Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As A Georgia Forestry Commission Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Trent Ingram

Incident Commander  
Georgia Forestry Commission Type 3 Incident Management Team

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> Honey Prairie Complex	<b>2. DATE PREPARED</b> 8/31/11	<b>3. TIME PREPARED</b> 1700												
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> Thursday, September 1, 2011 0800 – 2000															
<b>5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)</b> <ol style="list-style-type: none"> <li>1. Provide for safety of incident personnel and public in all incident operations.</li> <li>2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners.</li> <li>3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible.</li> <li>4. In cooperation with local land owners and communities, use full suppression strategies and tactics to minimize damage to private timberlands and structural improvements and to prevent fires outside the Refuge from entering the Refuge.</li> <li>5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander.</li> <li>6. Protect all cultural and archeological sites and structures within the refuge.</li> <li>7. Manage the fires cost-effectively consistent with the values at risk.</li> <li>8. Coordinate suppression actions with assigned Refuge Resource Advisors</li> </ol>															
<b>6. WEATHER FORECAST FOR OPERATIONAL PERIOD</b> See attached forecast for area specific weather information.															
<b>7. GENERAL SAFETY MESSAGE</b> Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.

# Fire Weather Forecast

**FORECAST NO:** 117  
**PREDICTION FOR:** Day Shift  
**SHIFT DATE:** THURSDAY 9/1/11

**NAME OF FIRE:** Honey Prairie Complex  
**UNIT:** Okefenokee National Wildlife Refuge

**FORECAST ISSUED:** 8/31/11 at 1700

**SIGNED:** Coleen Decker, IMET

**WEATHER DISCUSSION:** High pressure aloft over the Gulf states will continue to stretch Eastward today over our area. This will keep moist onshore flow from the Northeast. Although sufficient moisture is in place, it will be more stable today, so thunderstorms are not likely this afternoon.

### TODAY:

**MAXIMUM TEMPERATURES:** Around 93-96°  
**PM HEAT INDEX:** 100°  
**MINIMUM HUMIDITY:** 40%  
**20 FT WINDS:** ENE 10 to 15 mph  
**STABILITY/INVERSION:** 6000 feet  
**TRANSPORT WINDS:** E 15 mph  
**DISPERSION INDEX:** 70, Very Good  
**CHANCE OF PRECIPITATION:** 10%  
**PRECIPITATION AMOUNTS:** Less than a tenth of an inch.  
**LIGHTNING ACTIVITY LEVEL:** 1, None

**TONIGHT:** Northeast wind 5 to 8 mph. Low temperatures 67-70° with humidity near 85%.

**FRIDAY and SATURDAY:** Sunny.

**MAXIMUM TEMPERATURES:** 90-93°  
**PM HEAT INDEX:** 95°  
**MINIMUM HUMIDITY:** 35-40 %  
**20 FT WINDS:** E 8 Gust 12 mph...Becoming Southeast Saturday.  
**STABILITY/INVERSION:** 6000 feet  
**TRANSPORT WINDS:** E 10-15 mph  
**DISPERSION INDEX:** 5500  
**CHANCE OF PRECIPITATION:** 10%  
**LIGHTNING ACTIVITY LEVEL:** 1, None

**EXTENDED FORECAST:** Moisture spinning through the Gulf of Mexico will become entrained into a trough of low pressure on Sunday. This may bring widespread wetting rain from Sunday through Tuesday.

	SUNDAY	MONDAY	TUESDAY
<b>SKY/WEATHER</b>	Partly Cloudy Chance of thunderstorms	Cloudy. Chance of Rain.	Cloudy. Chance of Rain.
<b>PRECIP</b>	40%	60%	50%
<b>20 FT. WINDS</b>	PM: SE 8-12 mph	PM: S 8 mph	PM: SW 5-8 mph
<b>MIN/MAX</b>	72/ 93	72/ 86	72/ 83

## FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #115 Issued: 08/31/2011 1830 hrs	Signed: Dave Fogler	Shift Date: <b>Thursday 09/1/2011</b>

**GENERAL FIRE BEHAVIOR**  
 Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within the swamp.

- Indicators/Threshold for Increased Fire Activity
- **Relative humidity dropping below 45%**
  - **Winds above 10 mph**
  - **Heavy fuel loadings**
  - **Fine dead fuel moisture 8% or less**
  - Dispersion above 70
- \* Items in **BOLD ITALICS** are predicted to occur today\*

**SPECIFIC FIRE BEHAVIOR**

- Interior smoldering and some flare ups are possible, especially if winds increase.
- Expect fire to continue spreading through the shrub fuels with low rates of spread and minimal flame lengths.

### LIGHTNING ACTIVITY LEVEL 1

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
<b>Winds at 6-8 mph</b>				
Lighter Shrub Fuels	<b>6-15 ch/hr</b>	<b>6 - 7 ft</b>	1/10 MILE	50%
Heavy Southern Rough	<b>13-20 ch/hr</b>	<b>10 -15 ft</b>	1/10 MILE	50%
Timber Litter-Reburn	<b>3 – 5 ch/hr</b>	<b>2 - 3 ft</b>	1/10 MILE	50%
Small Pine Plantation	<b>15-25 ch/hr</b>	<b>10 -15 ft</b>	1/10 MILE	50%

**One hour fine dead fuel moisture is at 7% for Tuesday:** Areas remain dry and burning continues. 1,000 hour fuels are drier than normal for this time of year. There is re-burn potential; mainly on the west side of the fire due to the amount of needle cast, fallen trees and scorched shrubs. Should wind become stronger than predicted, expect fire behavior to increase above predicted levels. **In areas where fuels have been herbicided, expect quick ignitions, extreme heat, quicker rates-of-spread, and possible group tree torching potentially producing spotting problems.**

**NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.**

**All Divisions:**

*The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees.*

**Air Operations:** Expect possible areas of smoke.

**SAFETY:**  
**WINDS –** Stay abreast of changing wx conditions throughout the entire shift.

**THUNDERSTORMS** - these severe winds can create extreme fire behavior, with winds gusting over 30 mph  
**Live Trees/SNAGS – are falling in all Divisions and will be influenced by Thunderstorm outflow winds.**

**FUELS:** Watch for pockets of cured shrubs or blankets of red needles beginning to cover the forest floor, re-burn is continuing in some areas. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing the heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

**Energy Release Component (ERC) is running *WELL ABOVE AVERAGE* for this time of year.**

# HEALTH AND SAFETY MESSAGE

***SAFETY*** starts with ***YOU***

We are **ALL** accountable for **SAFE** behaviors

INCIDENT: HONEY PRAIRIE	DATE: SEPTEMBER 1, 2011	TIME: 0800
-------------------------	-------------------------	------------

## **Major Hazards and Risks:**

**COMMUNICATIONS  
TRANSITION  
WEATHER**

### Narrative:

**COMMUNICATIONS** = Keep all the personnel informed. Provide a briefing before shifts and update personnel as needed. Explain the intent of the assignment and how to safely accomplish the task. “THE ONLY STUPID QUESTION IS THE ONE YOU DON’T ASK!!!”

**TRANSITION** = Several personnel will be transitioning over the next couple of days. Ensure that they get a good briefing. Also over the next couple of days you will see some new faces.

**WEATHER** = Potential for storms continue to exist. Be prepared to seek adequate shelter from lightning, Watch out for outflow winds from passing thunder heads, and wet roads!  
**STAY HYDRATED**

6. INSTRUCTIONS AND ASSIGNMENTS NOT CLEAR

## LEADER’S INTENT

All leaders of firefighters have the responsibility to provide complete briefings and ensure that their subordinates have a clear understanding of their intent for the assignment:

**TASK** = What is to be done

**PURPOSE** = Why it is to be done

**END STATE** = How it should look when done

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Honey Prairie Fire		2. Date 9/1/2011		3. Time Day Shift	
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis					
Divisions	Indirect Fireline	Power lines / Snags	Road Conditions	Frontal Assault	Extreme Conditions	Railroad	Wildlife, Insects	LCES Mitigations	Smoke	Traffic/Driving	Communications	Fatigue/Hydration	School Buses / Children	Other Risk Mitigations	
All Divisions	1, 2, 3, 4, 5, 7, 8, 10, 14	2, 6, 11, 15, 17	12, 20, 26	1, 2, 3, 4, 5, 7, 8, 14	7, 10	1	2, 23, 28	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staging.	24	12 17 19 20 22, 26, 27	1, 3, 10 14 19 24 25	16 18 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings.	
								2. Look UP,DOWN and AROUND						17. Defensive driving will be addressed in all briefings.	
								3. Post experienced Lookouts. Make sure LCES is in place and make known.						18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.	
								4. Use Aerial Resources as Lookout if available.						19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.	
								5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps.						20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.	
								6. Identify, mark & mitigate.						21. Relocate staging area when driving conditions warrant.	
								7. FBAN/Meteorologist to monitor weather updates and advisories.						22. Use spotter when backing vehicle(s).	
								8. Ensure Fireline is Anchored to black or manmade/natural barrier.						23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing	
								10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations.						24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation.	
								11. Refer to IRPG, pg. 12 on Power Line Hazards.						25. Follow establish communication plan, flight follow through dispatch	
								12. Observe all traffic signals and speed limits. Drive with lights on.						26. Watch-out for school buses and for children along the edge of roadway and crossing the road.	
								14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).							
								15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.						27. Treat all intersections as 4-way stops	
														28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

**8. Medical Emergency Procedures**

**Identify any EMTs and Paramedics in your crews. All medical emergencies will be reported to the Division Supervisor who will assume command and notify Line Medics.**

**On scene personnel will:**

1. Provide medical care & stabilize patient.
2. Call 911 if possible or call phone #'s above for EMS and provide the information requested.
3. Notify Communications via radio over Command Channel
4. Communications will clear radio traffic for medical emergency.
5. Communications will confirm 911 has been notified coordinate with IC, SOF.
6. DIVS will notify the Field Ops Section Chief.

**MAJOR EMERGENCIES – Secure the area and identify witness for later investigation. Keep an accurate log of events. NOTE: Do not give Patients Name over the radio!**

INJURY REPORTING PROCESS:

Nature of Injury: \_\_\_\_\_

Location of Patient: \_\_\_\_\_

Transportation Requested by: Air\_\_\_ Ground\_\_\_

Pick Up Point: \_\_\_\_\_

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

## Fire Information IAP messages

1. Public and firefighter safety remains the top priority for this incident.
2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

### Commonly asked question:

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.
