Fire Behavior Forecast

|---|---|
| <u>Forecast No. 44</u> | <u>Prediction for Sunday</u> |
| <u>Name of Fire: Bugaboo and Sweat Farm Rd.</u> | <u>Operational Period: June 3rd, 2007</u> |
| <u>Time Issued: 1400 hrs</u> <u>Date Forecast Issued: 6/2/2007</u> | <u>Signed : Gary Curcio</u> <u>Fire Behavior Analyst</u> |

Weather Summary:

The rain amounts at Fire RAWS Perimeter (Sweat Farm Fire) & Tower (Bugaboo Scrub 2 Fire) were recorded to be 4 inches at 1500 hrs on Saturday. All other Fire RAWS also received a substantial amount of rain and the rain duration was estimated at 26 hrs. Another positive development is that the air mass moving into the area tomorrow is expected to return to a more normal level of moisture. Future nighttime RH recoveries will now actually leave visible water on the vegetation in the early morning hours. Prior to any new wildfire start, the morning dew will have to evaporate off the fuels. This is a beneficial condition and will shrink the daytime burning window.

General Fire Behavior:

There will be none.

The 1 & 10 hr size class fuels are not available for burning today. Therefore, there is no projection for fire spread. Moderate winds, skies with periodic cloud cover and moderate RH's will not dry out fuels enough to support a fire spread. However, it is still possible to see ground fire as there can be deep burning in the organic soil.

Specific Fire Behavior: All Fire & All Branches

| <u>Fuels type</u> | <u>Spread</u> | <u>Flame</u> | <u>Spotting</u> |
|-----------------------------------|----------------------|---------------------|------------------------|
| Young plantation 4 to 7ft tall | None | None | None |

Isolated Bays with hi shrub same as above

Pine & Cypress
Pine Plantation
w/ low & sparse
southern rough* same as above

**note when the southern rough is > 4 ft tall these plantations can easily support crown fire runs.*

Air Operations:

There are no restrictions on air operations as the skies will clear with developing cumulus clouds. Smoke production is expected to be very minimal.

Safety:

The biggest safety concern is in the areas of deep duff or organic burning. In areas where root systems have been weakened, many trees will be subject to falling on their own or with the slightest wind. Everyone needs to stay alert to this dangerous condition. Also, approach any organic soil burning with caution, they can still have a tremendous amount of heat. These areas can encapsulate themselves from the rain and can return to active burning in a day or two.

☐ SAFETY MESSAGE

Incident:

Sweat Farm/Bugaboo Scrub II

Date:

June 3, 2007

Time:

Day & Swing Shift

Major Hazards and Risks:

◦ Weather

◦ Tornadoes

◦ Accountability

◦ Fire Behavior

◦ Driving

◦ Snags

◦ Footing

Yesterday Tropical Storm Barry brought us significant rain fall amounts. Partly cloudy, warm weather with moderate winds and moderate relative humidities will bring gradual drying. You need to remain aware of what the fire is doing in your area. Plan and act accordingly. Maintain LCES at all times!

Snags are present, so be alert to any in your assignment area. Trees growing in peat soils can have weakened and burnt roots due to under ground burning that will allow them to fall without warning. Park vehicles a safe distance away from trees. Roads can be blocked quickly by falling trees and snags. If you are working around pumps, post a lookout for these snags.

Supervisors maintain contact with your assigned resources so they can be given directions in an efficient and timely manner to carry out removal of equipment to staging areas and further positioning of personnel.

While driving, hydroplaning, soft road shoulders, and sloppy off road conditions could be a problem. Watch your footing on equipment and slippery ground surfaces.

SAFETY OFFICERS: Michael Huffman, Mark Luellen, Larry Miller, Paul Boucher, Pete Stewart, Keith Jenkins, Alan Alsobrook, Roy Leach, David Benavitch, Al Augustine, Sam Wilbanks, Phillip Spor, James Burton, Larry Klock, Charlie Shelby, Jerry Dombrowske, Don Ranney, and Charles Wood

Fire Order #9:

Maintain control of your forces at all times.

Watch Out Situation # 7:

No communication link with crew members of supervisor.
