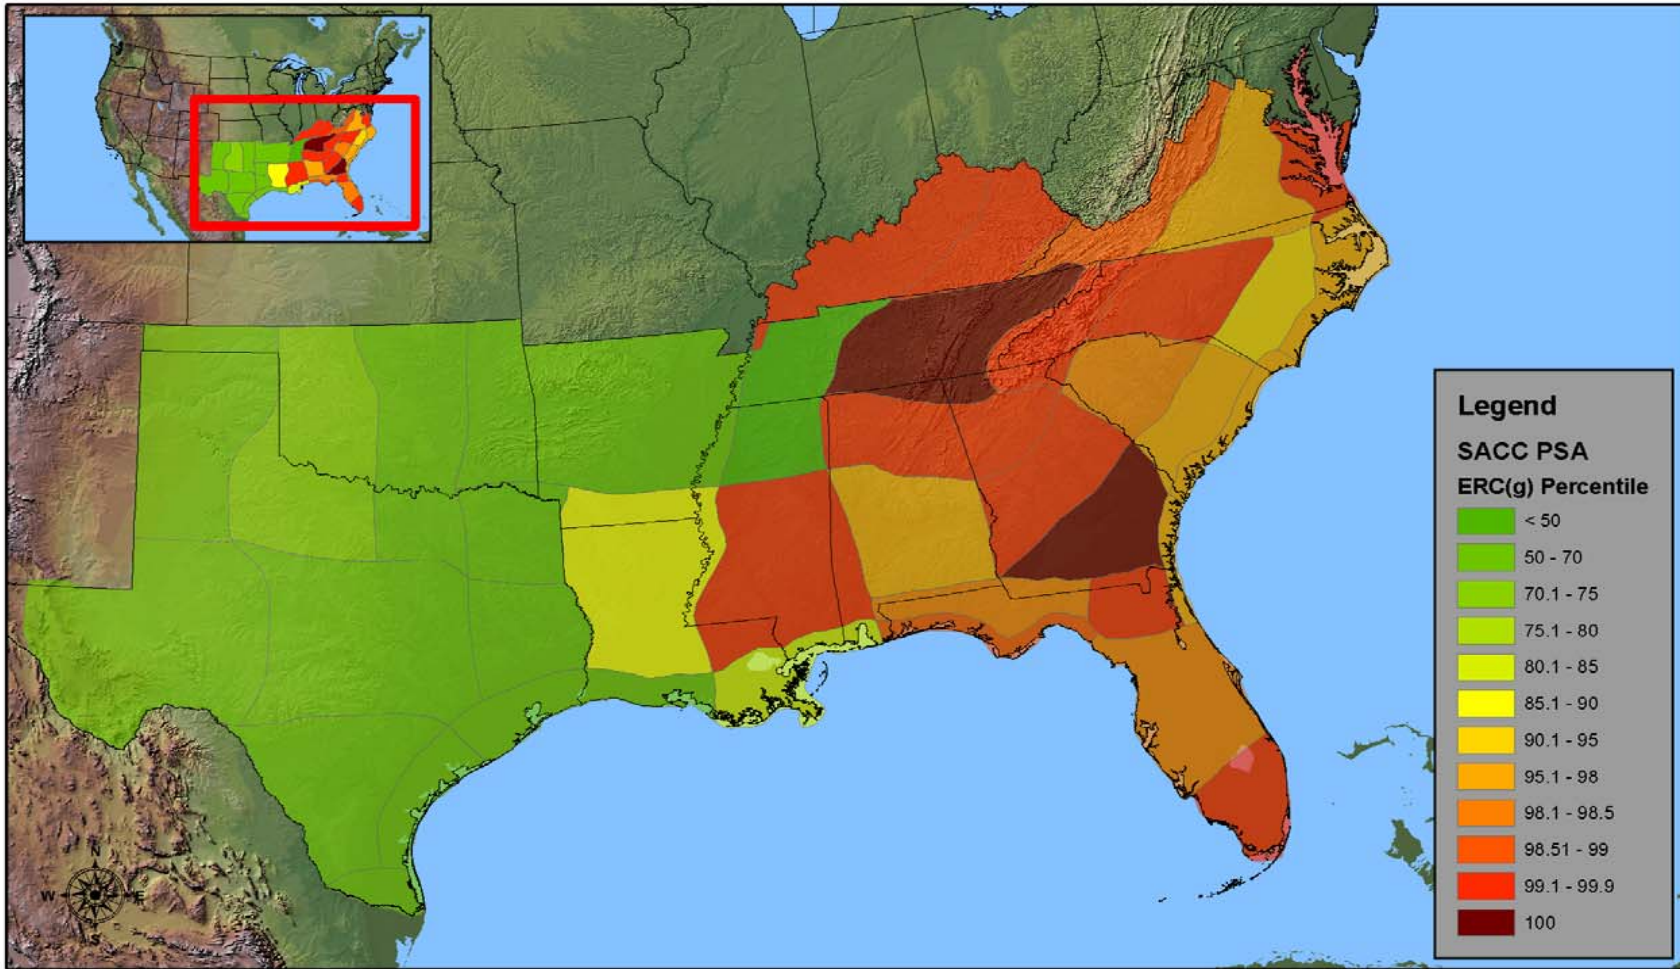

- Anticipate any ignition in all size classes of dead fuels to ignite easily and move rapidly.
- Anticipate short to long range spotting from intense surface fires, torching trees and areas of active crowning.
- Anticipate large acres to be consumed in a short period of time.
- Shrub and young stand components in some areas may under burn pre-drying crowns and leaving them available for re-burn at a later time.
- As the live fuel moisture values fall with continued drying, fires will burn with more intensity and fire behavior will become more extreme.
- Due to current and forecasted fuel moisture values, extreme fire behavior will occur under lower wind speeds, higher humidity values and lower temperature thresholds than normal.
- Traditional breaks and barriers in muck soils, wetlands, and roadways are not dependable to slow or stop fire spread.

Mitigation Measures:

- Indirect tactics including burnouts under favorable conditions will have to be used more frequently this year.
- Aerial support will be needed more often to slow the rate of spread and cool the edges of the fire and control spotting.
- Ensure firefighters have good anchor points, escape routes, and safety zones.
- Have adequate numbers of Field Observers who understand the effects of weather changes and the current fuel conditions with a view of the flaming front and spot fires of concern.

Area of Concern: See attached map for areas of concern.

Energy Release Component (g) Percentiles (28 May 2007)

SACC Risk Assessment Team, 29 May 2007 1400

Energy Release Components for fuel model G, expressed as a percentile of their historical value. High values indicate areas where current ERC values are meeting or exceeding historical values for that area.

8. Medical Emergency Procedures	
<p>Medical emergencies will be reported to the Division Supervisor. The Division Supervisor will assume command and call for the line medic, and resources in the division that are EMT qualified. The Division Supervisor will notify communications by radio or cell phone (Big Turnaround ICP 912-496-2111), The report should include type of illness/injury and exact location of the patient(s). Communications will clear the air for emergency traffic only and will request key personnel to report to communications. If an air medical helicopter is used within the fire perimeter, communications should notify the air operations director and helibase.</p> <p>After 2100 hours emergencies in Kingsland and/or Folkston, Waycross and Valdosta: after hour contact is night security Kevin Wyrick 864-490-4193. Before 2100 call communications @ 912-496-4175. DO NOT DELAY TREATMENT CALL 911 WHEN LIFE THREATENING. (Patient Assessment, IRPG, pg. 35)</p>
