29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.

30: Observed Weather for Current Operational Period Peak Gusts (mph): 9 Max. Temperature: 100

Wind Direction: **SSE-SSW** Min. Relative

Humidity: 33%

31: Fuels/Materials Involved: **7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough**

32: Today's observed fire behavior (leave blank for non-fire events):

Significant areas of smoldering fire due east of Suwannee Creek Road inside refuge.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Continued repair of Trail Ridge & Racepond Roads.

38: Actions planned for next operational period:

Continue patrol, rehab and mop-up of Honey Prairie Fire. Also, remove hose layout from Y & Z divisions.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential Medium
- 2. Difficulty of Terrain **High**
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:
- 42: Remarks:

Agency Administrator objectives are to contain all fires within the Okenfenokee NWR, using indirect tactics at the swamp edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems.
