The **main concerns** are:

1. High winds with tropical storm Barry.
2. Amount of precipitation.

Fire Behavior Forecast

<u>Forecast No. 43</u>	<u>Prediction for Saturday</u>
<u>Name of Fire: Ga Bay Complex /Sweat Farm Rd.</u>	<u>Operational Period: June 2nd, 2007</u>
<u>Time Issued: 1800 hrs</u> <u>Date Forecast Issued: 6/1/2007</u>	<u>Signed : Gary Curcio</u> <u>Fire Behavior Analyst</u>

Weather Summary:

The air mass moisture is improving tremendously with the approaching tropical storm. Today's weather will bring very critical wind speeds. Hopefully, we will have associated showers prior to the onslaught of very dangerous surface winds. These winds can produce extreme fire spread rates. Review Today's Detailed Weather Forecast in the IAP.

General Fire Behavior:

All the dead fuel classes, (1,10, 100, &1000 hr. fuels) are at record lows, the heavy fuels will continue to burn or smolder, and winds speeds will remain fairly light through the night. Starting in the morning, wind speeds will begin to increase, if there is no precipitation event, the fuels and unfavorable weather conditions will combine to make this fire a very serious threat to everyone's safety. Extreme fire behavior will be exhibited during peak wind periods.

Specific Fire Behavior: All Fire & All Branches

<u>Fuels type</u>	<u>Spread</u>	<u>Flame</u>	<u>Spotting</u>
Young plantation 4 to 7ft tall	40ch/hr in the AM increasing to 1mph by the afternoon. Sustained Gusts can push Spread rates to 2 ½ mph	15 - 20 ft. 20 – 30 ft.	¼ to ½ mile ½ to 1 mile
Isolated Bays with hi shrub	same as above	same as above	same as above
Pine & Cypress Pine Plantation w/ low & sparse southern rough*	20 ch/hr (AM) 40 – 60 ch/hr (PM)	4- 8 ft. 10 – 15 ft. when torching or crown runs in access of 100 ft.	

**note when the southern rough is > 4 ft tall these plantation are can easily support crown fire runs.*

Air Operations: Due to high winds or ceilings air operations will be impacted.

Safety:

If the rains do not come, the rates of spread will be extreme and fire behavior violent in the mid-afternoon. Escape routes need to be well planned. A security weather watch needs to be posted & the Fire RAWS periodically keyed in order to stay ahead of changing conditions. Deep duff burning has weakened many tree root systems and trees will be subject to wind throw. Everyone needs to stay heads-up to these changing conditions & move to safer areas.

TAILGATE BRIEFING SHEET

☐ SAFETY MESSAGE

Incident:

Sweat Farm/Bugaboo Scrub II

Date:

June 2, 2007

Time:

Day & Swing Shift

Major Hazards and Risks:

◦ Weather

◦ Tornadoes

◦ Accountability

◦ Fire Behavior

◦ Driving

◦ Lightening

◦ Reburn Potential

◦ Snags

Tropical Storm Barry may produce lightening, high winds, and isolated tornadoes with significant rain amounts. You need to remain aware of what the fire is doing in your area, prior to arrival of rain. Refer to page 75 in your Incident Response Pocket Guide for lightening mitigation. Plan and act accordingly. Maintain LCES at all times!

Snags are present, so be alert to any in your assignment area. Trees growing in peat soils can have weakened and burnt roots due to under ground burning that will allow them to fall without warning. Park vehicles a safe distance away from trees. Roads can be blocked quickly by falling trees and snags. If you are working around pumps, post a lookout for these snags.

Supervisors maintain contact with your assigned resources so they can be given directions in an efficient and timely manner to carry out removal of equipment to staging areas and further positioning of personnel.

Reburns are still a potential. **Know where your escape routes and safety zones are located.**

When we do receive any significant rain the woodland road conditions will become very sloppy.

SAFETY OFFICERS: Michael Huffman, Mark Luellen, Larry Miller, Paul Boucher, Pete Stewart, Keith Jenkins, Alan Alsobrook, Roy Leach, David Benavitch, Tim Oliverius, Al Augustine, Sam Wilbanks, Phillip Spor, James Burton, and Charles Wood

Fire Order #8:

Give clear instructions and insure they are understood.

Human Resource Message

“Seize the Moment.”

‘Seizing the moment’ means taking advantage of opportunities that present themselves as the world changes around you. To be most effective, you need to take stock of where you are, maintain perspective of the big picture, and recognize when course corrections would benefit the overall plan.

Change brings both opportunity and risk... It is important to maintain your situational awareness, look for ways to make the most progress, and adapt your strategy and tactics as conditions change.

Remember that we are here as a team and it is essential to stay together as we implement the plan. Enjoy the excitement, seize the moments that are presented to you, and have a safe day!
