Honey Prairie Complex GA-OKR-000001 Incident Action Plan

Operational Period Thursday

October 6, 2011 0800-2000

Incident Commander Steve Gray Bryce Thomas (T)

Accounting Codes

FWS - 9141-F25M-2J NPS - 5023 F25M E11 BLM - F25M USFS - PRF25M_1502 Initial Attack - F4PM

Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As a Type 3 Incident Commander, I am committed to a policy of "zero tolerance" of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both "on Duty" and "off Duty" while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Steve Gray

Incident Commander
Type 3 Incident Management Team

- Patrol fire perimeter
- Initial attack IC will communicate sizeup information to the Honey Prairie communication.
- Make contact with the resource advisor before using mechanical equipment.
- Continue to work with resource advisor on Refuge rehab objectives.

8. Special Instructions

- Ensure LCES are in place before operations begin. Stay hydrated.
- Drive defensively with lights on at all times and use extra caution on wet or dry roads.
- Boggy terrain: Be careful and aware when working around this type of area.
- Avoid areas with potential tree fall.

Fire Weather Forecast

FORECAST NO: 152

PREDICTION FOR: Day Shift

NAME OF FIRE: Honey Prairie Complex UNIT: Okefenokee National Wildlife Refuge

SHIFT DATE: Thursday 10/06/11

FORECAST ISSUED: 10/05/11 at 1600 SIGNED: Joel Rothfuss, IMET

<u>WEATHER DISCUSSION:</u> High pressure will remain north of the area with a developing low pressure system to the south. The pressure gradient continues to increase across the area with increasing wind. Low level moisture increases with afternoon showers possible.

TODAY: . Partly cloudy. Possible late afternoon isolated showers on east side of fire.

MAXIMUM TEMPERATURES: 82-84 MINIMUM HUMIDITY: 40 to 45%

20 FT WINDS: Northeast 2 to 5 mph, becoming Northeast to East 10 to 13 mph

with gusts to 16-18 mph in the afternoon.

STABILITY/INVERSION: 5500 feet

TRANSPORT WINDS: Northeast 20 mph DISPERSION INDEX: 70, Very Good

CHANCE OF PRECIPITATION: 10% LIGHTNING ACTIVITY LEVEL: 1

TONIGHT: Partly cloudy. Low temperature 52-55. Winds Northeast

3 to 6 mph.

<u>Friday:</u> Partly cloudy. A Slight chance of afternoon showers. Winds increasing.

MAXIMUM TEMPERATURES: 80-82° **MINIMUM HUMIDITY**: 45-48%

20 FT WINDS: Northeast 5-8 mph becoming Northeast to East 12 to 15 mph in

the afternoon with gusts to 20 mph.

STABILITY/INVERSION: 5400 feet

TRANSPORT WINDS: Northeast 25 mph. **DISPERSION INDEX:** 75, Very Good.

CHANCE OF PRECIPITATION: 20% LIGHTNING ACTIVITY LEVEL: 1

.....

EXTENDED FORECAST: High pressure north of the area with a low pressure center developing south. Northeast to east winds increasing. Becoming mostly cloudy with a chance of rain showers and possible thunderstorms.

	SATURDAY	SUNDAY	MONDAY
SKY/WEATHER	Mostly Cloudy with a slight chance of showers	Mostly Cloudy with a chance of showers and thunderstorms	Mostly Cloudy with numerous showers and thunderstorms
THUNDER/PRECIP	20%	50%	60%
20 FT. WINDS	Northeast to east 11 to 14 mph with gusts to 20 mph	Northeast 12 mph with gusts to 20 mph	Northeast 12 to 15 mph with gusts to 25 mph
MIN/MAX	60/80	63/78	65/82
Relative Humidity	47 to 50%	55 to 60%	55 to 60%

Fire: Honey Prairie Complex Forecast #152 Issued: 10/5/2011 1600 hrs Unit: GA-OKR-000001 Signed: David Fogler Shift Date: Thursday 10/6/2011

GENERAL FIRE BEHAVIOR

Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within and around the swamp.

Indicators/Threshold for Increased Fire Activity

- Relative humidity below 45%
- Winds above 10 mph
- · Heavy fuel loadings

- Fine dead fuel moisture 8% or less
- Dispersion above 70
- * Items in BOLD ITALICS are predicted to occur today*

SPECIFIC FIRE BEHAVIOR

- Interior smoldering may become active burning with flare ups and re-burn possible.
- Expect fire to continue smoldering with potential open flame as heated areas are fanned by winds. Backing fire will progress in organic leaf mats, muck soils, and un-burnt shrubs in the Refuge Wilderness swamp area.

LIGHTNING ACTIVITY LEVEL 1

	Rates of Spread	Flame Leng	th Spotting Distance	Firebrand Ignition		
Winds at 6-9 mph	Winds will be brisk from the Northeast - East					
Small PL Pines (4)	35-60 ch/hr	14-18 ft	UP to 2/10 MILE	50%		
Southern Rough (7)	15-25 ch/hr	4-6 ft	UP to 2/10 MILE	50%		
Reburn (9)	4-8 ch/hr	2-3 ft	UP to 2/10 MILE	50%		
Shrub Fuels (sh8)	10-17 ch/hr	7-9 ft	UP to 2/10 MILE	50%		

One hour fine dead fuel moisture is 7% for Thursday: Smoldering in the duff and larger fuels will continue. 1,000 hour fuels remain drier than normal for this time of year. Re-burn potential is likely due to lower humidity's in the areas that have received minimal rainfall. The uncontrolled fire edge in the Wilderness swamp will continue to burn through organic soils, leaf litter and downed woody material. If contiguous fuels are ignited, spread and spotting potential will increase due to lower humidity and higher winds

NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN <u>UNBURNED</u> FUELS INCLUDING NEW IA STARTS.

All Divisions:

The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees. Re-burn potential is likely.

<u>Air Operations</u>: Expect an increase in smoke from the fire.

SAFETY:

Brisk Winds – Watch for increasing winds throughout the afternoon

Live Trees/SNAGS – are falling in all Divisions and will be influenced by Increased winds.

FUELS: Watch for pockets of cured shrubs or blankets of needle cast. Re-burn is possible in some area. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing a heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

Energy Release Component (ERC) is running WELL ABOVE AVERAGE for this time of year.

Safety Message

INCIDENT: Honey Prairie Fire DATE: 10/06/2011 TIME: 0800

Major Hazards and Risks: Hunters

Drug and Alcohol

Hydration

Hunters in area – Tomorrow starts the Bear hunt again for three days, Be aware of increased traffic of bear hunters in the area. We are also in the middle of Muzzle Loader and Archery season. We will coordinate travel routes and activities around the area to minimize the impact on the hunters, but we still have a job to do.

Drug and Alcohol – We represent the USFWS, your agency as well as the fire organization as a whole, Therefore we must be professional in our actions. We must be ready to complete the mission at hand, so we must be fit for Duty at a moments notice.

Hydration – With the weather getting dryer and the increased activity of the fire, make sure you stay hydrated. By the time you get thirsty you are behind the curve, start early in the morning drinking water. Remember the proper ratio of 3 waters to 1 sport drink. If you are not downloading throughout the day you are not drinking enough water.

Keep your Situational Awareness up!

RUNNING."

LCES

LCES must be established and known to **ALL** firefighters **BEFORE** it is needed.

Lookout(s)

Communication(s)

Escape Route(s)

Safety Zone(s)

- Survivable without a fire shelter
- Back into clean burn
- Natural features (rock areas, water, meadows)
- Constructed sites (clearcuts, roads, helispots)
- Scouted for size and hazards
- Upslope?
- Downwind?
- Heavy Fuels?

Escape time and safety zone size requirements will change as fire behavior changes.

More heat impact = Larger safety zone

IRPG Page 6

Post experienced Lookouts. Make sure LCES is in place and make known. 4. Use Aerial Resources as Lookout if available.		12 17 19 20 22, 26, 27	1, 3, 10 14 19 24 25	1	6 8 21		16. Take adequate rest breaks and encourage to drink water NOW through briefings. 17. Defensive driving will be addressed in all briefings. 18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely. 19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.
										 Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps. Identify, mark & mitigate. FBAN/Meteorologist to monitor weather updates and advisories. Ensure Fireline is Anchored to black or manmade/natural barrier. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations. Refer to IRPG, pg. 12 on Power Line Hazards. Observe all traffic signals and speed limits. Drive with lights on. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.). Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged. 							20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages. 21. Relocate staging area when driving conditions warrant. 22. Use spotter when backing vehicle(s). 23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing 24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation. 25.Follow establish communication plan, flight follow through dispatch 26. Watch-out for school buses and for children along the edge of roadway and crossing the road. 27. Treat all intersections as 4-way stops 28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

Hunter Encounters and Confrontations

Bear, Archery, and Muzzle Loader season is now open. Crews are likely to encounter hunters either hunting or scouting in the area of the Swamp Edge Break. Bear Hunter will be running dogs and chasing the pack in vehicles on narrow dusty roads to intercept bears. Use Caution traveling as hunters may not be paying attention and traveling at excessive speeds.

Avoid contact as much as possible. The least amount of impact we have on their hunting area the better off we will be. Expect many questions about the fire operations and how long the fire will continue to burn. It's a good idea to review the Fire Information section of the plan for a good explanation of what to expect in the coming months.

The majority of the hunters will be friendly but should you have a confrontation with someone:

- 1. Politely excuse yourself and leave the area immediately;
- 2. Notify your supervisor;
- 3. Notify the Security Manager by radio or phone:

SECM - Michael Tipton 706-633-6419

Or

GA DNR Gary Simmons 912-282-2406 Cell

4. If necessary, call the Georgia DNR at 1-800-241-4113 with a description of the person, vehicle and Tag number, and the nature of the confrontation. Georgia DNR will send an officer to handle the situation.

Fire Information IAP messages

- 1. Public and firefighter safety remains the top priority for this incident.
- 2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
- 3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
- 4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only "mother nature" has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
- 5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
- 6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

Commonly asked question:

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.
