Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As A Georgia Forestry Commission Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Trent Ingram

Incident Commander  
Georgia Forestry Commission Type 3 Incident Management Team

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> Honey Prairie Complex	<b>2. DATE PREPARED</b> 9/4/11	<b>3. TIME PREPARED</b> 1700												
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> Sunday, September 5, 2011 0800 – 2000															
<b>5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)</b> <ol style="list-style-type: none"> <li>1. Provide for safety of incident personnel and public in all incident operations.</li> <li>2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners.</li> <li>3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible.</li> <li>4. In cooperation with local land owners and communities, use full suppression strategies and tactics to minimize damage to private timberlands and structural improvements and to prevent fires outside the Refuge from entering the Refuge.</li> <li>5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander.</li> <li>6. Protect all cultural and archeological sites and structures within the refuge.</li> <li>7. Manage the fires cost-effectively consistent with the values at risk.</li> <li>8. Coordinate suppression actions with assigned Refuge Resource Advisors</li> </ol>															
<b>6. WEATHER FORECAST FOR OPERATIONAL PERIOD</b> See attached forecast for area specific weather information.															
<b>7. GENERAL SAFETY MESSAGE</b> Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.

# Fire Weather Forecast

**FORECAST NO:** 121  
**PREDICTION FOR:** Day Shift  
**SHIFT DATE:** MONDAY, Labor Day 9/5/11

**NAME OF FIRE:** Honey Prairie Complex  
**UNIT:** Okefenokee National Wildlife Refuge

**FORECAST ISSUED:** 9/4/11 at 1700

**SIGNED:** Coleen Decker, IMET

**WEATHER DISCUSSION:** Expect periods of rain and thunderstorms, gusty South winds, and local flooding. All together, this storm could accumulate 3 inches or rain from today through Tuesday night; with most of it falling this morning and again tonight.

**TODAY:** Cloudy. Very unstable and windy with numerous showers and thunderstorms. Some storms may become severe late today or tonight with damaging winds and the possibility of tornadic activity. Be prepared for watches or warnings and take safety precautions as necessary.

**MAXIMUM TEMPERATURES:** 90 °  
**PM HEAT INDEX:** 98 °  
**MINIMUM HUMIDITY:** 60 %  
**20 FT WINDS:** South-Southwest 12-15 with gusts to 25 mph  
**STABILITY/INVERSION:** 4000 feet  
**TRANSPORT WINDS:** South 25 mph  
**DISPERSION INDEX:** 60, Good  
**CHANCE OF PRECIPITATION:** 70%  
**LIGHTNING ACTIVITY LEVEL:** 4, Frequent lightning  
**PRECIPITATION AMOUNTS:** 2-3 inches of rain possible, with localized flooding

**TONIGHT:** Thunderstorms, possibly severe with strong south winds.

**TUESDAY:** Numerous showers and thunderstorms. Breezy South-Southwest winds 25-30 mph.

**MAXIMUM TEMPERATURES:** 92°  
**PM HEAT INDEX:** 98-100°  
**MINIMUM HUMIDITY:** 60 %  
**20 FT WINDS:** Southwest 15 mph with gusts to 25 mph  
**STABILITY/INVERSION:** 4000 feet  
**TRANSPORT WINDS:** Southwest 25 mph  
**DISPERSION INDEX:** 60, Good  
**CHANCE OF PRECIPITATION:** 70%  
**LIGHTNING ACTIVITY LEVEL:** 4, frequent lightning

**EXTENDED FORECAST** Drier air will wrap into the area with sinking air and gusty Southwest winds.

	WEDNESDAY	THURSDAY	FRIDAY
<b>SKY/WEATHER</b>	Partly Cloudy. Slight Chance of Thunderstorms.	Mostly Sunny.	Partly Cloudy.
<b>PRECIP</b>	20%	0%	0%
<b>20 FT. WINDS</b>	PM: SW 15 mph	PM: W 5-10 mph	PM: 12-15 mph
<b>MIN/MAX</b>	72/ 87	68/88	68/88

## FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #120 Issued: 09/4/2011 1830 hrs	Signed: Dave Fogler	Shift Date: <b>Monday 09/5/2011</b>

### GENERAL FIRE BEHAVIOR

Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within the swamp.

#### Indicators/Threshold for Increased Fire Activity

- Relative humidity dropping below 45%
- ***Winds above 10 mph***
- ***Heavy fuel loadings***
- Fine dead fuel moisture 8% or less
- Dispersion above 70

\* Items in **BOLD ITALICS** are predicted to occur today\*

### SPECIFIC FIRE BEHAVIOR

- Interior smoldering and some flare ups are possible, especially if winds increase.
- Expect fire to continue spreading through the shrub fuels with low rates of spread and minimal flame lengths.

## LIGHTNING ACTIVITY LEVEL 4

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
<b>Winds at 15-25 mph</b>				
Shrub Fuels	<b>13-25 ch/hr</b>	<b>6 - 7 ft</b>	1/10 MILE	50%
Southern Rough	<b>20-50 ch/hr</b>	<b>10 -15 ft</b>	1/10 MILE	50%
Reburn	<b>6-12 ch/hr</b>	<b>2 - 3 ft</b>	1/10 MILE	50%
Small PL Pines	<b>20-50 ch/hr</b>	<b>10 -15 ft</b>	1/10 MILE	50%

**One hour fine dead fuel moisture is at 9% for Tuesday:** Areas remain dry and burning continues. 1,000 hour fuels are drier than normal for this time of year. There is re-burn potential; mainly on the west side of the fire due to the amount of needle cast, fallen trees and scorched shrubs. Should wind become stronger than predicted, expect fire behavior to increase above predicted levels. **In areas where fuels have been herbicided, expect quick ignitions, extreme heat, quicker rates-of-spread, and possible group tree torching potentially producing spotting problems.**

**NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.**

### All Divisions:

*The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees.*

**Air Operations:** Expect possible areas of smoke.

#### **SAFETY:**

**WINDS** – Stay abreast of changing wx conditions throughout the entire shift.

**THUNDERSTORMS** - these severe winds can create extreme fire behavior, with winds gusting over 30 mph **Live Trees/SNAGS** – are falling in all Divisions and will be influenced by Thunderstorm outflow winds.

**FUELS:** Watch for pockets of cured shrubs or blankets of red needles beginning to cover the forest floor, re-burn is continuing in some areas. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing the heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

***Energy Release Component (ERC) is running WELL ABOVE AVERAGE for this time of year.***

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Honey Prairie Fire		2. Date 9/5/2011		3. Time Day Shift		
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis						
Divisions	Indirect Fireline	Power lines / Snags	Road Conditions	Frontal Assault	Extreme Conditions	Railroad	Wildlife, Insects	LCES Mitigations	Smoke	Traffic/Driving	Communications	Fatigue/Hydration	School Buses / Children	Other Risk Mitigations		
All Divisions	1, 2, 3, 4, 5, 7, 8, 10, 14	2, 6, 11, 15, 17	12, 20, 26	1, 2, 3, 4, 5, 7, 8, 14	7, 10	1	2, 23, 28	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staging.	24	12, 17, 19, 20, 22, 26, 27	1, 3, 10, 14, 19, 24, 25	16, 18, 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings.		
								2. Look UP, DOWN and AROUND						17. Defensive driving will be addressed in all briefings.		
								3. Post experienced Lookouts. Make sure LCES is in place and make known.						18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.		
								4. Use Aerial Resources as Lookout if available.						19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.		
							5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps.							20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.		
							6. Identify, mark & mitigate.								21. Relocate staging area when driving conditions warrant.	
							7. FBAN/Meteorologist to monitor weather updates and advisories.								22. Use spotter when backing vehicle(s).	
							8. Ensure Fireline is Anchored to black or manmade/natural barrier.								23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing	
							10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations.								24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation.	
							11. Refer to IRPG, pg. 12 on Power Line Hazards.								25. Follow establish communication plan, flight follow through dispatch	
							12. Observe all traffic signals and speed limits. Drive with lights on.								26. Watch-out for school buses and for children along the edge of roadway and crossing the road.	
							14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).									
							15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.								27. Treat all intersections as 4-way stops	
														28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

# **SECURITY PLAN**

## **HONEY PRAIRIE COMPLEX**

**DATE: August 26, 2011**

**PREPARED BY: Weldon A. Young**  
**SECURITY MANAGER (T)**

**APPROVED BY:** \_\_\_\_\_  
***LOGISTICS SECTION CHIEF***

**APPROVED BY:** \_\_\_\_\_  
***INCIDENT COMMANDER***

## PERSONNEL

<u>NAME</u>	<u>TITLE</u>
1. Weldon A. Young	Security Manager (T)
2. Robert Gydus	Security SEC 1
3. Detailers	Security SEC 1 & SEC 2

## KEY AREAS

### A. ICP:

- Safety of ICP personnel
- Ensure compliance of ICP governing alcohol and/or drug use
- Prevent and/or deter loss or theft of government and/or personal property or equipment

### B. Security needed:

- Security Level 1's are needed should situations arise that warrant physical arrest, search & seizures and obtaining professional reports
- Ensure that non-fire personnel remain outside of the work zone of ICP
- Ensure that all incoming personnel are checked-in or possess an identification badge
- Fixed post at entry and exit gate to be staffed twenty-four hours a day as needed

## 1. SUPPLY

### A. Security concerns:

- Prevent theft of state, government, and contractor equipment

### B. Security needed:

- Insure that equipment within cache are not compromised by theft by conducting periodic day/night patrols

## 2. QUARTERS

### A. Security concerns:

- Rest of crews
- Security of personal belongings when crews are on line from thefts

### B. Security needed:

- Periodic Roving Patrols twenty-four hours a day

### **3. CACHE**

#### **A. Security concerns:**

- Theft of commodities
- Orderly conduct of personnel during camp facilities
- Non-fire personnel utilizing services of camp food

#### **B. Security needed:**

- Periodic Roving Patrols twenty-four hours a day

### **4. PARKING AREAS**

#### **A. Security concerns:**

- Theft of vehicles
- Theft of equipment on vehicles
- Theft of equipment within vehicles

#### **B. Security needed:**

- Periodic patrols of parking areas twenty-four hours a day

### **5. INGRESS/EGRESS AREAS**

#### **A. Security concerns:**

- Non-fire personnel entering and interfering with passage of vehicle traffic and foot traffic
- Staging areas, and temporary cache sites

#### **B. Security needed:**

- Patrols and monitoring of the areas to ensure non-interference with incident personnel

### **6. HELIBASE**

#### **A. Security concerns:**

- Security of helicopters
- Security of helibase personnel
- Civilians within danger zones of drops, lifts, emergency situations

#### **B. Security needed:**

- Frequent patrols twenty-four hours a day

### **7. CLOSED AREAS**

#### **A. Security concerns:**

- Insure that non-fire personnel are not utilizing roads that may jeopardize the safety of the fire crew and civilians alike.
- Insure employees within fire hazard areas are trained in fire shelter deployment

- Insure employees within fire hazard areas are outfitted in PPE

**B. Security needed:**

- Provide security to roadblocks and other closed areas as needed

**8. OTHER**

**A. Security concerns:**

- Illegal drugs or possessing alcohol in violation of camp rules and/or state law
- State and private land in-holdings
- Promote and create awareness and encourage compliance with safe driving procedures
- Promote cultural awareness and ensure mutual respect

**B. Security needed:**

- Maintain sufficient staffing levels consistent with the date of this plan

**LAW ENFORCEMENT CONTACTS**

<u>NAME</u>	<u>AGENCY</u>	<u>PHONE</u>
1. Jim Shelton	USFW LEO	912-288-7481
2. Joe Morrison	Ware County Sheriff Dept.	912-281-6020
3. Robbie Sutton	Tri County 911	912-599-9027
4. GSC	Georgia State Patrol	912-287-6500
5. Emergency	Emergency	911

**NARRATIVE/SPECIAL NEEDS**

- Maintain relationships with the NWR landowners and emergency personnel.

## Fire Information IAP messages

1. Public and firefighter safety remains the top priority for this incident.
2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

### Commonly asked question:

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.
