26: Projected incident movement/spread 12, 24, 48, and 72 hour time frames:

12 hours: Little to no movement due to rainfall over the fire. The fire will continue to smolder in heavier fuels.

24 hours: **same as above** 48 hours: **same as above** 72 hours: **same as above** 

27: Values at Risk: include communities, critical infrastructure, natural and cultural resources in 12, 24, 48 and 72 hour time frames:

12 hours: **High value commercial timberlands, the Okefenokee National Wildlife Refuge** (**OKR**) and cultural resources, CSX railroads, and Suwanee Chapel Community.

24 hours: **same as above** 48 hours: **same as above** 72 hours: **same as above** 

28: Critical Resource Needs (amount, type, kind and number of operational periods () in priority order in 12, 24, 48, and 72 hour time frames):

12 hours: **none**24 hours: **none**48 hours: **none**72 hours: **none** 

29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan.

Moderate to heavy fuel loads in the swamp and uplands; limited accessibility for ground equipment; mulitiple jurisdictions involved; wilderness area; and reburn potential over the entire fire area. Needle cast and re-sprouted palmetto reburn are concerns. Timber logging activity within the burned area. Bear season, archery season and muzzleloader hunting is open increasing hunter activity in the area. Extended drought makes breakouts possible in

## the western portion of the fire.

30: Observed Weather for Current

Operational Period

Peak Gusts (mph): 11 Max.

Temperature: 83

Wind Direction: **NE** Min.

Relative Humidity: **60** 

31: Fuels/Materials Involved: **7 Southern Rough** 

Heavy swamp fuel loads, heavy to moderate palmetto/gallberry,

3+ year rough

32: Today's observed fire behavior (leave blank for non-fire events):

Today's fire behavior was minimal due to small amounts of rainfall on the fire.

33: Significant events today (closures, evacuations, significant progress made, etc.):

Trace amounts of rainfall occurred over the fire last night and today.

34: Forecasted Weather for next Operational

Period

Wind Speed (mph): 10 Temperature: 85 Wind Direction: **NW** 

Relative Humidity:

35: Estimated Control Date and Time:

36: Projected Final Size:

37: Estimated Final Cost:

38: Actions planned for next operational period:

Continue to patrol for new starts and monitor the west side of the Refuge for heat. Continue to mop-up containment lines and maintain readiness for breakouts.

39: For fire incidents, describe resistance to control in terms of:

- 1. Growth Potential Medium
- 2. Difficulty of Terrain **High**
- 40: Given the current constraints, when will the chosen management strategy succeed?
- 41: Projected demobilization start date:
- 42: Remarks:

Agency Administrator's objectives remain to contain all fires within the Okefenokee NWR, using indirect tactics at the swamp's edge because of inaccessible terrain, and to maintain wilderness values and reduce negative impacts to the ecosystem. Weather forecasts for Monday will exceed the threshold of 4 of the 5 indicators of increased fire behavior.

III I	Suppression Strategy	Size	MMA	Cost To Date
Honey Prairie	Point or Zone Protection/Limited Perimeter Control	309,175	76%	\$52,600,616

44: Cooperating and Assisting Agencies Not Listed Above:

GEMA, GDOT, FLDOT, County EMA's, GOAL, FFS, GFC, Rayonier, Superior Pine and Langdale. Rayonier, Superior Pine and Langdale resources are not reflected in the Honey Prairie Complex resource numbers, since they will respond to protect their own lands as needed.
