Letter from Incident Commander:

To: All Honey Prairie Incident Personnel

As a Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s Rick Dolan

Incident Commander
Type 3 Incident Management Team

INCIDENT OBJECTIVES	1. INCIDENT NAME Honey Prairie Complex	2. DATE PREPARED 9/12/11	3. TIME PREPARED 1700												
4. OPERATIONAL PERIOD (DATE/TIME) Tuesday, September 13, 2011 0800 – 2000															
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) <ol style="list-style-type: none"> 1. Provide for safety of incident personnel and public in all incident operations. 2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners. 3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. 4. In cooperation with local land owners and communities, use full suppression strategies and tactics to minimize damage to private timberlands and structural improvements and to prevent fires outside the Refuge from entering the Refuge. 5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander. 6. Protect all cultural and archeological sites and structures within the refuge. 7. Manage the fires cost-effectively consistent with the values at risk. 8. Coordinate suppression actions with assigned Refuge Resource Advisors 															
6. WEATHER FORECAST FOR OPERATIONAL PERIOD See attached forecast for area specific weather information.															
7. GENERAL SAFETY MESSAGE Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.

Fire Weather Forecast

FORECAST NO: 129
PREDICTION FOR: Day Shift
SHIFT DATE: TUESDAY 9/13/11

NAME OF FIRE: Honey Prairie Complex
UNIT: Okefenokee National Wildlife Refuge

FORECAST ISSUED: 9/12/11 at 1600

SIGNED: *Heath Hockenberry*, IMET

WEATHER DISCUSSION: A hot and dry airmass has settled over the fire area. Wind flow is expected to mainly be out of the north to northeast today, with some periods of northwesterly flow. Winds decreasing in speed and becoming variable on Wednesday. Late afternoon seas breeze push possible very late in the day. Thunderstorm chances are near zero through Thursday.

TODAY: Partly cloudy, hot and dry.

MAXIMUM TEMPERATURES: 94°
MINIMUM HUMIDITY: 26 to 31%
20 FT WINDS: North-Northwest 4 to 8 mph, gusts to 14 mph.
STABILITY/INVERSION: 7300 feet
TRANSPORT WINDS: North-Northwest 8 to 14 mph.
DISPERSION INDEX: 60, Good
CHANCE OF PRECIPITATION: 0%.
LIGHTNING ACTIVITY LEVEL: 1

TONIGHT: Mostly clear with morning smoke. Excellent humidity recovery above 80 percent after 0200 hours.
Variable wind to 3 mph. Low temperature 65°.

WEDNESDAY: Partly cloudy. Afternoon sea breeze possible late

MAXIMUM TEMPERATURES: 94°
MINIMUM HUMIDITY: 27 to 32%
20 FT WINDS: Variable 3 to 8 mph,
STABILITY/INVERSION: 7300 feet
TRANSPORT WINDS: East-Northeast 4 to 9 mph
DISPERSION INDEX: 50, Good
CHANCE OF PRECIPITATION: 0%
LIGHTNING ACTIVITY LEVEL: 1

EXTENDED FORECAST A cold front with a significant wind change expected on Friday. Variable wind with a cold front, shifting to the northeast Friday afternoon and increasing in speed. A chance of isolated thunderstorms and showers Friday and Saturday with increased relative humidity.

	THURSDAY	FRIDAY	SATURDAY
SKY/WEATHER	Increasing clouds.	Becoming Cloudy	Mostly cloudy with a chance of showers and thunderstorms
THUNDER/PRECIP	0 %	20 %	20%
20 FT. WINDS	Variable wind early, shifting to the South 5 to 9 mph	S/SW early, becoming Northeast 8 to 16 mph	Northeast 8 to 14 mph, gusting to 23mph
MIN/MAX	65/92	66/90	67/86

FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #129 Issued: 09/12/2011 1600 hrs	Signed: Dave Fogler	Shift Date: Monday 09/13/2011

GENERAL FIRE BEHAVIOR
 Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within and around the swamp.

Indicators/Threshold for Increased Fire Activity

- Relative humidity below 30%**
- Fine dead fuel moisture 8% or less**
- Winds above 10 mph**
- Dispersion above 70**
- Heavy fuel loadings**

* Items in **BOLD ITALICS** are predicted to occur today*

SPECIFIC FIRE BEHAVIOR

- Interior smoldering and some flare ups are possible, especially if winds increase.
- Expect fire to continue spreading through the shrub fuels with low rates of spread and minimal flame lengths.

LIGHTNING ACTIVITY LEVEL 2

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
Winds at 4-6 mph	Possible NORTH WINDS could lead to control problems			
Shrub Fuels	5-8 ch/hr	4-6 ft	1/10 MILE	55%
Southern Rough	10-20 ch/hr	8-10 ft	UP to 2/10 MILE	55%
Reburn	3-5 ch/hr	2 - 3 ft	1/10 MILE	55%
Small PL Pines	10-15 ch/hr	8-10 ft	1/10 MILE	55%

One hour fine dead fuel moisture is at 7% for Tuesday: Areas remain dry and burning continues. 1,000 hour fuels are drier than normal for this time of year. There is re-burn potential; mainly on the west side of the fire due to the amount of needle cast, fallen trees and scorched shrubs. Should wind become stronger than predicted, expect fire behavior to increase above predicted levels. **In areas where fuels have been herbicided, expect quick ignitions, extreme heat, quicker rates-of-spread, and possible group tree torching potentially producing spotting problems.**

NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.

All Divisions:

The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees.

Air Operations: Expect possible areas of smoke.

SAFETY:

WINDS – Stay abreast of changing wx conditions throughout the entire shift.

THUNDERSTORMS - these severe winds can create extreme fire behavior, with winds gusting over 30 mph
Live Trees/SNAGS – are falling in all Divisions and will be influenced by Thunderstorm outflow winds.

FUELS: Watch for pockets of cured shrubs or blankets of red needles beginning to cover the forest floor, re-burn is continuing in some areas. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing the heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

Energy Release Component (ERC) is running WELL ABOVE AVERAGE for this time of year.

SAFETY MESSAGE

Incident: **Honey Prairie**

Date: September 13 , 2011 Time: 0800

HAZZARDOUS TREES SAFETY

Consider 'Standard Firefighting Orders' number

5. Post lookouts when there is possible danger

Consider 'Watch Out Situations'

15. Wind increases and /or changes direction.

Look on page 20 and 21 of your IRPG - How to mitigate Hazard Trees!

Situation Awareness

Safety wants you to be prepared to answer questions about 'Hazard Trees' an example:

1. What are some hazard tree indicators?
2. What can you do to mitigate the hazard tree danger in your area?

Environment:

- Current and forecasted winds
- Night operations
- Diseased or bug-kill areas
- Number and height of hazard trees
- Anticipated burn-down time
- Potential for trees to domino

Hazard tree indicators:

- Trees burning for any period of time
- High risk tree species (rot and shallow roots)
- Numerous downed trees
- Dead, broken, or burning tops and limbs overhead
- Accumulation of downed limbs
- Absence of needles, bark, or limbs
- Leaning or hung-up
- Evaluate the risk (risk vs return)

Prepared by: Ronald Taylor

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Honey Prairie Fire		2. Date 9/13/2011		3. Time Day Shift	
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis					
Divisions	Indirect Fireline	Power lines / Snags	Road Conditions	Frontal Assault	Extreme Conditions	Railroad	Wildlife, Insects	LCES Mitigations	Smoke	Traffic/Driving	Communications	Fatigue/Hydration	School Buses / Children	Other Risk Mitigations	
All Divisions	1, 2, 3, 4, 5, 7, 8, 10, 14	2, 6, 11, 15, 17	12, 20, 26	1, 2, 3, 4, 5, 7, 8, 14	7, 10	1	2, 23, 28	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staging.	24	12 17 19 20 22, 26, 27	1, 3, 10 14 19 24 25	16 18 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings.	
								2. Look UP,DOWN and AROUND						17. Defensive driving will be addressed in all briefings.	
								3. Post experienced Lookouts. Make sure LCES is in place and make known.						18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely.	
								4. Use Aerial Resources as Lookout if available.						19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.	
								5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps.						20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages.	
								6. Identify, mark & mitigate.						21. Relocate staging area when driving conditions warrant.	
								7. FBAN/Meteorologist to monitor weather updates and advisories.						22. Use spotter when backing vehicle(s).	
								8. Ensure Fireline is Anchored to black or manmade/natural barrier.						23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing	
								10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations.						24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation.	
								11. Refer to IRPG, pg. 12 on Power Line Hazards.						25. Follow establish communication plan, flight follow through dispatch	
								12. Observe all traffic signals and speed limits. Drive with lights on.						26. Watch-out for school buses and for children along the edge of roadway and crossing the road.	
								14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).							
								15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.						27. Treat all intersections as 4-way stops	
														28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

8. Medical Emergency Procedures

Identify any EMTs and Paramedics in your crews. All medical emergencies will be reported to the Division Supervisor who will assume command and notify Line Medics.

On scene personnel will:

1. Provide medical care & stabilize patient.
2. Call 911 if possible or call phone #'s above for EMS and provide the information requested.
3. Notify Communications via radio over Command Channel
4. Communications will clear radio traffic for medical emergency.
5. Communications will confirm 911 has been notified coordinate with IC, SOF.
6. DIVS will notify the Field Ops Section Chief.

MAJOR EMERGENCIES – Secure the area and identify witness for later investigation. Keep an accurate log of events. NOTE: Do not give Patients Name over the radio!

INJURY REPORTING PROCESS:

Nature of Injury: _____

Location of Patient: _____

Transportation Requested by: Air ___ Ground ___

Pick Up Point: _____

Lat: _____ Long: _____

Patient Unit ID: _____

Is an EMT w/Patient: Yes ___ No ___

Age: ___ Sex: Male ___ Female ___

Weight (If Air Evac. is needed): _____

Fire Information IAP messages

1. Public and firefighter safety remains the top priority for this incident.
2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

Commonly asked question:

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.

Hunter Encounters and Confrontations

Archery season is open. Crews are likely to encounter hunters either hunting or scouting in the area of the Swamp Edge Break.

Expect many questions about the fire operations and how long the fire will continue to burn. It's a good idea to review the Fire Information section of the plan for a good explanation of what to expect in the coming months. The majority of the hunters will be friendly but should you have a confrontation with someone:

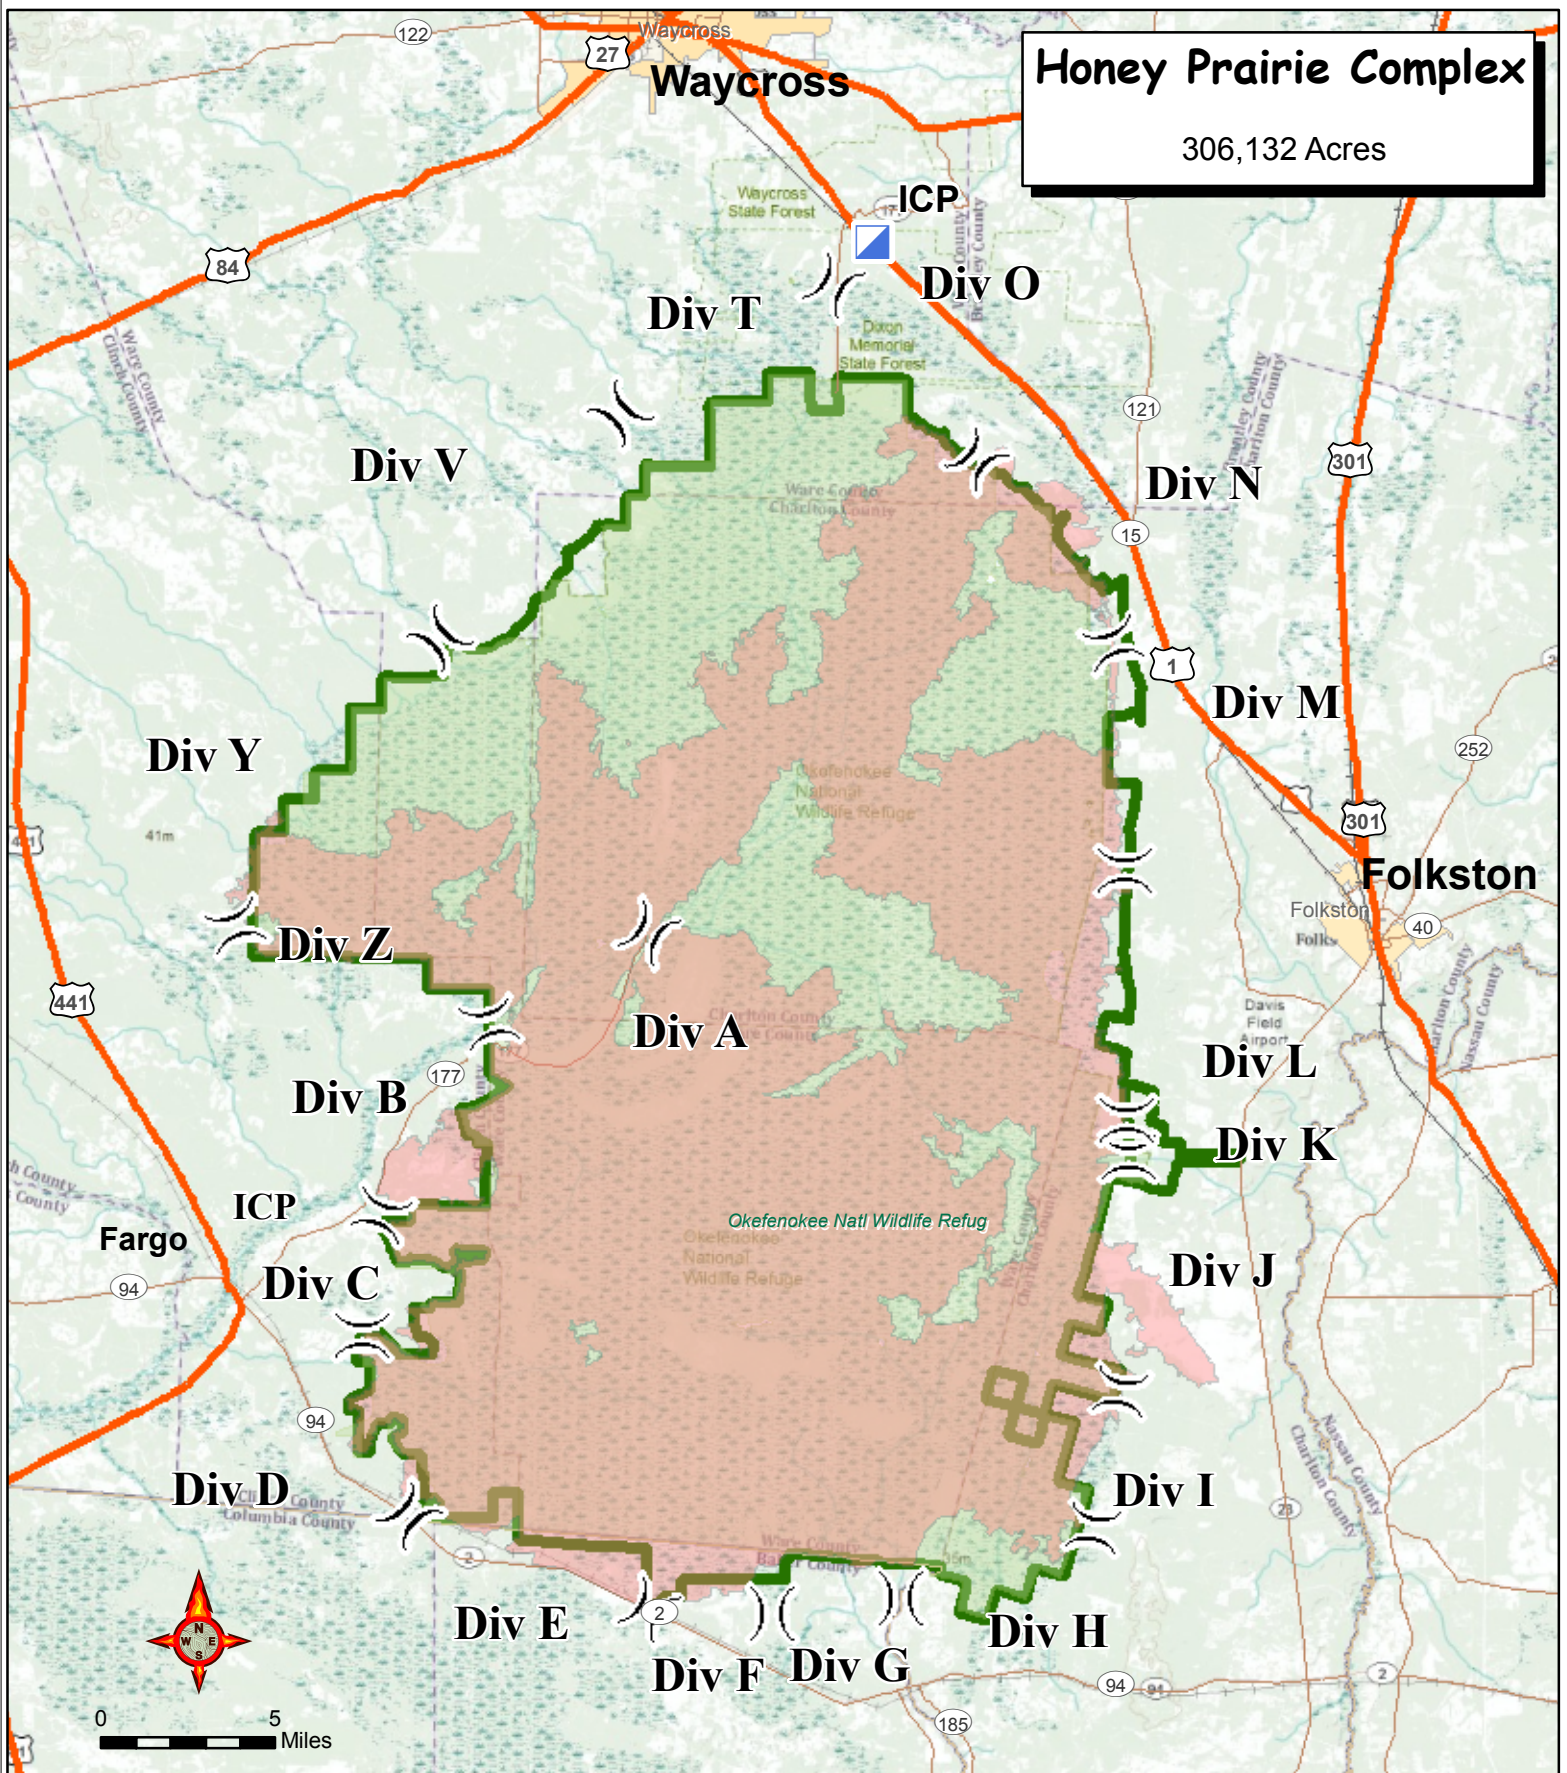

1. Politely excuse yourself and leave the area immediately;
2. Notify your supervisor;
3. Notify the Security Manager by radio or phone:

SECM - Weldon Young 414-312-1389

4. If necessary, call the Georgia DNR at 1-800-241-4113 with a description of the person, vehicle, and the nature of the confrontation. Georgia DNR will send an officer to handle the situation.
