Letter from GFC Incident Commander:

To: All Honey Prairie Incident Personnel

As A Georgia Forestry Commission Type 3 Incident Commander, I am committed to a policy of “zero tolerance” of inappropriate behavior during incident operations. Any form of harassment, discriminatory practices, or disrespectful behavior will not be tolerated.

Guidelines on in-appropriate behavior both “on Duty” and “off Duty” while assigned are addressed within each agencies policies. Our Team expects all incident personnel to follow established government policies for behavior along with all Illegal drug and alcohol directives.

Our Incident Management Team endorses and supports an attitude of mutual respect for all personnel and the public we serve.

We expect a strong work ethic and an attitude of Safety at all times!

Sincerely,

/s/ Steve Gray

Incident Commander
Georgia Forestry Commission Type 3 Incident Management Team

INCIDENT OBJECTIVES	1. INCIDENT NAME Honey Prairie Complex	2. DATE PREPARED 8/10/11	3. TIME PREPARED 1700												
4. OPERATIONAL PERIOD (DATE/TIME) Thursday, August 11, 2011 0800 – 2000															
5. GENERAL CONTROL OBJECTIVES FOR THE INCIDENT (INCLUDE ALTERNATIVES) <ol style="list-style-type: none"> 1. Provide for safety of incident personnel and public in all incident operations. 2. Maintain a positive working relationship with all adjacent landowners, cooperators State and Federal partners. Inform, involve and communicate incident planning and operations with all partners. 3. Contain all fires that are within the Okefenokee National Wildlife Refuge, inside the Refuge and/or inside the swamp edge break if possible. 4. In cooperation with local timberland owners, use full suppression strategies and tactics to minimize damage to private timberlands and improvements and to prevent fires outside the Refuge from entering the Refuge. 5. Assist in management and suppression of additional fires (new starts or breakouts) in the vicinity as approved by Agency Administrators and Incident Commander. 6. Protect all cultural and archeological sites and structures within the refuge, with particular attention to facilities at Okefenokee Swamp Park. 7. Manage the fires cost-effectively consistent with the values at risk. 8. Implement structure protection as necessary for at-risk facilities and communities. 9. Coordinate suppression actions with assigned Refuge Resource Advisors 															
6. WEATHER FORECAST FOR OPERATIONAL PERIOD See attached forecast for area specific weather information.															
7. GENERAL SAFETY MESSAGE Drive defensively and use spotter when backing. Ensure LCES is in place and known by all personnel. Drink plenty of water and take frequent rest breaks. Ensure proper use of PPE during all operations.

Fire Weather Forecast

FORECAST NO: 96

NAME OF FIRE: Honey Prairie Complex

PREDICTION FOR: Day Shift
SHIFT DATE: Thursday 8/11/11

UNIT: Okefenokee National Wildlife Refuge

FORECAST ISSUED: 8/10/11 at 1600

SIGNED: Keith Mousel/FBAN

WEATHER DISCUSSION: DRIER AIR IS MOVING INTO THE REGION FROM THE NORTHWEST AND WILL LIMIT THUNDERSTORM ACTIVITY THROUGH FRIDAY. FEWER CLOUDS WILL ALLOW TEMPERATURES TO SOAR INTO THE UPPER 90S NEAR Ocala TO LOWER 100S ACROSS THE SUWANNEE RIVER VALLEY NORTHWARD INTO GEORGIA. RELATIVE HUMIDITY WILL APPROACH CRITICALLY LOW LEVELS OVER THE SUWANNEE RIVER VALLEY...BUT ERC VALUES WILL BE TOO LOW FOR RED FLAG CONDITIONS. STILL...THE RH`S WILL BE ENOUGH TO COMBINE WITH VERY HOT TEMPERATURES TO PRODUCE DANGEROUS HEAT INDICES THURSDAY AND FRIDAY

TODAY: Mostly Clear

MAXIMUM TEMPERATURES: 98-103°
PM HEAT INDEX: 105° - 110°
MINIMUM HUMIDITY: 28 - 34%
20 FT WINDS: AM: NW 4 mph
PM: W - 7 mph
STABILITY/INVERSION: 8700 feet
TRANSPORT WINDS: NW 12 mph
DISPERSION INDEX: 76, VERY GOOD
CHANCE OF PRECIPITATION: 10%
PRECIPITATION AMOUNTS: Less than a tenth an inch.
LIGHTNING ACTIVITY LEVEL: 1

TONIGHT: Clear. Calm winds. Low temperatures 69-73°. Max RH 90-100%.

FRIDAY: Mostly Clear

MAXIMUM TEMPERATURES: 96-100°
PM HEAT INDEX: 105° - 110°
MINIMUM HUMIDITY: 37-43%
20 FT WINDS: AM: NW 4 mph.
PM: N 7 mph
TRANSPORT WINDS: NW 9 mph
DISPERSION INDEX: 60 GOOD
CHANCE OF PRECIPITATION: 20%
LIGHTNING ACTIVITY LEVEL: 2

EXTENDED FORECAST:

	SATURDAY	SUNDAY	MONDAY
SKY/WEATHER	Partly Cloudy / Scattered Showers and Thunderstorms	Partly Cloudy / Scattered Showers and Thunderstorms	Partly Cloudy / Scattered Showers and Thunderstorms
CHANCE PRECIP	30%	50%	20%
20 FT. WINDS	PM: NE 5 mph	PM: W 5 - 10 mph	PM: W 5 - 10 mph
IN/MAX TEMPS	70 / 90+	70 / 90+	70 / 90+

FIRE BEHAVIOR FORECAST

Fire: Honey Prairie Complex	Unit: GA-OKR-000001	Prediction for Day Shift
Forecast #95 Issued: 08/10/2011 1830 hrs	Signed: Keith Mousel	Shift Date: Thursday 08/11/2011

GENERAL FIRE BEHAVIOR

Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within the swamp.

Indicators/Threshold for Increased Fire Activity

- **Relative humidity dropping below 45%**
- Winds above 10 mph
- **Heavy fuel loadings**
- **Fine dead fuel moisture 8% or less**
- **Dispersion above 70**
- *** Items in BOLD are predicted to occur today***

SPECIFIC FIRE BEHAVIOR

- **Fire behavior activity will continue to heat up during this drying trend.**
- **Interior smoldering and some flare ups are possible, especially if winds increase.**
- **Expect fire to continue spreading through the shrub fuels with low rates of spread and minimal flame lengths. LAL 1**

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
Winds at 4 – 8 mph				
Shrub Fuels – SH4	2 – 3 ch/hr	1 – 2 feet	1/10	69%
Heavy Southern Rough- SH8	4 – 7 ch/hr	4 – 6 feet	1/10	69%
Timber Litter-Reburn TL8	2 – 3 ch/hr	1 – 3 feet	1/10	69%
Small Pine Plantation w/grasses GR5	4 – 8 ch/hr	3 – 4 feet	1/10	69%

One hour fine dead fuel moisture is at 5% for Thursday Areas remain dry and burning continues. 1,000 hour fuels are drier than normal for this time of year. There is re-burn potential; mainly on the west side of the fire due to the amount of needle cast, fallen trees and scorched shrubs. Should wind become stronger than predicted, expect fire behavior to increase above predicted levels. **In areas where fuels have been herbicided, expect quick ignitions, extreme heat, quicker rates-of-spread, and possible group tree torching potentially producing spotting problems.**

NOTE- FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.

All Divisions:

The fire continues a slow spread through the thick bays and muck soils. Roots and fallen trees are protecting heat sources allowing the fire to burn organic soils from the bottom up. Be heads-up for falling trees.

**STANDARD FIREFIGHTING ORDER # 1
KEEP INFORMED ON FIRE WEATHER CONDITIONS AND FORECASTS.**

Air Operations: Expect possible areas of smoke especially on the west and north side of the fire.

SAFETY:

WINDS – Stay abreast of changing wx conditions throughout the entire shift. **THUNDERSTORMS** - these severe winds can create extreme fire behavior, with winds gusting over 30 mph. **Live Trees/SNAGS** – are falling in all Divisions – will be influenced by Thunderstorm outflow winds. **FUELS:** Watch for pockets of cured shrubs or blankets of red needles beginning to cover the forest floor, re-burn is still possible. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing the heat source. 100 and 1000 hour fuels are still below average in moisture content. Stay focused, and put LCES in place before starting operations. *Energy Release Component (ERC) is running near average for this time of year.*

SAFETY MESSAGE

Augusta 11, 2011

Major Hazards and Risk

Wildlife

Thunderstorms

Complacency

Logging Operations

Driving

Dehydration

Mitigations

Do not feed or harass alligators.

Wear your seat belt when the vehicle is moving.

Thunderstorms produce strong winds heavy rain and frequent lightning. Take refuge in your vehicles and insure you are parked in a safe place. Any tree is capable of falling under strong wind events.

Seeing and doing the same things every day leads to complacency. Stay alert to the known hazards. Conduct tail gate safety sessions. Insure that TEN and EIGHTEEN are in place before starting work.

Logging operations will be on the increase. Pay attention to log trucks and logging equipment working in your division and increased truck traffic on the highways.

The heat index for today is predicted to be 105 to 110 today. Mitigate this by drinking water and taking frequent breaks. Drink one bottle of water an hour.

Safety Officer:

Tom Lail

Remember our Fallen Firefighters thru the Wildland Firefighter Foundation and the 52 Club. www.wffoundation

INCIDENT ACTION PLAN SAFETY ANALYSIS										1. Incident Name Honey Prairie Fire		2. Date 8/11/2011		3. Time Day Shift		
LCES* Analysis of Tactical Applications Lookouts Communications Escape routes Safety zones										Other Risk Analysis						
LCES Mitigations										Smoke	Traffic/Driving	Communications	Fatigue/Hydration	School Buses / Children	Other Risk Mitigations	
Divisions	Indirect Fireline	Power lines / Snags	Road Conditions	Frontal Assault	Extreme Conditions	Railroad	Wildlife, Insects									
All Divisions	1, 2, 3, 4, 5, 7, 8, 10, 14	2, 6, 11, 15, 17	12, 20, 26	1, 2, 3, 4, 5, 7, 8, 14	7, 10	1	2, 23, 28	1. Establish & maintain LCES. Report LCES checks twice daily to DIVS on line & staggng. 2. Look UP,DOWN and AROUND 3. Post experienced Lookouts. Make sure LCES is in place and make known. 4. Use Aerial Resources as Lookout if available.	24	12, 17, 19, 20, 22, 26, 27	1, 3, 10, 14, 19, 24, 25		16, 18, 21	26	16. Take adequate rest breaks and encourage to drink water NOW through briefings. 17. Defensive driving will be addressed in all briefings. 18. All personnel must meet the 2:1 work/rest ratio. Line supervisors and Safety will monitor closely. 19. Notify Operation and Safety of Railroad track issues to ensure safety of firefighters.	
								5. Flag escape routes on right side of escape route facing outward. Create new escape routes as you progress and identify Safety Zones on the ground and maps. 6. Identify, mark & mitigate. 7. FBAN/Meteorologist to monitor weather updates and advisories. 8. Ensure Fireline is Anchored to black or manmade/natural barrier.							20. Ensure Traffic Planning is safe and enforced. Heed Defensive Driving techniques noted in Safety Messages. 21. Relocate staging area when driving conditions warrant. 22. Use spotter when backing vehicle(s). 23. For insects, use protective spray with deet on skin (Not on Nomex), permethrin can be used on nomex clothing	
								10. Keep Firefighters informed of any changes in predicted weather, consider at least a two day weather pattern when planning Strategic Firing operations. 11. Refer to IRPG, pg. 12 on Power Line Hazards. 12. Observe all traffic signals and speed limits. Drive with lights on. 14. Ensure GOOD tailgate briefings with resources unable to attend Operational Briefing (Include Ops, Logs, Fin & Plans info.).							24. Establish smoke/fog signs on roadways. Coordinate with Department of Transportation. 25. Follow establish communication plan, flight follow through dispatch 26. Watch-out for school buses and for children along the edge of roadway and crossing the road.	
								15. Scout ahead of tractor operations to avoid making contact with power poles and guide wires when tying into roads. Power companies are working in some DIVS, avoid all down lines as they may become charged.							27. Treat all intersections as 4-way stops 28. Bears, Gators, and some snakes are dangerous. Do not approach or feed wildlife at any time.

8. Medical Emergency Procedures

Identify any EMTs and Paramedics in your crews. All medical emergencies will be reported to the Division Supervisor who will assume command and notify Line Medics.

On scene personnel will:

1. Provide medical care & stabilize patient.
2. Call 911 if possible and provide the information requested.
3. Notify Communications via radio over Command Channel
4. Communications will clear radio traffic for medical emergency.
5. Communications will confirm 911 has been notified coordinate with IC, SOF.
6. DIVS will notify the Field Ops Section Chief.

MAJOR EMERGENCIES – Secure the area and identify witness for later investigation. Keep an accurate log of events. NOTE: Do not give Patients Name over the radio!

Prepared by (Communications Unit) Phillip Anderson, COMT/COML Incident Dispatcher: 912-286-1660					Cloning at ICP communications and briefings,						

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.

Honey Prairie Fire Incident Information

Here are some key point that we like to make when discussing this fire with the public.

1. Public and firefighter safety remains the top priority for this incident.
2. Past experience has shown that conventional fire suppression tactics do not work well inside the swamp. Humans have never been successful in controlling fires within the swamp; only “mother nature” has done this. Attempting suppression within the swamp is ineffective, costly, wastes firefighting resources and needlessly endangers firefighter safety.
3. Fire on the refuge is usually fought by reinforcing firelines along the Swamps Edge Break, including areas of private land, to keep the fire contained within the swamp.
4. Homeowners and other land owners can minimize the potential for damage to their homes by creating defensible space through firewise landscaping, thinning, etc..
5. Fire enhances the health of the Okefenokee ecosystem and is a force of nature that sustains the diversity and richness of a wide variety of species that makes the Okefenokee a world-famous ecosystem and natural area.
