28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames): 12 hours: None						

24 hours: **None**
 48 hours: **None**
 72 hours: **None**

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.
Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; multiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn concerns.

30: Observed Weather for Current Operational Period
 Peak Gusts (mph):
11 Max. Temperature: **93**
 Wind Direction:
SW Min. Relative Humidity: **50%**

31: Fuels/Materials Involved: **7 Southern Rough Heavy swamp fuel loads, heavy to moderate palmetto/gallberry, 3+ year rough**

32: Today's observed fire behavior (leave blank for non-fire events):
Significant areas of smoldering fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):
In the process of demobing resources. TFR is lifted at end of shift today.

34: Forecasted Weather for next Operational Period
 Wind Speed (mph): **4-8** Temperature: **89**
 Wind Direction: **SW** Relative Humidity: **60%**

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:
Patrol and control reburn, mop up, improve line and recon rehab opportunities. Repair ingress and egress roads to refuge boundary and within refuge. Remove non-escape route flagging and miscellaneous resources in Divisions H-L.

39: For fire incidents, describe resistance to control in terms of:

1. Growth Potential - **Medium**

2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?

41: Projected demobilization start date:

42: Remarks:
Agency Administrator objectives are to contain all fires within the Okenfenokee NWR, using indirect tactics at the swamp edge because of inaccessible terrain and to maintain wilderness values and reduce negative impacts to the ecosystems. Reduction in acreage due to more accurate

mapping.
