**FIRE BEHAVIOR FORECAST**

<b>Fire: Honey Prairie Complex</b>	<b>Unit: GA-OKR-000001</b>	<b>Prediction for Day Shift</b>
<b>Forecast #72 Issued: 07/19/2011 1830 hrs</b>	<b>Signed: /S/John Kern</b>	<b>Shift Date: Wednesday 07/20/11</b>

**GENERAL FIRE BEHAVIOR**

Fuels around the Okefenokee Wildlife Refuge are predominately Fuel Model 7 (Southern Rough). Large to moderate acreage tracts of commercial timberland are mixed in throughout the entire perimeter surrounding the refuge. Fast moving wildfires with extremely high flame lengths and rapid rates of spread occur within the swamp.

**Indicators/Threshold for Increased Fire Activity**

- **Relative humidity dropping below 45%**
- **Winds above 10 mph**
- **Heavy fuel loadings**
- **Fine dead fuel moisture 8% or less**
- Dispersion above 70
- **\* Items in BOLD are predicted to occur today\***

**SPECIFIC FIRE BEHAVIOR**

- **Fire behavior will be influenced by past precipitation. All portions of the fire have received significant rainfall recently.**
- **Expect fire to continue spreading through the shrub fuels with low rates of spread and minimal flame lengths. Expect areas with high heat concentrations to increase fire intensity over the next few days. LAL 2**

Fuel Type	Rates of Spread	Flame Length	Spotting Distance	Firebrand Ignition
<b>Winds at 4 - 10 G 15 mph</b>				
Shrub Fuels – SH4	2 - 7 ch/hr	1 - 2 feet	1/10 - 2/10 mile	57%
Heavy Southern Rough- SH8	4 – 15 ch/hr	4 -8 feet	1/10 -2/10 mile	56%
Timber Litter-Reburn TL8	2 - 5 ch/hr	2 - 3 feet	1/10 - 2/10 mile	56%
Small Pine Plantation w/grasses GR5	4 – 17 ch/hr	3 - 5 feet	1/10 – 2/10 mile	56%

**One hour fine dead fuel moisture is at 6% for Wednesday.** Moisture from repeated rains have reduced the fire threat, HOWEVER fine fuels are drying out quickly. 1,000 hour fuels again drier than normal for this time of year. There is reburn potential in all divisions due to the amount of needle cast. Should wind become stronger than predicted, expect fire behavior to increase above predicted levels. Heavier firebrands can also be lifted higher and further increasing likelihood of spots to max predictions. **In areas where fuels have been herbicided, expect quick ignitions and extreme heat, quick rate-of –spread, and group tree torching producing spotting problems.**

**NOTE- FIRE BEHAVIOR CALCULATIONS ARE FOR FIRES IN UNBURNED FUELS INCLUDING NEW IA STARTS.**

<b>West</b>	<b>A</b>	<i>Rains have moistened fuels in this area. Falling snags still pose a threat to fire personnel and the boardwalk. <b>20% chance of rain</b></i>	<b>West</b>	<b>T/V</b>	<i>Rains did fall in this area however fire will continue a slow spread to the North and west. Be heads-up for falling snags. <b>20% chance of rain</b></i>
	<b>B-G</b>	<i>Wetting rains have moistened fuels. Be heads-up for falling snags. <b>20% chance of rain</b></i>	<b>East</b>	<b>H, I J, K L,M N,O</b>	<i>Rains did fall in this area. Heads-up for falling snags. <b>20% chance of rain</b></i>
	<b>Y Z</b>	<i>Fine Fuels are drying out quickly. Rains did fall in this area however areas of heat will remain near Div Y/Z perimeter with possible flare-ups in moderate to high fuel loadings. Be heads-up for falling snags. <b>20% chance of rain</b></i>			

**Night Ops – No Night Operations are Planned.** Scattered showers and thunderstorms will continue with patchy fog developing after midnight.

**Air Operations:** Expect possible areas of heavy smoke especially on the west side of the fire.

**SAFETY:**

**WINDS –** Stay abreast of changing wx conditions throughout the entire shift. **THUNDERSTORMS -** these severe winds can create extreme fire behavior, with winds gusting over 30 mph. **SNAGS – Snags are falling in all Divisions – will be influenced by Thunderstorm outflow winds. FUELS:** Watch for pockets of cured shrubs or blankets of red needles beginning to cover the forest floor. 1,000 and 10,000 hour fuels as well as deep duff pockets are providing the heat source. Stay focused, and put LCES in place before starting operations. Watch for standing burning snags that can fall without warning. *Energy Release Component (ERC) has come back up and is again approaching the 90<sup>th</sup> percentile with the lower RH.*

## Major Hazards and Risk

### Hygiene

Dehydration

Logging Operations

Thunder Storms

Lifting

Driving

Complacency

Wildlife

## Mitigations

To prevent the spreading of germs wash your hands often. By washing your hands, you rinse away germs, protecting yourself and others. In addition to washing your hands, you might want to take some extra precautions when you're in a public restroom. The fewer surfaces you touch, the better. It is especially important before you eat.

The heat index is again going to be over 100 degrees again today. Drink water frequently to stay hydrated take frequent breaks. Keep an eye on your physical condition and that of your coworkers. Some of the symptoms to look for:

Heavy Sweating \* Extreme Weakness \* Nausea \* Muscle cramps \* Elevated Body Temperature

Dizziness \* Confusion \* Clammy \* Pale Complexion \* Fast and Shallow Breathing

Logging operations are going to be on the increase. Pay attention to log trucks and logging equipment working in your environment and give them room. Avoid logging operations if at all possible.

When thunderstorms approach take refuge in your vehicle.

When we are picking up and transporting equipment back to ICP use proper lifting techniques.

Wearing your seat belt will save your life. So arrive alive wear your seat belt. Drive at the posted speed limit or less.

Seeing and doing the same things every day leads to complacency. Stay alert to all the hazards. Conduct tail gate safety sessions.

Do not feed or harass alligators.

Safety Officers,

Barry Coulliette            West Branch

Ray Durham                East Branch

<b>Cloning at ICP communications and briefings,</b>											

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. **Mode** refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "W" indicating mixed mode. All channels are shown as if programmed in a control station, base stations, mobile or portable radio.
