Initial Attack – F4PM

An Equal Opportunity Employer & Service Provider

Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As A Georgia Forestry Commission Type 3 Incident Commander, I am committed to a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both "on Duty" and "off Duty" while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Trent Ingram

Incident Commander Georgia Forestry Commission Type 3 Incident Management Team

INCIDENT OBJECTIVES	1. INCIDENT NAM Honey Pra Comple	airie	2. DATE PREPARED 9/8/11	3. TIME PREPARED 1700							
4. OPERATIONAL PERIOD (DATE/TIME)	Ĩ										
	Tuesday, Sep	tember	9, 2011								
	0800	- 2000									
5. GENERAL CONTROL OBJECTIVES F	OR THE INCIDENT (INCLUDE	ALTERNATIVES)								
1. Provide for safety of incident personnel and public in all incident operations.											
2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners.											
3. Contain all fires that are within inside the swamp edge break if p		Nationa	l Wildlife Refuge, insid	de the Refuge and/or							
 In cooperation with local land ov minimize damage to private tim the Refuge from entering the Re 	nberlands and str			-							
5. Assist in management and supplication of approved by Agency Administrated			•	outs) in the vicinity as							
6. Protect all cultural and archeolog	gical sites and stru	uctures w	vithin the refuge.								
7. Manage the fires cost-effectively	consistent with t	he value	s at risk.								
8. Coordinate suppression actions v	with assigned Refu	uge Reso	urce Advisors								
6. WEATHER FORECAST FOR OPERAT	IONAL PERIOD

FORECAST NO:125PREDICTION FOR:Day ShiftSHIFT DATE:FRIDAY 9/9/11

NAME OF FIRE: Honey Prairie Complex **UNIT:** Okefenokee National Wildlife Refuge

FORECAST ISSUED: 9/8/11 at 1600

SIGNED: Coleen Decker, IMET

WEATHER DISCUSSION: The Honey Prairie Fire lies in the seam between low pressure in Missouri and higher pressure off the coast behind Hurricane Katia. This weather pattern will gradually draw moisture and instability into the area from Tropical Storm Nate, which is forecast to move into the Gulf of Mexico this weekend. As such, we will transition to a period where afternoon thunderstorms are possible each day, but temperatures will remain near seasonal normals.

TODAY: Mos	tly sunny.
MAXIMUM TEMPERATURES:	86-88°
MINIMUM HUMIDITY:	30-35%
20 FT WINDS:	West-Southwest 5-7 mph
STABILITY/INVERSION:	5000 feet
TRANSPORT WINDS:	West-Southwest 10 mph
DISPERSION INDEX:	55, Good
CHANCE OF PRECIPITATION:	20%
LIGHTNING ACTIVITY LEVEL:	2, Isolated thunderstorm possible, mainly South
<u>TONIGHT:</u> Par	ly cloudy with excellent humidity recovery after midnight.
Ligh	It Northwest wind 5 to 7 mph. Low temperature 64°.
SATURDAY: Part	ly Cloudy and a little warmer.
MAXIMUM TEMPERATURES:	90-93°
MINIMUM HUMIDITY:	40%
20 FT WINDS:	Northwest 5-7 mph
STABILITY/INVERSION:	5000 feet
TRANSPORT WINDS:	Southwest becoming South in the afternoon. 10 mph
DISPERSION INDEX:	55, Good
CHANCE OF PRECIPITATION:	30%
LIGHTNING ACTIVITY LEVEL:	2, A Few thunderstorms expected

EXTENDED FORECAST Moisture from Tropical Storm Nate will gradually increase on Southerly flow aloft. This will combine with afternoon instability for a chance of showers and thunderstorms.

	SUNDAY	MONDAY	TUESDAY
SKY/WEATHER	Partly Cloudy	Partly Cloudy	Partly Cloudy
PRECIP	30%	40%	40%
20 FT. WINDS	Southeast 5-10 mph	Northeast 10 mph	Northeast 10 mph
MIN/MAX	64/90	67/90	68/90

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. <u>Mode</u> refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

Fire Information IAP messages

- 1. Public and firefighter safety remains the top priority for this incident.
- 2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
- 3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
- 4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only "mother nature" has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
- 5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
- 6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

Commonly asked question:

 Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.

Hunter Encounters and Confrontations

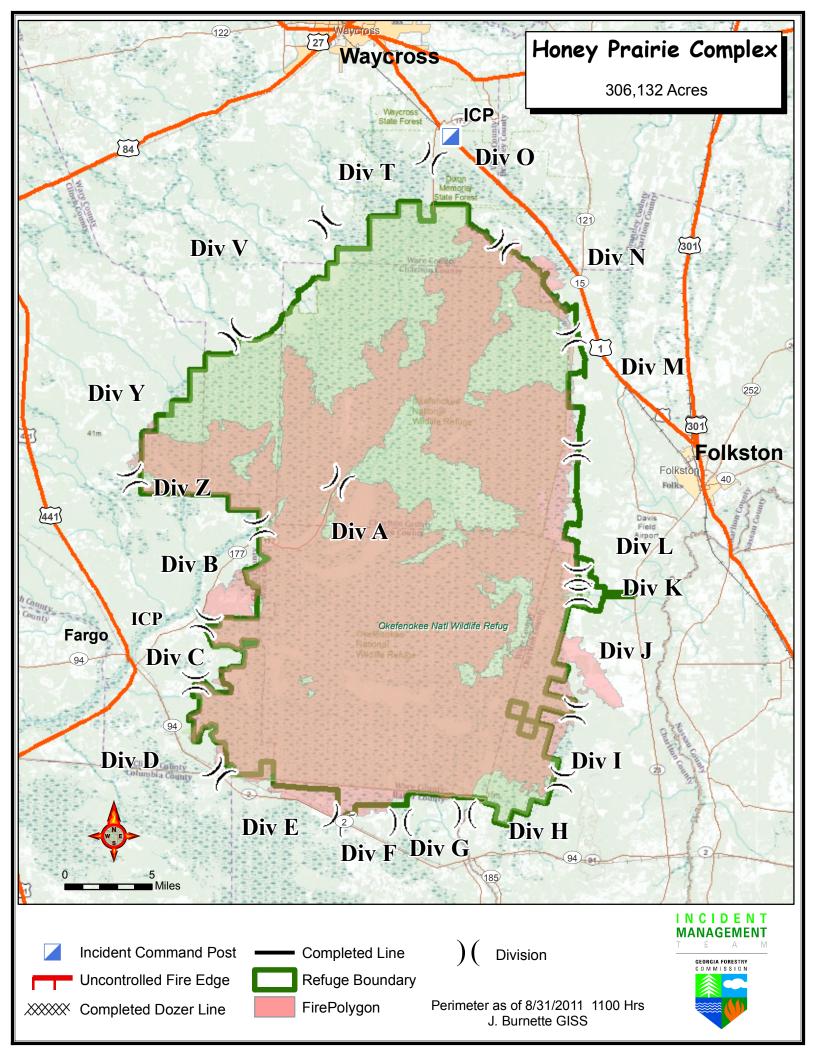

Archery season starts on Saturday, September 10th. Crews are likely to encounter hunters either hunting or scouting in the area of the Swamp Edge Break.

Expect many questions about the fire operations and how long the fire will continue to burn. It's a good idea to review the Fire Information section of the plan for a good explanation of what to expect in the coming months.

The majority of the hunters will be friendly but should you have a confrontation with someone:

- 1. Politely excuse yourself and leave the area immediately;
- 2. Notify your supervisor;
- 3. Call the Georgia DNR at 1-800-241-4113 (In IAP phone list);
- 4. Describe the person, vehicle, and the nature of the confrontation.

Georgia DNR will send an officer to handle the situation.
