Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As a Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Steve Gray

Incident Commander  
Type 3 Incident Management Team

<b>INCIDENT OBJECTIVES</b>	<b>1. INCIDENT NAME</b> Honey Prairie Complex	<b>2. DATE PREPARED</b> 10/06/11	<b>3. TIME PREPARED</b> 1700												
<b>4. OPERATIONAL PERIOD (DATE/TIME)</b> Thursday, October 7, 2011 0800 – 2000															
<b>5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES)</b> <ol style="list-style-type: none"> <li>1. Provide for safety of incident personnel and public in all incident operations.</li> <li>2. Maintain a positive working relationship with all adjacent landowners, cooperators, State and Federal partners. Inform, involve and communicate incident planning and operations with all partners.</li> <li>3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible.</li> <li>4. In cooperation with local land owners and communities, use full suppression strategies and tactics to minimize damage to private timberlands and structural improvements and to prevent fires outside the Refuge from entering the Refuge.</li> <li>5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander.</li> <li>6. Protect all cultural and archeological sites and structures within the refuge.</li> <li>7. Manage the fires cost-effectively consistent with the values at risk.</li> <li>8. Coordinate suppression actions with assigned Refuge Resource Advisors</li> </ol>															
<b>6. WEATHER FORECAST FOR OPERATIONAL PERIOD</b> See attached forecast for area specific weather information.															
<b>7. GENERAL SAFETY MESSAGE</b> Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.

# Fire Weather Forecast

**FORECAST NO:** 153  
**PREDICTION FOR:** Day Shift  
**SHIFT DATE:** Friday 10/07/11

**NAME OF FIRE:** Honey Prairie Complex  
**UNIT:** Okefenokee National Wildlife Refuge

**FORECAST ISSUED:** 10/06/11 at 1600 EDT

**SIGNED:** Joel Rothfuss, IMET

**WEATHER DISCUSSION:** High pressure will remain north of the area with a developing low pressure to the south. The pressure gradient continues to increase across the area with increasing wind, cloudiness and the chances of rain.

**TODAY:** .Becoming mostly cloudy. A chance of showers. An isolated thunderstorm possible.

**MAXIMUM TEMPERATURES:** 80-82  
**MINIMUM HUMIDITY:** 52 to 55%  
**20 FT WINDS:** Northeast 4 to 7 mph becoming Northeast 10 to 13 mph with gusts to 20 mph.  
**STABILITY/INVERSION:** 5100 feet  
**TRANSPORT WINDS:** Northeast 20 mph  
**DISPERSION INDEX:** 75, Very Good  
**CHANCE OF PRECIPITATION:** 40%  
**LIGHTNING ACTIVITY LEVEL:** 2

**TONIGHT:** Partly cloudy. Chance of showers. Low temperature 55 to 60. Wind northeast 5 to 8 mph.

**Saturday:** Mostly cloudy. A chance of showers and isolated thunderstorms. Wind increasing.

**MAXIMUM TEMPERATURES:** 78-80°  
**MINIMUM HUMIDITY:** 58-62%  
**20 FT WINDS:** Northeast 12-15 mph with gusts to 23 mph.  
**STABILITY/INVERSION:** 4800 feet  
**TRANSPORT WINDS:** Northeast 25 mph.  
**DISPERSION INDEX:** 78, Very Good.  
**CHANCE OF PRECIPITATION:** 50%  
**LIGHTNING ACTIVITY LEVEL:** 2

**EXTENDED FORECAST:** High pressure remains fixed in place to the north with an area of low pressure over the Florida Straits moving northward. Mostly cloudy and breezy with a good chance of rain showers and thunderstorms.

	<b>SUNDAY</b>	<b>MONDAY</b>	<b>Tuesday</b>
<b>SKY/WEATHER</b>	Mostly Cloudy with a chance of showers and thunderstorms	Mostly Cloudy with numerous showers and thunderstorms	Mostly Cloudy with a chance of showers and thunderstorms
<b>THUNDER/PRECIP</b>	50%	60%	50%
<b>20 FT. WINDS</b>	Northeast 12 mph with gusts to 20 mph	East 12 to 15 mph with gusts to 20 mph	Southeast 10 mph with gusts to 20 mph.
<b>MIN/MAX</b>	63/80	65/80	60/82
<b>Relative Humidity</b>	60 to 65%	65 to 70%	50%

## FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #153 Issued: 10/6/2011 1600 hrs	Signed: David Fogler	Shift Date: <b>Friday 10/7/2011</b>

**GENERAL FIRE BEHAVIOR**  
 Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within and around the swamp.

Indicators/Threshold for Increased Fire Activity

- Relative humidity below 45%**
  - Fine dead fuel moisture 8% or less**
  - Winds above 10 mph**
  - Dispersion above 70**
  - Heavy fuel loadings**
- \* Items in BOLD ITALICS are predicted to occur today\*

### SPECIFIC FIRE BEHAVIOR

- Interior smoldering may become active burning with flare ups and re-burn possible.
- Expect fire to continue smoldering with potential open flame as heated areas are fanned by winds. Backing fire will progress in organic leaf mats, muck soils, and un-burnt shrubs in the Refuge Wilderness swamp area.

### LIGHTNING ACTIVITY LEVEL 1

	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
<b>Winds 7-13 g-20 mph</b>	Winds will be brisk from the Northeast - East			
Small PL Pines (4)	<b>35-60 ch/hr</b>	<b>14-18 ft</b>	UP to 2/10 MILE	50%
Southern Rough (7)	<b>15-25 ch/hr</b>	<b>4-6 ft</b>	UP to 2/10 MILE	50%
Reburn (9)	<b>4-8 ch/hr</b>	<b>2-3 ft</b>	UP to 2/10 MILE	50%
Shrub Fuels (sh8)	<b>10-17 ch/hr</b>	<b>7-9 ft</b>	UP to 2/10 MILE	50%

**One hour fine dead fuel moisture is 7% for Friday:** Smoldering in the duff and larger fuels will continue. 1,000 hour fuels remain drier than normal for this time of year. Re-burn potential is likely due to lower humidity's in the areas that have received minimal rainfall. The uncontrolled fire edge in the Wilderness swamp will continue to burn through organic soils, leaf litter and downed woody material. If contiguous fuels are ignited, spread and spotting potential will increase due to lower humidity and higher winds

**NOTE- OTHER THAN THE RE-BURN, FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.**

### All Divisions:

*The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Keep a heads-up for falling trees. Re-burn potential is likely.*

**Air Operations:** Expect an increase in smoke from the fire.

**SAFETY:**

**Brisk Winds – Watch for increasing winds throughout the afternoon**

**Live Trees/SNAGS – are falling in all Divisions and will be influenced by Increased winds.**

**FUELS:** Watch for pockets of cured shrubs or blankets of needle cast. Re-burn is possible in some area. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing a heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations.

***Energy Release Component (ERC) is running WELL ABOVE AVERAGE for this time of year.***

# Safety Message

**INCIDENT:** Honey Prairie Fire

**DATE:** 10/07/2011

**TIME:** 0800

**Major Hazards and Risks:** Weather  
Wildlife  
Road Construction

**Weather** – There is a possibility of some rain or thunderstorms moving in for the next couple of days. The road work with the fresh clay may get slick. Use caution, reduce speed and increase following distance.

**Increased wildlife activity** – There has been an increase sighting of wildlife in the area from bears, deer, otters, raccoons, etc. Be aware of your surroundings there is a lot of movement due to hunting pressure and logging activities. There have been a couple of Snake bites lately in the southern area from Rattlesnakes. They advised that the Rattlesnakes did not rattle, so there may not be a warning. There has also been an increase of mosquitoes, use appropriate insect repellent.

**Road Construction** – Road construction on Antioch Road continues close to Argyle, use caution and slow down in the area of the construction. We also will continue to work 26 road.

**Watch for Obstacles in the road ways and Maintain Safe Speed!**

**What is Wrong with this picture?**

## STANDARD FIREFIGHTING ORDERS

1. Keep informed on fire weather conditions and forecasts.
2. Know what your fire is doing at all times.
3. Base all actions on current and expected behavior of the fire.
4. Identify escape routes and safety zones, and make them known.
5. Post lookouts when there is possible danger.
6. Be alert. Keep calm. Think clearly. Act decisively.
7. Maintain prompt communications with your forces, your supervisor, and adjoining forces.
8. Give clear instructions and be sure they are understood.
9. Maintain control of your forces at all times.
10. Fight fire aggressively, having provided for safety first.

## WATCH OUT SITUATIONS

1. Fire not scouted and sized up.
2. In country not seen in daylight.
3. Safety zones and escape routes not identified.
4. Unfamiliar with weather and local factors influencing fire behavior.
5. Uninformed on strategy, tactics, and hazards.
6. Instructions and assignments not clear.
7. No communication link with crewmembers or supervisor.
8. Constructing line without safe anchor point.
9. Building fireline downhill with fire below.
10. Attempting frontal assault on fire.
11. Unburned fuel between you and fire.
12. Cannot see main fire; not in contact with someone who can.
13. On a hillside where rolling material can ignite fuel below.
14. Weather becoming hotter and drier.
15. Wind increases and/or changes direction.
16. Getting frequent spot fires across line.
17. Terrain and fuels make escape to safety zones dif ficult.
18. Taking a nap near fireline.

**Safety Officers:** Tommy Hawkins

INCIDENT ACTION PLAN SAFETY ANALYSIS											1. Incident Name Honey Prairie Fire		2. Date 10/7/2011		3. Time Day Shift	
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones											Other Risk Analysis					
Divisions	Indirect Fireline	Power lines / Snags	Road Conditions	Frontal Assault	Extreme Conditions	Railroad	Logging Operations	Wildlife, Insects	LCES Mitigations	Smoke	Traffic/Driving	Communications	Fatigue/Hydration	School Buses / Children	Other Risk Mitigations	
All Divisions	1, 2, 3, 4, 5, 7, 8, 10, 14	2, 6, 11, 15, 17	12, 20, 26	1, 2, 3, 4, 5, 7, 8, 14	7, 10	1	2, 3, 5, 6, 20, 21, 24, 28	2, 23, 28	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staging. 2. Look UP, DOWN and AROUND 3. Post experienced Lookouts. Make sure LCES is in place and make known. 4. Use Aerial Resources as Lookout if available.	24	12, 17, 19, 20, 22, 26, 27	1, 3, 10, 14, 19, 24, 25	16, 18, 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings. 17. Defensive driving will be addressed in all briefings. 18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely. 19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.	
									5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps. 6. Identify, mark & mitigate. 7. FBAN/Meteorologist to monitor weather updates and advisories. 8. Ensure Fireline is Anchored to black or manmade/natural barrier.						20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages. 21. Relocate staging area when driving conditions warrant. 22. Use spotter when backing vehicle(s). 23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing	
									10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations. 11. Refer to IRPG, pg. 12 on Power Line Hazards. 12. Observe all traffic signals and speed limits. Drive with lights on. 14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).						24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation. 25. Follow establish communication plan, flight follow through dispatch 26. Watch-out for school buses and for children along the edge of roadway and crossing the road.	
									15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.						27. Treat all intersections as 4-way stops 28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

**8. Medical Emergency Procedures**

**Identify any EMTs and Paramedics in your crews. All medical emergencies will be reported to the Division Supervisor who will assume command and notify Line Medics.**

**On scene personnel will:**

1. Provide medical care & stabilize patient.
2. Call 911 if possible or call phone #'s above for EMS and provide the information requested.
3. Notify Communications via radio over Command Channel
4. Communications will clear radio traffic for medical emergency.
5. Communications will confirm 911 has been notified coordinate with IC, SOF.
6. DIVS will notify the Field Ops Section Chief.

**MAJOR EMERGENCIES – Secure the area and identify witness for later investigation. Keep an accurate log of events. NOTE: Do not give Patients Name over the radio!**

**INJURY REPORTING PROCESS:**

# Hunter Encounters and Confrontations

Bear, Archery, and Muzzle Loader season is now open. Crews are likely to encounter hunters either hunting or scouting in the area of the Swamp Edge Break. Bear Hunter will be running dogs and chasing the pack in vehicles on narrow dusty roads to intercept bears. Use Caution traveling as hunters may not be paying attention and traveling at excessive speeds.

Avoid contact as much as possible. The least amount of impact we have on their hunting area the better off we will be. Expect many questions about the fire operations and how long the fire will continue to burn. It's a good idea to review the Fire Information section of the plan for a good explanation of what to expect in the coming months.

The majority of the hunters will be friendly but should you have a confrontation with someone:

1. Politely excuse yourself and leave the area immediately;
2. Notify your supervisor;
3. Notify the Security Manager by radio or phone:

SECM – Michael Tipton 706-633-6419

Or

GA DNR Gary Simmons 912-282-2406 Cell

4. If necessary, call the Georgia DNR at 1-800-241-4113 with a description of the person, vehicle and Tag number, and the nature of the confrontation. Georgia DNR will send an officer to handle the situation.

## Fire Information IAP messages

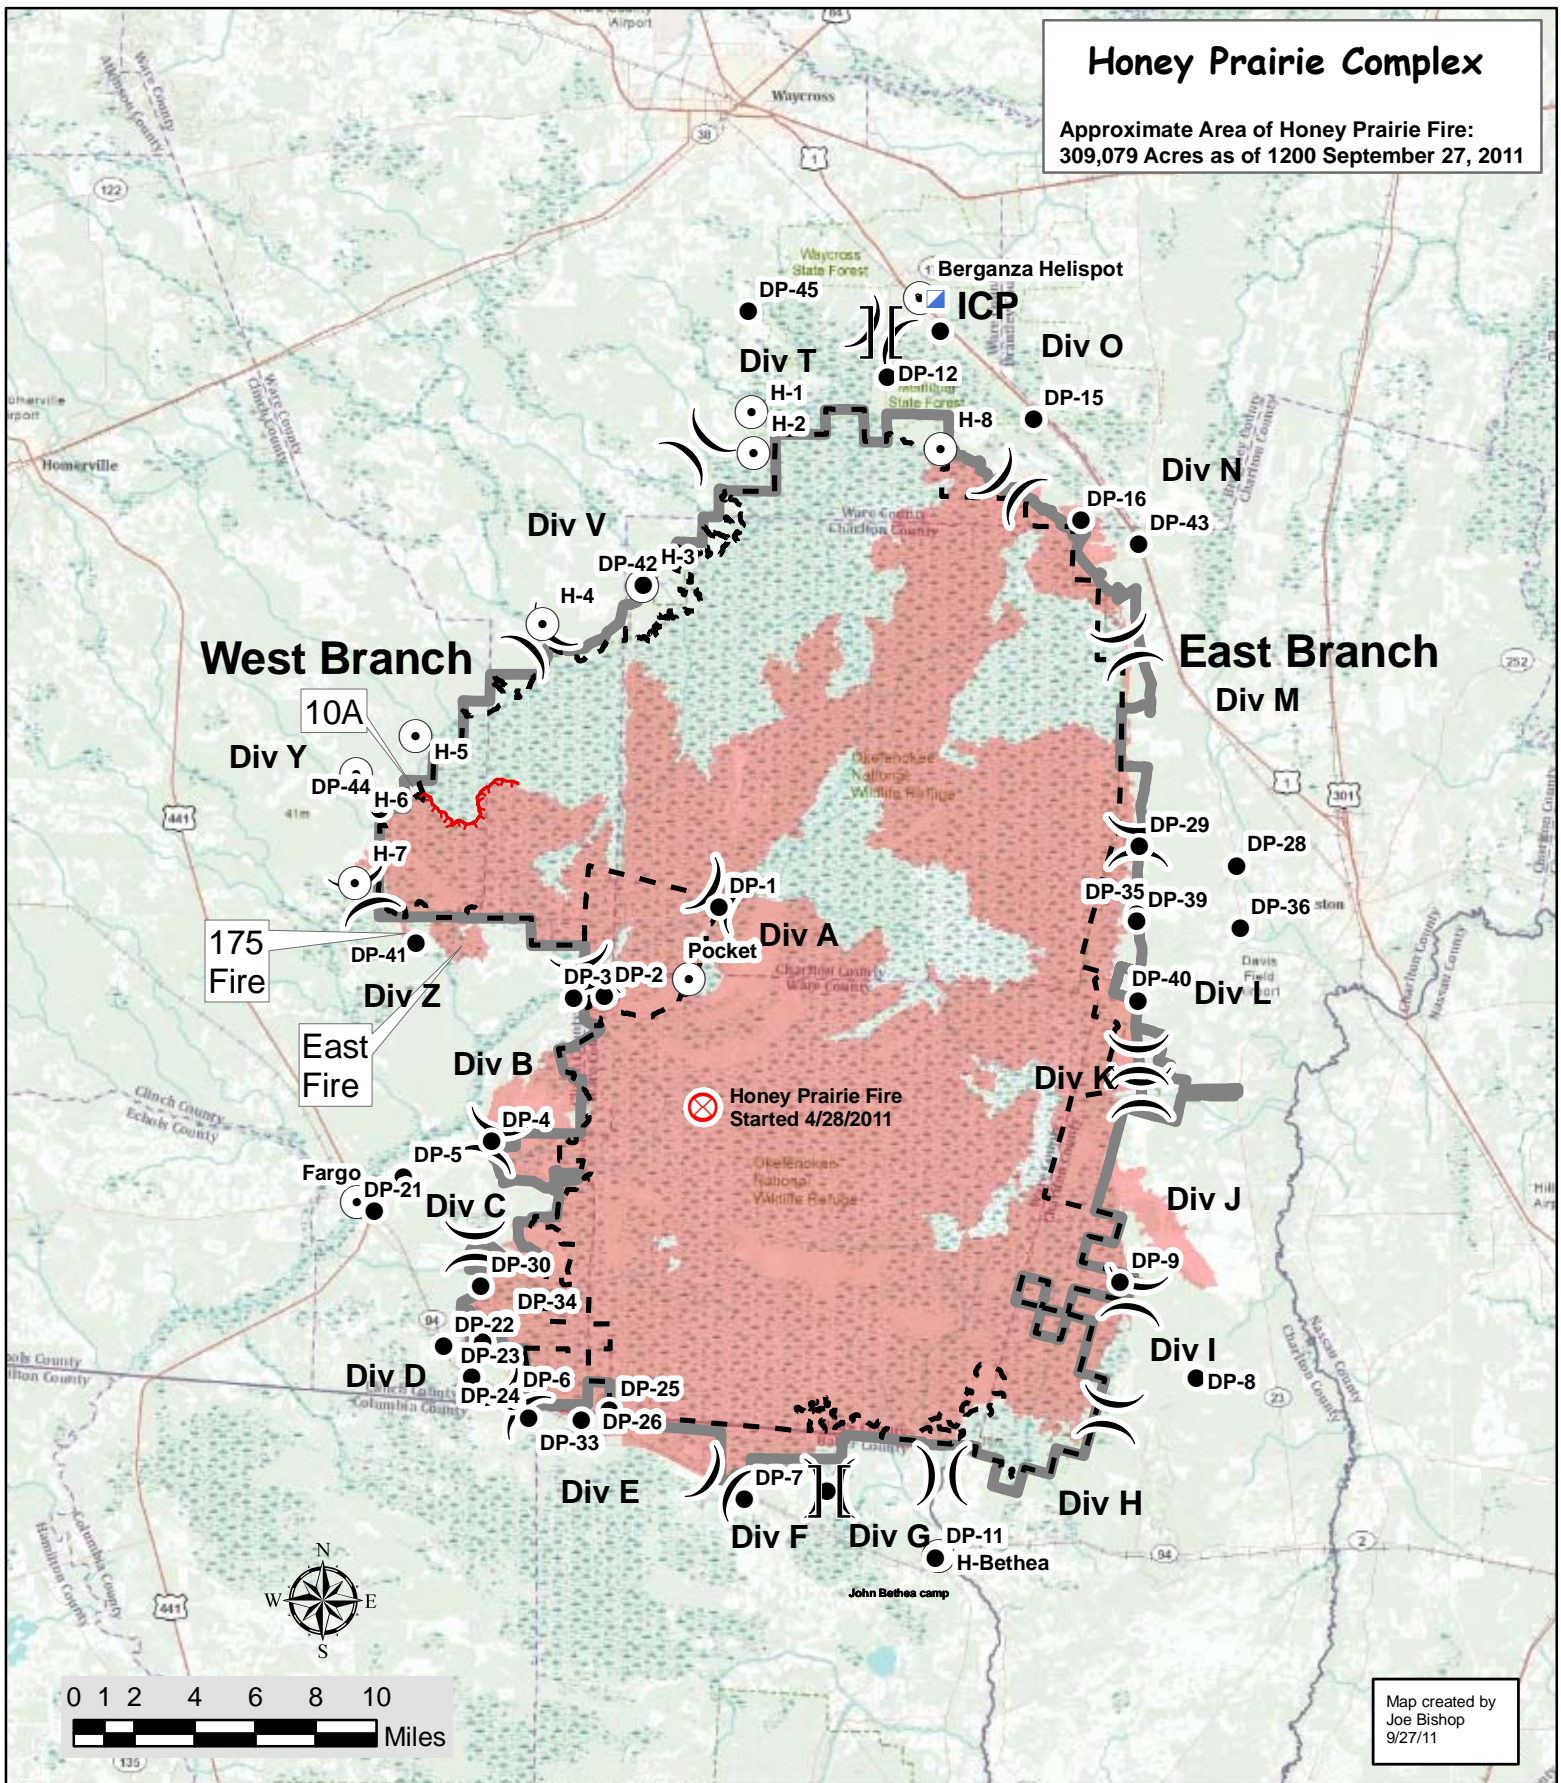

1. Public and firefighter safety remains the top priority for this incident.
2. Fire managers for the refuge have coordinated suppression efforts with the Georgia Forestry Commission and the Greater Okefenokee Association of Landowners (GOAL) representing federal and state agencies, industry and private landowners. Through this Unified Command, the partners support the chosen strategy as the appropriate management response to protect adjacent valuable commercial timber, isolated homes scattered on private land, and critical wildlife habitat for threatened and endangered species.
3. Fire is a natural component of the Okefenokee ecosystem; since the refuges creation in 1937, there have been hundreds of wildfires that have burned thousands of acres here. The plants and animals on the refuge are well adapted to survive periodic wildfires.
4. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
5. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
6. Okefenokee National Wildlife Refuge typically employs a contain and control strategy to manage fire; containing it within the swamp and actively suppressing it outside of the swamp in the upland forest.

### Commonly asked question:

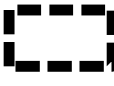

1. Why won't this fire go out? What will it take? Surface burning of available fuels is only part of the current problem. Peat beds (partially decayed vegetation normally floating in a vertical column of water) is what supports these surface fuels. Unfortunately, the current dry conditions have allowed a portion of the peat beds to dry out and the surface burn has transferred into the peat beds and is now burning subsurface. There are now two sources of heat and available fuel that must be extinguished. The current spotty, localized rain storms can have some effect on the surface burns but do not do much to control subsurface burns. It will take a big rain storm blanketing the entire swamp (remember the swamp is huge –over 650 square miles in size) dropping a minimum of 6-8 inches of rain. As the water levels in the swamp slowly rise, as a result of the rain, the peat beds will become water saturated again eliminating one source of the fire. As the surface of the swamp becomes covered by water, burning surface fuels will be extinguished as well. Burning fuels that extend above these water levels (dead and drying trees/shrubs) may continue to burn until they fall over or burn up. Fire that exists in upland habitat on islands within the swamp may also continue to burn but it will be confined to that immediate area by the swamp waters surrounding the island. This is not something that will likely occur overnight. It may take days, weeks, or even months. The refuge has experienced fire events that were not declared officially out for well over a year after the main firefighting effort had ceased.
