**SAFETY MESSAGE**

Incident:

Sweat Farm Road

Date:

June 21, 2007

Time:

Day

**Major Hazards and Risks:**

- **ROAD CONDITIONS**
- **WINCH OPERATIONS**
- **SNAGS**
- **COMMUNICATIONS**

**Road conditions** – The secondary roads will be wet and very inaccessible today. Use caution and avoid traveling on the wet secondary roads if possible. Look for alternative routes and be sure someone knows where you are in case you do get stuck.

**Winch Operations** – Stop and think before starting winch operations. Be sure to use all PPE and a heavy coat or blanket on the cable to reduce risk of injury.

**Snags** – Higher wind speeds, soft soil from rain and previous fire damage combined will increase snag fall today. Scan areas that you park your vehicles and equipment, as well as, any area you are working for potential snags. Mitigate the ones you can do so safely and communicate ones you can't..

**Communication Responsibilities**

**INSURE YOU HAVE COMMUNICATIONS**

All firefighters have five communication responsibilities:

- Brief others as needed
- Debrief your actions
- Communicate hazards to others
- Acknowledge messages
- Ask if you don't know

In addition, all leaders of firefighters have the responsibility to provide complete briefings that include a clearly stated "Leaders Intent."

- Task = What is to be done
- Purpose = Why it is to be done
- End State = How it should look when done
